

PROSPER AWUNI

Senior Cyber Security Engineer | SIEM/SOAR | CrowdStrike Falcon | Detection Engineering | Threat Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer and Certified Information Systems Security Professional (CISSP) with more than five years of hands-on experience leading security engineering and operations functions in large, complex organisations. I specialise in Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platform engineering, Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR) using CrowdStrike Falcon and Microsoft Defender, threat detection engineering, threat hunting, and vulnerability management. I have delivered large-scale security programmes including the deployment of CrowdStrike Falcon and Microsoft Defender across environments of 8,000-plus users, built automated SOAR playbooks using PowerShell, and governed identity and privileged access using Microsoft Entra ID and BeyondTrust Privileged Access Management (PAM). I bring a methodical, engineering-led approach to security, with a strong record of aligning security operations to NIST 800-61, MITRE ATT&CK, CIS Controls, and ISO 27001 frameworks. I am looking for a senior-level opportunity where I can drive forward SIEM and security platform maturity and contribute meaningfully to an organisation's security posture.

CORE SKILLS AND TECHNICAL STACK

- **SIEM/SOAR Platforms:** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel (KQL), Splunk/SPL - detection engineering, alert triage, threat hunting, SOAR automation
- **EDR/XDR:** CrowdStrike Falcon EDR, Prevent, Insight, Discover, Identity Protection; Microsoft Defender for Endpoint (MDE), Defender for Identity (MDI), Microsoft 365 Defender (M365D)
- **Email Security:** Mimecast configuration, policy management, anti-phishing and anti-spoofing controls
- **Identity and Access Management:** Microsoft Entra ID (Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), BeyondTrust PAM
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Endpoint and Device Management:** Microsoft Intune MDM/MAM, Tanium, Check Point Harmony endpoint security
- **Incident Response:** NIST 800-61 lifecycle, MITRE ATT&CK, digital forensics triage, playbook-driven response
- **Scripting:** PowerShell - SOAR playbooks, automation scripts, reporting
- **Security Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer - University of the Arts, London (UAL) *March 2025 - Present*

- Own and operate CrowdStrike Falcon NG-SIEM, EDR, Prevent, Insight, Discover, and Identity Protection across an 8,000-user estate, driving continuous improvement of detection coverage, alert fidelity, and response capability
- Engineer and maintain detection rules, threat-hunting queries, and correlation logic in Microsoft Sentinel using Kusto Query Language (KQL), managing detections through their full lifecycle from development through tuning and retirement
- Administer Microsoft Defender for Endpoint, Defender for Identity, and Microsoft 365 Defender as the XDR layer, correlating endpoint, identity, and cloud signals for high-fidelity incident investigation
- Develop and maintain SOAR automation playbooks using PowerShell, standardising response actions and reducing mean time to respond (MTTR) across priority alert categories

- Manage Mimecast email security platform, administering anti-phishing, anti-spoofing, and impersonation policies across the organisation
- Govern identity and privileged access through Microsoft Entra ID Conditional Access, MFA, SSO federation, and BeyondTrust PAM for privileged account oversight
- Operate vulnerability management programmes using Tenable.io, AppCheck, and Pentera BAS, providing risk-prioritised remediation roadmaps to leadership
- Lead incident response in accordance with the NIST 800-61 standard, mapping adversary behaviours to MITRE ATT&CK and coordinating containment and recovery activities
- Maintain Microsoft Intune MDM/MAM, Tanium endpoint management, and Check Point Harmony endpoint controls

Cyber Security Analyst, Cyber Security and Identity - University of the Arts, London (UAL)

March 2022 - March 2025

- Deployed and operationalised CrowdStrike Falcon EDR across UAL's 8,000-user estate, including policy baseline configuration, exclusion management, and integration into security operations workflows
- Implemented Microsoft Defender for Endpoint as part of the broader Microsoft 365 security deployment, integrating alerts into SIEM for correlated investigation
- Designed and deployed Microsoft Entra ID Conditional Access policies, MFA, and SSO federation, materially reducing the organisation's identity attack surface
- Administered BeyondTrust PAM, enforcing least-privilege access and managing privileged session monitoring for administrative accounts
- Performed vulnerability assessments using Nessus, Tenable.io, and AppCheck, delivering risk-based remediation plans aligned to CIS Controls and NIST CSF
- Supported Cyber Essentials Plus accreditation and ISO 27001 alignment work, providing technical evidence and coordinating remediation across IT departments
- Carried out threat hunting and indicator-of-compromise investigations using CrowdStrike Falcon Insight and Microsoft Sentinel KQL queries

IT Engineer: Security, Quality and Infrastructure - HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

- Maintained security controls and infrastructure for a Software as a Service (SaaS) and FinTech platform, ensuring alignment to the NIST Cybersecurity Framework and CIS Controls
- Managed endpoint security, network infrastructure, and Microsoft 365 and Azure identity solutions supporting business-critical SaaS operations
- Supported vulnerability scanning, system hardening, and incident investigation activities, contributing to continuous security improvement across development and production environments
- Delivered IT quality assurance and infrastructure reliability improvements for client-facing platforms

KEY ACHIEVEMENTS

- Deployed CrowdStrike Falcon NG-SIEM and EDR across UAL's 8,000-user estate, achieving full detection coverage and enabling SOAR-driven automated response for high-frequency alert types
- Engineered a library of KQL detection rules and threat-hunting queries in Microsoft Sentinel, materially improving signal quality and reducing false positive rates across the SIEM
- Established BeyondTrust PAM programme end-to-end, securing all privileged administrative accounts and meeting internal audit and governance requirements
- Built PowerShell SOAR automation playbooks that standardised incident containment steps, lowering MTTR across priority use cases
- Delivered Cyber Essentials Plus accreditation for UAL, leading the technical workstream and coordinating cross-team remediation
- Implemented Entra ID Conditional Access and MFA, reducing identity-driven incidents and ensuring compliance with data protection obligations

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
