

PROSPER AWUNI

Senior Cyber Security Engineer | SIEM/SOAR | CrowdStrike Falcon | Microsoft Entra ID | EDR/XDR

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with more than five years of experience designing, deploying, and managing enterprise-grade security platforms across complex hybrid and cloud environments. My expertise spans Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR) solutions including CrowdStrike Falcon, email and web security gateways including Mimecast, identity and access management platforms including Microsoft Entra ID, and Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune. I hold the Certified Information Systems Security Professional (CISSP) certification and bring a strong record of improving security posture, reducing detection and response times, and aligning operations to recognised frameworks including NIST 800-61 and MITRE ATT&CK. I am an effective communicator able to work alongside senior stakeholders, infrastructure teams, and SOC colleagues to deliver measurable security improvements within large, fast-paced organisations.

CORE SKILLS AND TECHNICAL STACK

- **SIEM/SOAR:** CrowdStrike Falcon Next-Generation SIEM (NG-SIEM), Microsoft Sentinel with Kusto Query Language (KQL), Splunk/SPL - detection engineering, alert triage, threat hunting, playbook automation
- **EDR/XDR:** CrowdStrike Falcon EDR, Prevent, Insight, Discover and Identity Protection; Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender (M365D)
- **Email and Web Security:** Mimecast email security gateway; experience with web gateway administration and security controls
- **Identity and Access Management:** Microsoft Entra ID (Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO) federation, BeyondTrust Privileged Access Management (PAM)
- **Endpoint Management:** Microsoft Intune MDM/MAM, Tanium endpoint management, Check Point Harmony endpoint security
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS) - risk-based remediation and reporting
- **Incident Response:** NIST 800-61 lifecycle, MITRE ATT&CK framework, digital forensics triage, SOAR-driven playbooks
- **Scripting and Automation:** PowerShell scripting for SOAR automation and security engineering tasks
- **Frameworks and Compliance:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer - University of the Arts, London (UAL) *March 2025 - Present*

- Administer and continuously improve CrowdStrike Falcon NG-SIEM, EDR, Prevent, Insight, Discover, and Identity Protection across an estate of more than 8,000 users, ensuring detection coverage and minimising mean time to detect and respond
- Build, tune, and maintain SIEM detection rules and threat-hunting queries in Microsoft Sentinel using KQL, managing the full lifecycle from alert creation through triage, investigation, and closure
- Oversee Microsoft Defender for Endpoint, Defender for Identity, and Microsoft 365 Defender as the organisation's XDR platform, integrating telemetry streams for unified incident management
- Manage SOAR playbook automation using PowerShell, reducing manual triage effort and improving response consistency for common alert categories
- Administer Mimecast email security gateway, configuring policies for anti-phishing, anti-spoofing, and data loss prevention

- Govern identity and access using Microsoft Entra ID Conditional Access policies, MFA enforcement, SSO federation, and BeyondTrust PAM for privileged account management
- Execute vulnerability management programmes using Tenable.io, AppCheck, and Pentera BAS, producing risk-prioritised remediation reports for senior stakeholders
- Lead incident response activities in line with the NIST 800-61 framework, coordinating containment, eradication, and lessons-learned activities; map adversary tactics and techniques to MITRE ATT&CK
- Manage Microsoft Intune MDM/MAM, Tanium, and Check Point Harmony endpoint controls across the device fleet

Cyber Security Analyst, Cyber Security and Identity - University of the Arts, London (UAL)

March 2022 - March 2025

- Deployed CrowdStrike Falcon EDR across an 8,000-user environment, establishing baseline detection policies, exclusion management, and alert triage workflows in collaboration with IT operations
- Implemented Microsoft Defender for Endpoint as part of the Microsoft 365 security stack, integrating endpoint alerts into the SIEM and streamlining security event correlation
- Configured and maintained Microsoft Entra ID (Azure Active Directory) Conditional Access policies, MFA roll-out, and SSO federation, significantly reducing identity-based risk exposure
- Administered BeyondTrust PAM platform, enforcing least-privilege access across administrator accounts and supporting privileged session monitoring
- Conducted structured vulnerability assessments using Nessus and Tenable.io, producing actionable risk reports aligned to CIS Controls and the NIST Cybersecurity Framework
- Contributed to Cyber Essentials Plus accreditation and ISO 27001 alignment programmes, working with the security team to evidence controls and remediate gaps
- Supported threat hunting and incident investigation activities, utilising CrowdStrike Falcon Insight and Microsoft Sentinel to identify indicators of compromise and lateral movement

IT Engineer: Security, Quality and Infrastructure - HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

- Maintained security controls and infrastructure for a Software as a Service (SaaS) and FinTech environment, aligning practices to the NIST Cybersecurity Framework and CIS Controls
- Managed endpoint security, network infrastructure, and cloud identity solutions across Microsoft 365 and Azure environments, supporting business-critical operations
- Supported vulnerability scanning, system hardening, and incident investigation activities, contributing to a culture of continuous security improvement
- Delivered IT quality assurance processes and infrastructure reliability improvements across client-facing and internal systems

KEY ACHIEVEMENTS

- Led deployment of CrowdStrike Falcon EDR and NG-SIEM across UAL's 8,000-user estate, reducing dwell time through automated detection and SOAR-driven response playbooks
- Designed and implemented Microsoft Defender for Endpoint rollout, achieving full endpoint telemetry integration into Microsoft Sentinel and materially improving XDR visibility
- Established BeyondTrust PAM programme from initial design through to production, securing all privileged administrative access and passing internal audit requirements
- Automated high-frequency SOAR playbooks in PowerShell, reducing analyst workload on routine alert categories by standardising investigation and containment steps
- Delivered Cyber Essentials Plus accreditation for UAL, coordinating evidence gathering and remediation across multiple IT teams
- Implemented Entra ID Conditional Access policies and MFA enforcement, reducing identity-related incidents and strengthening compliance with data protection obligations

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
