

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike Falcon | SIEM/SOAR | EDR | Vulnerability Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience securing enterprise environments. I specialise in CrowdStrike Falcon Endpoint Detection and Response (EDR) platform management, Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) operations, and comprehensive vulnerability management. I bring deep expertise in email and web security gateway administration, Multi-Factor Authentication (MFA) and Single Sign-On (SSO) controls, Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune, and Privileged Access Management (PAM) using BeyondTrust. I am experienced working within lean, high-ownership security teams, taking full accountability for security engineering controls across the full technology estate and driving measurable improvements in security posture.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover) - Expert level
- **SIEM/SOAR:** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel (KQL), Splunk (SPL) - alert triage, detection engineering, automated response
- **Email and Web Security Gateways:** Mimecast, web content filtering, anti-phishing policy management
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus - scan-to-remediation lifecycle
- **Identity and Access Management (IAM):** Microsoft Entra ID, Azure Active Directory (AD), Conditional Access, MFA, SSO
- **Privileged Access Management (PAM):** BeyondTrust - session recording, least-privilege enforcement
- **MDM/MAM:** Microsoft Intune - device compliance, application policy, mobile security
- **Endpoint Protection:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 (M365) Defender
- **Firewalls and Network Security:** Check Point Harmony, IDS/IPS, WAF/DDoS controls, network segmentation
- **Incident Response:** NIST 800-61, MITRE ATT&CK framework - triage through post-incident review
- **Scripting and Automation:** PowerShell, KQL, SOAR playbook development
- **Compliance Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Own and optimise the CrowdStrike Falcon platform (NG-SIEM, EDR, Prevent, Insight, Discover) as the primary endpoint protection and detection capability across the enterprise estate
- Manage SIEM/SOAR alert triage, investigation and response workflows, including email gateway events via Mimecast and web security gateway controls, reducing mean time to respond across all severity tiers
- Administer Privileged Access Management (PAM) controls using BeyondTrust, enforcing least-privilege access and securing all privileged accounts and sessions
- Configure and manage MDM/MAM policies through Microsoft Intune, securing endpoint and mobile devices across the 8,000-user estate and enforcing device compliance
- Implement and maintain MFA and SSO controls through Microsoft Entra ID and Conditional Access policies, minimising identity-based attack surface

- Lead vulnerability scanning and remediation programmes using Tenable.io, AppCheck and Pentera BAS, delivering risk-prioritised remediation against the network, endpoint and web application estate
- Manage IDS/IPS configurations and contribute to firewall policy reviews using Check Point Harmony, ensuring network security controls remain aligned to business risk
- Conduct incident response engagements following NIST 800-61 procedures, managing the full lifecycle from alert detection through containment, eradication and post-incident review
- Develop and maintain detection engineering content aligned to the MITRE ATT&CK framework, improving security monitoring coverage across endpoint, identity and cloud vectors
- Automate security workflows and SOAR playbooks using PowerShell scripting, reducing manual analyst workload and accelerating response to high-frequency alert patterns
- Deliver security awareness training and produce management-level reporting on current security posture, vulnerabilities and remediation progress

University of the Arts, London (UAL)

March 2022 - March 2025

Cyber Security Analyst, Cyber Security and Identity

- Deployed and managed Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI) and Microsoft 365 (M365) Defender across an 8,000-user estate, from initial rollout through ongoing policy tuning and alert management
- Performed structured threat hunting using CrowdStrike Falcon Insight, KQL in Microsoft Sentinel and Splunk SPL, proactively identifying attacker behaviour ahead of automated alerting
- Administered Mimecast email security policies, managing filtering rules, anti-phishing controls and investigating email-borne security incidents
- Managed Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, MFA and SSO policies, ensuring consistent identity security controls across all user populations
- Conducted vulnerability assessments using Tenable.io and Nessus, tracking findings through risk-prioritised remediation and reporting against defined risk appetite
- Maintained BeyondTrust PAM configurations and Microsoft Intune MDM/MAM device management policies, ensuring endpoint compliance and privileged access governance
- Supported Cyber Essentials Plus accreditation and contributed to ISO 27001 compliance programme, including policy documentation and technical evidence gathering
- Performed log analysis, endpoint forensics and post-incident reporting aligned to NIST 800-61 incident handling procedures
- Developed KQL-based detection rules and analytic queries in Microsoft Sentinel to improve alert fidelity and reduce false positive rates

HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Supported endpoint security operations, network security configuration and cloud security posture management across HICX's Software as a Service (SaaS) and Financial Technology (FinTech) platform
- Administered MFA and SSO integrations for internal and customer-facing systems, reducing unauthorised access risk
- Performed vulnerability assessments, security patching and infrastructure hardening across server and cloud environments
- Contributed to security quality assurance processes and maintained infrastructure security documentation and change records
- Supported network security monitoring and incident investigation activities, escalating findings through appropriate channels

KEY ACHIEVEMENTS

- Deployed and managed CrowdStrike Falcon EDR across the enterprise estate, engineering MITRE ATT&CK-aligned detections that materially reduced dwell time and improved visibility across endpoint and cloud attack surfaces
- Led the Microsoft Defender (MDE, MDI, M365) deployment across 8,000 users, delivering full endpoint and identity protection coverage with measurably improved detection and response capability

- Built SOAR automation playbooks using PowerShell to orchestrate alert triage and response workflows, reducing mean time to respond (MTTR) across critical and high-severity security events
- Delivered continuous vulnerability management using Pentera BAS, Tenable.io and AppCheck, identifying and driving remediation of critical and high-severity weaknesses across the network and endpoint estate
- Achieved and maintained Cyber Essentials Plus accreditation, demonstrating rigorous control over endpoint security, network access management and patch management standards

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
