

PROSPER AWUNI

Senior Cyber Security Engineer | Azure | CrowdStrike | Hybrid Infrastructure Security | Cloud and Endpoint | Remote UK

United Kingdom (Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a senior cyber security engineer with over five years of experience strengthening security posture across hybrid cloud and on-premises infrastructure, with deep expertise in Microsoft Azure security, CrowdStrike Falcon Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM) platforms, and large-scale security operations. In my current senior role at the University of the Arts, London (UAL), I manage and optimise core security platforms across cloud, endpoint, and network environments for over 8,000 users, delivering continuous monitoring of Microsoft Azure and Microsoft 365 infrastructure, triaging security alerts, investigating security events, and supporting remediation activities at pace. I have a proven ability to work effectively in a fully remote capacity, delivering high-impact security outcomes with self-direction and minimal supervision. I hold the Certified Information Systems Security Professional (CISSP) certification and bring a comprehensive technical skillset spanning CrowdStrike Falcon, Microsoft Defender, Microsoft Sentinel, identity security, vulnerability management, and incident response.

CORE SKILLS AND TECHNICAL STACK

- **Cloud Security:** Microsoft Azure security; Azure Active Directory (Azure AD) / Microsoft Entra ID; Conditional Access; Azure Monitor; Microsoft 365 security centre
- **EDR/XDR:** CrowdStrike Falcon (NG-SIEM, EDR Prevent, Insight, Discover) - Expert; Microsoft Defender for Endpoint (MDE); Microsoft Defender for Identity (MDI); Microsoft 365 Defender
- **SIEM/SOAR:** Microsoft Sentinel and Kusto Query Language (KQL); CrowdStrike Falcon NG-SIEM; SOAR playbook development and automation via PowerShell
- **Hybrid Infrastructure Security:** Monitoring and optimisation of security platforms across cloud, endpoint, and network layers; security event triage; alert investigation and remediation support
- **Incident Response:** NIST 800-61 framework; investigation, containment, eradication, and recovery; MITRE ATT&CK tactical mapping; post-incident reporting
- **Vulnerability Management:** Tenable.io; Pentera Breach and Attack Simulation (BAS); AppCheck; Nessus; scan, triage, and remediation lifecycle management
- **Identity and Access Management (IAM):** Microsoft Entra ID / Azure AD / Conditional Access; MFA/SSO; Privileged Access Management (PAM) via BeyondTrust
- **Endpoint Management:** Microsoft Intune MDM/MAM (8,000-user deployment); Tanium; CrowdStrike Falcon Insight and Discover
- **Email and Web Security:** Mimecast email security gateway; anti-phishing, URL protection, DLP
- **Firewall:** Check Point Harmony next-generation firewall; policy management and IDS/IPS
- **Scripting/Automation:** PowerShell (SOAR automation, reporting, endpoint management)
- **Frameworks:** NIST Cyber Security Framework (CSF); CIS Controls; ISO 27001; Cyber Essentials Plus; MITRE ATT&CK
- **Remote Working:** Proven track record of delivering senior security engineering outcomes in hybrid and remote working arrangements, with strong self-management and cross-team collaboration skills

PROFESSIONAL EXPERIENCE

- University of the Arts, London (UAL) | Senior Cyber Security Analyst / Engineer | Microsoft 365, endpoint (CrowdStrike Falcon, MDE), and network (Check Point Harmony, Mimecast) environments for an 8,000-user hybrid infrastructure, ensuring continuous monitoring and rapid response to security events. | 2025 - Present
- Triage security alerts from Microsoft Sentinel, CrowdStrike Falcon NG-SIEM, and Microsoft 365 Defender, investigating security events across cloud, endpoint, identity, and email data sources to determine scope, severity, and required remediation actions.

- Support remediation activities across the hybrid estate by co-ordinating with infrastructure, cloud, and development teams to address vulnerabilities, misconfigurations, and security gaps identified through monitoring and vulnerability assessments.
- Administer CrowdStrike Falcon across all modules (NG-SIEM, EDR Prevent, Insight, Discover) to deliver comprehensive Endpoint Detection and Response (EDR) visibility and automated threat prevention at scale.
- Engineer and tune detection rules in Microsoft Sentinel using Kusto Query Language (KQL), building analytics aligned to the MITRE ATT&CK framework to detect advanced threats across Azure, endpoint, and identity attack surfaces.
- Administer Microsoft Azure security controls including Microsoft Entra ID Conditional Access, Azure Active Directory (Azure AD) identity protection, and Microsoft Defender for Identity (MDI) to monitor and respond to identity-based attack techniques.
- Conduct vulnerability scanning using Tenable.io, Pentera Breach and Attack Simulation (BAS), and AppCheck; triage findings by severity and business impact; and drive remediation to SLA with infrastructure and cloud teams.
- Lead incident response for Tier 2 and Tier 3 security events across the hybrid estate, applying NIST 800-61 procedures and MITRE ATT&CK tactical mapping to achieve rapid containment and recovery with minimal business disruption.
- Administer Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) policies for 8,000+ devices, enforcing device compliance and application control for both corporate and BYOD mobile endpoints.
- Operate BeyondTrust Privileged Access Management (PAM) to govern, audit, and secure privileged account access across on-premises and Azure cloud infrastructure.

University of the Arts London (UAL) – Cyber Security Analyst, Cyber Security and Identity
 Monitored and triaged security alerts from Microsoft Sentinel and CrowdStrike Falcon across a large hybrid Azure and on-premises environment, investigating security events and escalating confirmed incidents within agreed SLA timescales. *March 2022 – March 2025*

- Supported the monitoring and optimisation of core security platforms including Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Mimecast, and CrowdStrike Falcon, tuning detection policies and response rules to reduce false positive rates.
- Triaged alerts and investigated security events across cloud, endpoint, and email data sources, performing log analysis, Endpoint Detection and Response (EDR) forensic triage, and network log correlation to reconstruct attack chains.
- Supported remediation activities by producing prioritised vulnerability reports from Tenable.io and AppCheck scans, tracking findings to closure with infrastructure and development teams.
- Contributed to the rollout of Microsoft Entra ID Conditional Access and MFA policies across the hybrid estate, improving identity security posture and reducing the attack surface for credential-based threats.
- Assisted in incident response for phishing, malware, and data exfiltration events across the Azure and on-premises hybrid environment, supporting investigation, containment, and recovery activities.

HGX Solutions Ltd (SaaS/FinTech) – IT Engineer, Security, Quality and Infrastructure
 Delivered security configuration and monitoring across cloud and on-premises infrastructure in a fast-growing global SaaS FinTech business, supporting the security of a hybrid Microsoft Azure and on-premises environment. *February 2021 – March 2022*

- Monitored security events and triaged alerts, investigating anomalous activity across Azure Active Directory (Azure AD) logs, endpoint telemetry, and network device logs to identify and respond to potential threats.
- Administered Microsoft Intune MDM/MAM policies for a globally distributed workforce, enforcing device compliance and application control standards across corporate and remote endpoints.
- Conducted vulnerability scans using Nessus, prioritised findings by risk, and co-ordinated remediation with DevOps and infrastructure teams to maintain a secure baseline.
- Managed Azure Active Directory (Azure AD) identity governance, MFA policies, and Conditional Access rules to enforce least-privilege access and support cloud security compliance requirements.

KEY ACHIEVEMENTS

- Delivered 100 per cent CrowdStrike Falcon EDR coverage across 8,000+ endpoints at UAL, providing real-time cloud-delivered threat intelligence, automated prevention, and full hybrid estate endpoint visibility.
- Architected and deployed the full Microsoft Defender suite (MDE, MDI, and Microsoft 365 Defender) across a hybrid Azure environment with 8,000+ users, substantially hardening cloud, endpoint, and identity security posture.
- Optimised monitoring and alerting across core security platforms in a complex hybrid infrastructure by engineering Microsoft Sentinel KQL detection rules and CrowdStrike NG-SIEM correlation logic, improving threat detection coverage and reducing mean time to detect (MTTD).
- Automated SIEM/SOAR playbooks using PowerShell and Microsoft Sentinel Logic Apps, reducing manual analyst effort for routine alert types and accelerating mean time to respond (MTTR) across the hybrid estate.
- Achieved and maintained Cyber Essentials Plus certification for UAL, demonstrating security control effectiveness across the full hybrid cloud and on-premises infrastructure estate.
- Implemented BeyondTrust Privileged Access Management (PAM) controls across on-premises and Azure cloud infrastructure, introducing credential vaulting, session recording, and just-in-time (JIT) access provisioning for all privileged accounts.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
