

PROSPER AWUNI

Senior Cyber Security Analyst (SIEM Engineering) | Security Operations Centre Specialist

United Kingdom (Hybrid) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniproper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) with over five years of experience in Security Information and Event Management (SIEM) engineering, cyber detection capability development, and Security Operations Centre (SOC) operations. I have extensive experience deploying and managing Microsoft Sentinel and CrowdStrike Falcon Next-Generation SIEM (NG-SIEM) platforms, deploying and maintaining SIEM data feed integrations from diverse sources, building and tuning detection rules to improve security monitoring coverage, and developing automation to improve the efficiency and fidelity of security monitoring. I have worked within large, complex enterprise environments and have mentored and coached junior security analysts within SOC settings. I understand the critical importance of maintaining data feed health, ensuring log fidelity, and translating raw telemetry into actionable cyber detection capability. I am passionate about building resilient, scalable SIEM infrastructure that enables early threat detection and rapid, consistent incident response.

CORE SKILLS AND TECHNICAL STACK

- **SIEM Engineering and Management:** Microsoft Sentinel (SIEM), CrowdStrike Falcon NG-SIEM, SIEM data feed deployment and integration, log source onboarding, data feed health monitoring, SIEM infrastructure management
- **Detection Engineering:** Kusto Query Language (KQL) detection rule development, MITRE ATT&CK aligned detection, detection use case design, alert tuning and optimisation, false positive reduction
- **Security Monitoring Automation:** Security Orchestration Automation and Response (SOAR) playbook development, PowerShell scripting, automated triage and enrichment workflows
- **Endpoint Detection and Response (EDR/XDR):** CrowdStrike Falcon EDR (Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft Defender XDR
- **Incident Response:** NIST 800-61 incident response framework, MITRE ATT&CK, alert triage, threat investigation, containment and eradication, post-incident review
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus, vulnerability scanning, risk prioritisation, remediation coordination
- **Identity and Cloud Security:** Microsoft Entra Identity (Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), BeyondTrust Privileged Access Management (PAM)
- **Endpoint and Device Management:** Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM), Tanium, Group Policy
- **Frameworks:** NIST Cyber Security Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Lead SIEM engineering and management across the Microsoft Sentinel and CrowdStrike Falcon NG-SIEM platforms for an 8,000-user enterprise environment, maintaining data feed integrations, monitoring feed health, and ensuring timely, high-fidelity log delivery
- Deploy and onboard new data sources into Microsoft Sentinel and CrowdStrike NG-SIEM, managing the technical integration process including log parsers, connector configuration, and validation of data fidelity
- Build and optimise KQL-based detection rules in Microsoft Sentinel aligned to MITRE ATT&CK techniques, expanding detection coverage and reducing false positive rates across the Security Operations Centre (SOC)
- Develop and maintain SOAR automation playbooks using PowerShell and KQL, automating alert enrichment, triage workflows, and response actions to improve mean time to respond to security incidents

- Manage and optimise CrowdStrike Falcon NG-SIEM, EDR, Prevent, Insight, and Discover modules, tuning sensor policies and exclusions to improve detection fidelity
- Mentor and coach junior Security Operations Centre (SOC) analysts, providing guidance on alert investigation techniques, detection engineering, and incident response procedures
- Lead incident response investigations following NIST 800-61 framework, conducting forensic analysis, containment, eradication, and post-incident reporting
- Manage vulnerability scanning and remediation programmes using Tenable.io, AppCheck, and Pentra BAS, coordinating remediation tracking with infrastructure teams
- Manage Entra Identity Conditional Access policies, MFA, and SSO configurations, and administer BeyondTrust Privileged Access Management (PAM) platform
- Oversee threat hunting activities using CrowdStrike Falcon Insight and Microsoft Sentinel, proactively identifying indicators of compromise and attacker Tactics, Techniques, and Procedures (TTPs)

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Managed SIEM platform operations and data feed infrastructure for Microsoft Sentinel, maintaining log source health, troubleshooting feed issues, and ensuring timely delivery of security logs without loss of data fidelity
- Deployed and configured CrowdStrike Falcon EDR, managing sensor policies, exclusions, and response actions, and integrating EDR data feeds into the SIEM for unified detection and investigation
- Built detection use cases and contributed to the cyber detection capability of the Security Operations Centre (SOC), developing KQL queries and MITRE ATT&CK aligned alerting rules
- Monitored and investigated security alerts from SIEM and EDR platforms, performing end-to-end alert triage, incident escalation, and documentation
- Developed PowerShell automation scripts for security event correlation, SIEM reporting, and streamlining repetitive security operations workflows
- Mentored junior analysts on SIEM investigation techniques, incident response procedures, and use case development
- Administered Entra Identity (Azure AD) Group Policy, Conditional Access, MFA, and BeyondTrust PAM, supporting the organisation's Identity security programme
- Supported vulnerability management activities using Tenable Nessus and contributed to ISO 27001 and Cyber Essentials Plus compliance activities

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Deployed and configured security monitoring tools, endpoint protection platforms, and email security gateways, ensuring log data from each platform was integrated with central security monitoring infrastructure
- Managed Azure Active Directory (Azure AD) MFA, SSO, and Conditional Access policies, maintaining audit logs and monitoring for identity-related anomalies
- Maintained firewalls, VPN, and Intrusion Detection and Prevention System (IDS/IPS) infrastructure, monitoring alerts and escalating critical security events
- Managed Microsoft Intune MDM and maintained device compliance across the organisation's endpoint estate
- Conducted vulnerability assessments and coordinated vendor remediation for identified security weaknesses
- Supported ISO 27001 information security management system documentation, internal audit preparation, and risk register maintenance

KEY ACHIEVEMENTS

- Deployed and maintained CrowdStrike Falcon NG-SIEM and Microsoft Sentinel for an 8,000-user enterprise estate, managing data feed integrations from over 15 data sources and maintaining high data fidelity across all feeds
- Built KQL-based detection rules in Microsoft Sentinel that significantly expanded MITRE ATT&CK technique coverage and improved the SOC's detection and threat hunting capabilities

- Developed SOAR automation playbooks that reduced average alert triage time and improved consistency of incident response procedures across the Security Operations Centre (SOC)
- Mentored junior security analysts within the SOC, supporting their development in SIEM investigation, detection engineering, and incident response
- Achieved and maintained Cyber Essentials Plus certification, managing the complete evidence collection, gap remediation, and assessor liaison process
- Designed and implemented a vulnerability management programme using Tenable.io and Pentera BAS, achieving measurable reduction in critical vulnerability exposure across the organisation

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
