

PROSPER AWUNI

Senior Cyber Security Engineer | Azure and Microsoft 365 | Defender XDR | Entra ID | Endpoint and Identity Security

United Kingdom (Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniproper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer and Certified Information Systems Security Professional (CISSP) with more than five years of experience implementing and managing security controls across hybrid infrastructure environments incorporating Microsoft Azure and Microsoft 365. My expertise covers the prevent and protect pillars of cyber security, including designing and implementing security controls across identity, endpoint, and infrastructure platforms, embedding security into cloud services and on-premise systems, and working closely with cyber leadership and infrastructure teams to ensure security is integrated into platforms and projects from the outset. I have hands-on experience with Microsoft Defender for Endpoint (MDE), Defender for Identity (MDI), Microsoft 365 Defender, CrowdStrike Falcon, Microsoft Entra ID (Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune, and Security Information and Event Management (SIEM) platforms including Microsoft Sentinel with Kusto Query Language (KQL). I have delivered large-scale security programmes in environments of 8,000-plus users and am highly effective working remotely as part of a distributed security team, communicating clearly with technical and non-technical stakeholders at all levels.

CORE SKILLS AND TECHNICAL STACK

- **Azure and Cloud Security:** Microsoft Azure security controls, Microsoft 365 security stack, hybrid infrastructure security, cloud-native identity and endpoint protection
- **Endpoint Security:** Microsoft Defender for Endpoint (MDE), CrowdStrike Falcon EDR, Prevent, Insight, Discover; Microsoft 365 Defender (M365D); Check Point Harmony; Tanium endpoint management
- **Identity Security:** Microsoft Entra ID (Azure Active Directory), Conditional Access policies, Multi-Factor Authentication (MFA), Single Sign-On (SSO) federation, BeyondTrust Privileged Access Management (PAM)
- **Mobile Device and Application Management:** Microsoft Intune MDM and MAM - policy configuration, compliance enforcement, application deployment
- **SIEM and Detection:** Microsoft Sentinel with KQL detection engineering and threat hunting; CrowdStrike Falcon NG-SIEM; Splunk/SPL
- **Security Orchestration and Automation:** PowerShell scripting for Security Orchestration, Automation and Response (SOAR) playbooks and security task automation
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Email Security:** Mimecast email security gateway - anti-phishing, anti-spoofing, data loss prevention
- **Incident Response:** NIST 800-61 framework, MITRE ATT&CK mapping, digital forensics triage, SOAR-driven response
- **Compliance and Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer - University of the Arts, London (UAL) *March 2025 - Present*

- Implement and maintain security controls across a hybrid infrastructure environment incorporating Microsoft Azure, Microsoft 365, and on-premise systems, ensuring security is embedded into platforms, projects, and cloud services
- Administer Microsoft Defender for Endpoint, Defender for Identity, and Microsoft 365 Defender as the organisation's Extended Detection and Response (XDR) capability across an 8,000-user estate
- Manage CrowdStrike Falcon Next-Generation SIEM (NG-SIEM), EDR, and Identity Protection, providing endpoint telemetry, threat detection, and identity-based threat intelligence

- Design and maintain Microsoft Entra ID Conditional Access policies, MFA enforcement, SSO federation, and BeyondTrust Privileged Access Management (PAM) for identity and privileged access governance
- Administer Microsoft Intune MDM and MAM, enforcing device compliance, application deployment, and mobile security policies across the device fleet
- Build and maintain Microsoft Sentinel detection rules and threat-hunting content using Kusto Query Language (KQL), improving signal quality and reducing false positives
- Develop PowerShell SOAR automation playbooks to standardise incident containment and response, reducing mean time to respond across high-frequency alert types
- Execute vulnerability management activities using Tenable.io, AppCheck, and Pentra BAS, delivering risk-prioritised remediation reports to senior stakeholders
- Administer Mimecast email security, Tanium endpoint management, and Check Point Harmony endpoint controls, working alongside the infrastructure team to maintain a strong preventative security baseline
- Lead incident response in accordance with NIST 800-61, coordinating across security and IT infrastructure teams and mapping adversary activity to MITRE ATT&CK

Cyber Security Analyst, Cyber Security and Identity - University of the Arts, London (UAL)

March 2022 - March 2025

- Deployed CrowdStrike Falcon EDR across an 8,000-user hybrid environment, including policy baseline configuration, exclusion management, and integration with the security operations workflow
- Rolled out Microsoft Defender for Endpoint as part of the Microsoft 365 security programme, embedding endpoint telemetry into SIEM alerting and reducing detection gaps across the estate
- Designed and implemented Microsoft Entra ID (Azure Active Directory) Conditional Access policies, MFA, and SSO federation, materially reducing identity-based attack surface
- Configured and managed Microsoft Intune MDM/MAM policies, achieving consistent device compliance and secure application deployment across the organisation
- Administered BeyondTrust PAM platform to enforce least-privilege access and manage privileged account governance
- Conducted vulnerability assessments using Nessus and Tenable.io, producing risk-based remediation roadmaps aligned to NIST CSF and CIS Controls
- Contributed to Cyber Essentials Plus accreditation and ISO 27001 alignment, providing technical evidence and coordinating control remediation across IT and security teams

IT Engineer: Security, Quality and Infrastructure - HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

- Maintained security controls for a hybrid infrastructure environment supporting a Software as a Service (SaaS) and FinTech platform, with a focus on Microsoft 365 and Azure security
- Managed endpoint security, network controls, and cloud identity solutions, ensuring security was embedded into infrastructure operations and platform delivery
- Supported vulnerability scanning, system hardening, and incident investigation across development and production environments
- Delivered IT quality assurance and infrastructure reliability improvements, working closely with engineering and operations teams

KEY ACHIEVEMENTS

- Deployed Microsoft Defender for Endpoint across UAL's 8,000-user estate, integrating endpoint signals into Microsoft Sentinel for unified XDR visibility and significantly improving threat detection coverage
- Implemented Microsoft Entra ID Conditional Access policies and MFA enforcement, reducing identity-related incidents and strengthening compliance with data protection requirements
- Configured Microsoft Intune MDM/MAM across the device estate, achieving consistent device compliance and enabling secure application management at scale
- Deployed CrowdStrike Falcon NG-SIEM and EDR, establishing end-to-end endpoint detection and identity threat coverage across the hybrid environment
- Established BeyondTrust PAM programme, securing all privileged administrative access and meeting internal audit and governance requirements

- Delivered Cyber Essentials Plus accreditation, leading the technical workstream and coordinating cross-team remediation to meet accreditation requirements
- Automated incident response SOAR playbooks in PowerShell, standardising containment actions and reducing analyst workload on routine alert types

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
