

# PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | Endpoint Protection | Vulnerability Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

## PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with more than five years of hands-on experience protecting complex enterprise environments. I specialise in CrowdStrike Endpoint Detection and Response (EDR) platform management, Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) operations, vulnerability management, and incident response. I have led the deployment and ongoing optimisation of CrowdStrike Falcon across large multi-site estates and have engineered end-to-end security controls spanning Web Application Firewalls (WAF), email security gateways (Mimecast), Intrusion Detection and Prevention Systems (IDS/IPS), Privileged Access Management (PAM), Multi-Factor Authentication (MFA) and Single Sign-On (SSO), and Mobile Device Management and Mobile Application Management (MDM/MAM). I bring a structured, risk-led approach aligned to the NIST Cybersecurity Framework (CSF), MITRE ATT&CK framework, and CIS Controls, and I thrive in fast-paced environments where I can contribute immediately to a focused security team.

## CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (Prevent, Insight, Discover, NG-SIEM) - expert-level deployment, administration, and threat hunting
- **SIEM/SOAR:** Microsoft Sentinel with Kusto Query Language (KQL), CrowdStrike Falcon NG-SIEM; alert triage, detection engineering, and automated response playbooks
- **Threat Hunting and Detection Engineering:** MITRE ATT&CK-based hunting, custom detection rules, indicator of compromise (IOC) analysis
- **Vulnerability Management:** Pentera Breach and Attack Simulation (BAS), Tenable.io, AppCheck, Nessus; end-to-end scan, prioritisation, and remediation tracking
- **Email Security:** Mimecast email security gateway management, policy configuration, and phishing analysis
- **Identity and Access Management:** Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, MFA, SSO, BeyondTrust Privileged Access Management (PAM)
- **Endpoint and Device Management:** Microsoft Intune MDM/MAM, Microsoft Defender for Endpoint (MDE), Tanium
- **Cloud Security:** Microsoft Azure security controls, Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Network and Perimeter Security:** Check Point Harmony firewall, WAF/DDoS mitigation, IDS/IPS management
- **Incident Response:** NIST 800-61 lifecycle; end-to-end case management, root-cause analysis, and post-incident reporting
- **Security Awareness:** Design and delivery of security awareness training programmes for staff at all levels
- **Frameworks:** NIST CSF, CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK
- **Scripting and Automation:** PowerShell scripting for SOAR automation and operational efficiency

## PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 - Present

### Senior Cyber Security Analyst / Engineer

- Lead the security engineering function for a 19,000-user institution, managing CrowdStrike Falcon EDR across the entire estate including Falcon Prevent, Insight, and Discover modules, with responsibility for platform optimisation, policy management, and threat hunting.

- Operate and tune Microsoft Sentinel as the primary SIEM, authoring KQL detection rules, building SOAR automation playbooks, and reducing mean time to detect (MTTD) and mean time to respond (MTTR) for security alerts.
- Manage the full vulnerability management lifecycle using Pentera BAS and Tenable.io: schedule scans, triage findings by risk severity, assign remediation to asset owners, and track closure through to sign-off.
- Administer the Mimecast email security gateway, enforcing anti-phishing, anti-spoofing, and data loss prevention (DLP) policies, and investigating suspicious email campaigns.
- Oversee identity and access management controls via Microsoft Entra ID and BeyondTrust PAM, implementing and refining Conditional Access policies, MFA enforcement, and just-in-time privileged access workflows.
- Manage Microsoft Intune MDM/MAM policies governing endpoint compliance, application deployment, and mobile device security for the full staff and student device estate.
- Lead incident response activities aligned to NIST 800-61: triage, contain, eradicate, recover, and produce post-incident reports with root-cause analysis and lessons-learned recommendations.
- Conduct threat hunting campaigns using MITRE ATT&CK intelligence to proactively identify adversarial techniques and persistence mechanisms across endpoint, identity, and cloud telemetry.
- Administer IDS/IPS rulesets, review firewall (Check Point Harmony) logs, and maintain WAF/DDoS controls for internet-facing services.
- Design and deliver security awareness training and phishing simulation exercises, improving staff reporting rates and reducing click-through rates on simulated phishing campaigns.

#### **University of the Arts, London (UAL)**

*March 2022 - March 2025*

##### **Cyber Security Analyst, Cyber Security and Identity**

- Deployed and administered Microsoft Defender for Endpoint (MDE) across an 8,000-user estate, configuring attack surface reduction (ASR) rules, onboarding devices, and managing alerts through the Microsoft 365 Defender portal.
- Contributed to the CrowdStrike Falcon rollout, supporting policy configuration, sensor deployment, and initial alert triage across Windows and macOS endpoints.
- Performed daily SIEM alert triage and investigation using Microsoft Sentinel and KQL, escalating confirmed incidents and producing detailed investigation reports.
- Conducted vulnerability assessments using AppCheck and Nessus, coordinating with system owners to remediate high- and critical-severity findings within agreed service level agreements (SLAs).
- Supported Entra ID and Conditional Access management, enforcing MFA and SSO policies and assisting with the rollout of BeyondTrust PAM for privileged account control.
- Managed Mimecast email security policies, investigated phishing attempts, and provided guidance to end users during targeted email attack campaigns.
- Contributed to the UAL information security roadmap by assessing controls against Cyber Essentials Plus and ISO 27001 requirements and supporting certification activities.

#### **HICX Solutions Ltd (SaaS/FinTech)**

*February 2021 - March 2022*

##### **IT Engineer: Security, Quality and Infrastructure**

- Implemented and managed endpoint security controls including antivirus, EDR tooling, and MDM/MAM policies for a cloud-native SaaS organisation.
- Administered network security controls including firewall rule management, VPN configuration, and IDS monitoring for the company's SaaS infrastructure.
- Supported vulnerability scanning and patch management programmes, coordinating remediation efforts with development and infrastructure teams to address identified weaknesses.
- Contributed to security awareness initiatives and assisted with ISO 27001-aligned information security policies, processes, and documentation.
- Managed identity and access controls, provisioning and de-provisioning user accounts, enforcing MFA, and supporting SSO integrations across the SaaS application stack.

#### **KEY ACHIEVEMENTS**

---

- Led CrowdStrike Falcon EDR deployment and ongoing optimisation across a complex multi-site estate, improving endpoint visibility and reducing dwell time for threats.
- Engineered and deployed Microsoft Defender for Endpoint (MDE) across an 8,000-user estate, integrating alerts into Microsoft Sentinel for unified SIEM-driven detection and response.
- Built KQL-based SIEM detection rules and SOAR automation playbooks in Microsoft Sentinel that reduced manual alert triage effort by automating tier-1 response actions.
- Implemented BeyondTrust Privileged Access Management (PAM) controls, eliminating standing privileged access and enforcing just-in-time approval workflows for administrative accounts.
- Delivered end-to-end vulnerability management programme using Pentera BAS and Tenable.io, reducing the critical and high vulnerability backlog through structured remediation governance.
- Managed Mimecast email security gateway policies, successfully mitigating targeted phishing campaigns and reducing malicious email delivery rates.
- Designed and rolled out security awareness training programme including phishing simulations, measurably improving staff security behaviours and reducing click-through rates over successive campaigns.

## EDUCATION

---

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

## CERTIFICATIONS

---

- Certified Information Systems Security Professional (CISSP)
  - CompTIA Security+
  - Microsoft Certified Solutions Associate (MCSA)
  - CompTIA A+
  - Google IT Support Professional Certificate
