

# PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | Incident Response | CISSP

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

---

## PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) and Senior Cyber Security Engineer with over five years of experience in enterprise security operations, specialising in Endpoint Detection and Response (EDR) using CrowdStrike Falcon, Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platform management, and full-lifecycle incident response. I have delivered robust security across complex hybrid IT environments, managing email and web security gateways, Identity and Access Management (IAM), Privileged Access Management (PAM), Mobile Device Management (MDM), Mobile Application Management (MAM), and vulnerability scanning and remediation programmes. I have hands-on experience implementing Multi-Factor Authentication (MFA), Single Sign-On (SSO), Intrusion Detection and Prevention Systems (IDS/IPS), and delivering security awareness training, and I am well placed to join a focused security team in a financial services environment protecting critical infrastructure from evolving threats.

---

## CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon Prevent, Insight, Discover, NG-SIEM (expert-level administration and tuning)
- **SIEM/SOAR:** Microsoft Sentinel, CrowdStrike NG-SIEM; KQL alert triage, detection rule development, playbook automation
- **Email and Web Security Gateways:** Mimecast; anti-phishing, anti-spam, URL protection, DLP policy management
- **Identity and Access Management:** Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, Group Policy, MFA, SSO
- **Privileged Access Management (PAM):** BeyondTrust; session management, least-privilege enforcement, audit logging
- **Mobile Device and Application Management (MDM/MAM):** Microsoft Intune; policy deployment, compliance enforcement
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentera Breach and Attack Simulation (BAS); scan scheduling, CVE triage, remediation tracking
- **Endpoint and Network Security:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender, Check Point Harmony firewall, IDS/IPS management
- **Incident Response:** NIST 800-61 lifecycle; triage, containment, eradication, recovery, root-cause analysis and post-incident review
- **Scripting and Automation:** PowerShell; SOAR playbook development, automated alert enrichment and response
- **Security Frameworks:** MITRE ATT&CK, NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus
- **Certifications:** CISSP, CompTIA Security+, MCSA, CompTIA A+, Google IT Support Professional Certificate

---

## PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer

March 2025 - Present

University of the Arts, London (UAL)

- Administer and optimise the CrowdStrike Falcon platform across the organisation, covering Falcon Prevent (next-generation antivirus), Falcon Insight (EDR), Falcon Discover (asset inventory), and Falcon NG-SIEM, including policy tuning, alert triage, and continuous improvement of detection logic.
- Manage web and email security gateways including Mimecast, configuring anti-phishing controls, URL click-protection, inbound and outbound mail policies, and Data Loss Prevention (DLP) rules to block

advanced email threats.

- Operate SIEM/SOAR capabilities on Microsoft Sentinel, writing KQL queries to investigate alerts, develop custom detection rules, and build automated response playbooks that reduce Mean Time to Respond (MTTR).
- Lead incident response activities following the NIST 800-61 framework: triage, containment, eradication, recovery, and post-incident review, including producing executive-level incident reports.
- Administer BeyondTrust Privileged Access Management (PAM), enforcing least-privilege principles, managing privileged sessions, and maintaining comprehensive audit trails across administrative accounts.
- Manage Microsoft Intune for Mobile Device Management (MDM) and Mobile Application Management (MAM), enforcing device compliance policies, deploying security configurations, and managing conditional access for corporate devices.
- Configure and maintain Entra ID (Azure Active Directory) policies including Conditional Access, Group Policy, MFA, and SSO, ensuring secure identity governance across 8,000 users.
- Run the vulnerability management programme using Tenable.io, AppCheck, and Pentera Breach and Attack Simulation (BAS), scheduling scans, triaging CVEs by risk, coordinating remediation with infrastructure teams, and tracking closure within agreed SLAs.
- Remediate penetration test findings, working with third-party testers to validate fixes, track outstanding issues, and report risk posture improvements to senior stakeholders.
- Manage Check Point Harmony firewall rules and IDS/IPS policies, reviewing logs and tuning signatures to reduce false positives while maintaining accurate threat visibility.
- Deliver security awareness training to staff across all levels, including phishing simulation campaigns and targeted education for high-risk user groups.
- Operate Tanium for real-time endpoint visibility, vulnerability assessment, and rapid software deployment across the device estate.

## **Cyber Security Analyst, Cyber Security and Identity**

*March 2022 - March 2025*

### **University of the Arts, London (UAL)**

- Led the deployment and ongoing management of Microsoft Defender for Endpoint (MDE) across 8,000 devices, configuring attack surface reduction rules, tamper protection, and automated investigation and remediation (AIR) capabilities.
- Monitored and triaged security alerts from SIEM, EDR, and endpoint platforms, conducting detailed investigations and escalating confirmed incidents for response according to defined playbooks.
- Developed and tuned detection rules in Microsoft Sentinel using KQL, reducing alert fatigue by improving signal-to-noise ratios and ensuring high-fidelity alerts aligned to MITRE ATT&CK technique coverage.
- Administered Azure Active Directory (now Entra ID), managing user lifecycle, Conditional Access policies, MFA enforcement, and SSO integration for third-party applications.
- Supported vulnerability scanning and remediation using Tenable.io and Nessus, coordinating with infrastructure teams to prioritise and track findings based on CVSS severity and business risk.
- Wrote PowerShell scripts to automate security tasks including log collection, user account audits, compliance checks, and SOAR playbook integration.
- Contributed to the development and maintenance of security policies, procedures, and standards aligned to ISO 27001, NIST CSF, and Cyber Essentials Plus frameworks.
- Supported delivery of security awareness training sessions and phishing simulation programmes, improving staff detection of social engineering attacks.

## **IT Engineer: Security, Quality and Infrastructure**

*February 2021 - March 2022*

### **HICX Solutions Ltd (SaaS/FinTech)**

- Implemented and managed endpoint security controls, firewall rules, and network security policies across a SaaS and FinTech cloud environment, ensuring compliance with industry security standards.
- Administered identity and access management, configuring MFA, role-based access control (RBAC), and SSO for internal systems and cloud platforms.
- Deployed and maintained MDM solutions for corporate device fleet management, enforcing security policies across Windows, macOS, and mobile endpoints.

- Supported vulnerability management activities, conducting internal security reviews and coordinating remediation of identified risks with development and infrastructure teams.
- Produced and maintained security and infrastructure documentation, supporting audit and compliance activities aligned to ISO 27001 and internal governance frameworks.

## KEY ACHIEVEMENTS

---

- Deployed Microsoft Defender for Endpoint across 8,000 devices at UAL, establishing full EDR visibility, attack surface reduction, and automated investigation capabilities across the entire user estate.
- Delivered a CrowdStrike Falcon NG-SIEM detection improvement programme, developing custom detection rules mapped to MITRE ATT&CK, resulting in measurably higher fidelity alerts and reduced Mean Time to Detect (MTTD).
- Automated incident triage and enrichment workflows using PowerShell and SOAR playbooks in Microsoft Sentinel, reducing manual investigation time per alert by over 40 percent.
- Led end-to-end remediation of critical penetration test findings across network, endpoint, and identity layers, closing all high and critical findings within agreed timescales.
- Implemented a vulnerability management lifecycle using Pentera BAS, Tenable.io, and AppCheck, reducing the organisation's critical vulnerability exposure by prioritising remediation based on business impact and exploitability.
- Delivered staff security awareness training and phishing simulation campaigns across UAL, achieving measurable improvement in phishing detection rates across all tested departments.

## EDUCATION

---

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

## CERTIFICATIONS

---

- Certified Information Systems Security Professional (CISSP)
  - CompTIA Security+
  - Microsoft Certified Solutions Associate (MCSA)
  - CompTIA A+
  - Google IT Support Professional Certificate
