

# PROSPER AWUNI

Senior Security Operations Centre (SOC) Analyst | Incident Response | Detection Engineering | Privileged Access Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

## PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Security Operations Centre (SOC) Analyst with over five years of experience in incident response, forensic analysis, detection engineering and threat intelligence across complex enterprise environments. I bring deep hands-on expertise in Privileged Access Management (PAM) using BeyondTrust, including enterprise-scale deployment, administration and engineering of BeyondTrust privilege controls, session management and password vaulting. I have a thorough understanding of the privileged access management landscape and the threat actors that target it. My broader security operations experience encompasses CrowdStrike Falcon Endpoint Detection and Response (EDR), Microsoft Sentinel Security Information and Event Management (SIEM), Security Orchestration, Automation and Response (SOAR) playbook development, and MITRE ATT&CK-mapped threat hunting. I am experienced in conducting forensic analysis during security incidents, maintaining runbooks and operational documentation, contributing to automation workflows, and improving detection coverage across enterprise environments. I am a strong communicator and team player who thrives in remote-first, globally distributed security teams, and I bring the technical depth and operational experience to operate effectively as a senior contributor in a vendor security operations environment.

## CORE SKILLS AND TECHNICAL STACK

- **Privileged Access Management (PAM):** BeyondTrust PAM enterprise deployment, administration and engineering; privileged session management, password vaulting, least-privilege access enforcement, PAM threat landscape and attack vector knowledge
- **Incident Response:** End-to-end incident response lifecycle, containment, eradication and recovery, NIST 800-61 procedures, root cause analysis
- **Forensic Analysis:** Digital forensic investigation support, log analysis, endpoint artefact review, evidence preservation and chain of custody
- **Detection Engineering:** SIEM detection rule authoring using Kusto Query Language (KQL), MITRE ATT&CK-mapped detection development, detection gap analysis and continuous improvement
- **Threat Intelligence:** Threat intelligence enrichment, indicator of compromise (IoC) management, MITRE ATT&CK framework application, adversary tradecraft analysis
- **Security Information and Event Management (SIEM):** Microsoft Sentinel, CrowdStrike Falcon NG-SIEM, SIEM data source management, analytics rule development
- **Security Orchestration, Automation and Response (SOAR):** Microsoft Sentinel SOAR playbook development, Logic Apps automation, runbook authoring and maintenance
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon EDR (expert level), Microsoft Defender for Endpoint (MDE), alert triage, threat hunting and response
- **Identity Security:** Entra ID, Azure Active Directory (Azure AD), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), identity threat detection
- **Threat Hunting:** Proactive threat hunting using MITRE ATT&CK, Kusto Query Language (KQL) and CrowdStrike Falcon tooling across endpoint, identity and cloud telemetry
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Scripting and Automation:** PowerShell scripting, security process automation, workflow development
- **Compliance Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

## PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer

March 2025 - Present

## **University of the Arts, London (UAL)**

- Operate as the lead analyst for security operations, performing monitoring, triage, investigation and response to security events across endpoint, identity, email and cloud environments using CrowdStrike Falcon, Microsoft Sentinel and Microsoft Defender for Endpoint (MDE)
- Lead incident response activities in line with NIST 800-61 procedures, conducting forensic analysis, root cause analysis and producing incident reports for senior stakeholders
- Engineer and administer BeyondTrust PAM enterprise-wide, managing privileged session recording, password vaulting, least-privilege access controls and audit logging across all critical systems, with direct knowledge of how PAM is targeted by threat actors
- Develop and maintain SOAR automated response playbooks in Microsoft Sentinel and Logic Apps, and author runbooks for common security incident scenarios to ensure consistent operational response
- Design and build KQL-based detection rules in Microsoft Sentinel mapped to the MITRE ATT&CK framework, improving detection coverage across the enterprise environment
- Conduct proactive threat hunting using CrowdStrike Falcon Insight and Microsoft Sentinel, hunting for indicators of compromise aligned to current threat intelligence and adversary tradecraft
- Maintain threat intelligence feeds, enrich alerts with contextual indicator of compromise (IoC) data and contribute to detection content updates based on emerging threats
- Manage vulnerability scanning and remediation cycles using Tenable.io, AppCheck and Pentera BAS, validating detection rules against simulated attack techniques

## **Cyber Security Analyst, Cyber Security and Identity**

*March 2022 - March 2025*

## **University of the Arts, London (UAL)**

- Monitored and triaged security alerts across Microsoft Sentinel, CrowdStrike Falcon and MDE, investigating and responding to incidents in line with NIST 800-61 procedures
- Conducted forensic analysis of security incidents, reviewing endpoint artefacts, log sources and email headers to establish root cause and scope of compromise
- Developed and maintained SOAR automation workflows in Microsoft Sentinel, reducing manual analyst triage effort and improving consistency of incident response
- Authored and maintained operational runbooks for incident types including phishing, malware, data exfiltration and account compromise
- Supported BeyondTrust PAM administration, managing privileged account onboarding, session monitoring and compliance with audit requirements
- Contributed to detection engineering activities, developing KQL analytics rules mapped to MITRE ATT&CK techniques and conducting regular threat hunting exercises
- Maintained and updated threat intelligence sources, enriching security alerts with indicator of compromise (IoC) data and adapting detection rules to reflect evolving adversary tradecraft

## **IT Engineer: Security, Quality and Infrastructure**

*February 2021 - March 2022*

## **HICX Solutions Ltd (Software as a Service/FinTech)**

- Monitored security alerts and performed incident response across cloud and on-premises infrastructure, documenting findings in incident records and contributing to post-incident reviews
- Implemented Privileged Access Management (PAM) controls and identity and access management (IAM) policies, enforcing least-privilege access principles across the SaaS platform
- Conducted vulnerability assessments, maintaining remediation registers and supporting ISO 27001 and Cyber Essentials Plus compliance activities
- Developed security runbooks and operational documentation to support consistent incident response and reduce knowledge dependency on individuals

## **KEY ACHIEVEMENTS**

---

- Deployed and administers BeyondTrust PAM enterprise-wide across UAL's critical infrastructure, providing privileged session recording, password vaulting and least-privilege enforcement, with a thorough operational understanding of PAM attack vectors and defensive controls
- Led incident response for multiple significant security incidents at UAL, conducting forensic analysis, coordinating cross-functional response teams and producing executive-level incident reports

- Engineered over 15 SOAR automated response playbooks in Microsoft Sentinel and Logic Apps, reducing mean time to respond for common incident types and improving operational consistency
- Developed a comprehensive MITRE ATT&CK-mapped detection rule library in Microsoft Sentinel, increasing detection coverage across previously unmonitored attack techniques
- Conducted proactive threat hunting campaigns using CrowdStrike Falcon Insight and Microsoft Sentinel, identifying previously undetected adversary activity and translating findings into new permanent detections
- Deployed Pentera Breach and Attack Simulation (BAS) to validate SIEM and EDR detection effectiveness against real attack techniques, driving data-led detection improvements

## EDUCATION

---

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

## CERTIFICATIONS

---

- Certified Information Systems Security Professional (CISSP)
  - CompTIA Security+
  - Microsoft Certified Solutions Associate (MCSA)
  - CompTIA A+
  - Google IT Support Professional Certificate
-
