

PROSPER AWUNI

Senior Cyber Security Engineer | SIEM, EDR and Security Operations

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience implementing and maintaining robust security across complex hybrid environments. I specialise in Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR), Endpoint Detection and Response (EDR) including CrowdStrike Falcon, and the full spectrum of security operations covering alert triage, incident response, vulnerability management and penetration test remediation. I have deep experience managing identity and access technologies including Microsoft Entra ID (formerly Azure Active Directory), Multi-Factor Authentication (MFA), Single Sign-On (SSO), Mobile Device Management (MDM), Mobile Application Management (MAM) via Microsoft Intune, and Privileged Access Management (PAM) via BeyondTrust. I am equally comfortable owning email and web security gateways such as Mimecast, driving security awareness training, and contributing to ad-hoc infrastructure hardening projects - making me well suited to join a focused security team in a demanding financial services environment.

CORE SKILLS AND TECHNICAL STACK

- **EDR / XDR:** CrowdStrike Falcon (NG-SIEM, Prevent, Insight, Discover, OverWatch) - Expert level
- **SIEM / SOAR:** Microsoft Sentinel with Kusto Query Language (KQL), CrowdStrike NG-SIEM, Splunk - detection engineering, alert triage, playbook automation
- **Firewalls and Network Security:** Check Point Harmony, WAF/DDoS protection, IDS/IPS, network segmentation
- **Email and Web Security:** Mimecast, web security gateways
- **Identity and Access Management:** Microsoft Entra ID (Azure Active Directory), Conditional Access, MFA, SSO, Group Policy, Privileged Access Management (PAM) via BeyondTrust
- **MDM / MAM:** Microsoft Intune, Mobile Device Management (MDM), Mobile Application Management (MAM)
- **Vulnerability Management:** Pentra Breach and Attack Simulation (BAS), Tenable.io, AppCheck, Nessus
- **Incident Response:** NIST 800-61 and MITRE ATT&CK framework - full incident lifecycle management
- **Threat Hunting:** Proactive threat hunting across endpoint and network telemetry using CrowdStrike Falcon and KQL
- **Security Certifications:** CISSP, CompTIA Security+, Microsoft Certified Solutions Associate (MCSA), CompTIA A+
- **Scripting and Automation:** PowerShell scripting, SOAR automation and playbook development
- **Compliance and Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials+, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer - University of the Arts London (UAL) March 2025 - Present

- Own day-to-day security operations for an organisation of over 8,000 users, managing SIEM/SOAR alert triage, EDR alert response and end-to-end incident response under the NIST 800-61 framework
- Administer CrowdStrike Falcon across Prevent, Insight, Discover and NG-SIEM modules; tune detection policies, investigate host-level threats and produce post-incident reports for senior stakeholders
- Manage Microsoft Sentinel and author KQL detection rules, workbooks and automation playbooks to reduce mean time to detect (MTTD) and mean time to respond (MTTR) across the organisation
- Operate Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI) and Microsoft 365 Defender to provide unified XDR coverage across endpoints, identities and cloud workloads

- Manage Mimecast email security gateway, including policy configuration, phishing response and secure email routing for the organisation's entire user base
- Administer Microsoft Intune for MDM/MAM, enforcing device compliance policies and Conditional Access controls across managed and unmanaged endpoints
- Oversee Privileged Access Management (PAM) using BeyondTrust, controlling access to critical systems and reducing the blast radius of potential account compromise
- Manage MFA, SSO and Conditional Access policies through Microsoft Entra ID to enforce Zero Trust principles organisation-wide
- Lead vulnerability management using Tenable.io, AppCheck and Nessus; track remediation of penetration test findings and provide risk-rated reporting to the infrastructure and IT leadership teams
- Conduct proactive threat hunting using CrowdStrike telemetry and KQL-based queries against SIEM logs, mapping findings to MITRE ATT&CK techniques
- Deliver security awareness training campaigns and phishing simulation exercises to reduce the organisation's human risk surface

Cyber Security Analyst, Cyber Security and Identity - University of the Arts London (UAL)

March 2022 - March 2025

- Monitored SIEM/SOAR platforms for security alerts, triaged incidents and escalated critical events in line with the organisation's incident response playbooks
- Supported CrowdStrike Falcon deployment and tuning across the estate, contributing to the reduction of false positives and improvement of detection coverage
- Managed Microsoft Entra ID (Azure Active Directory), Conditional Access policies, MFA enrolment and SSO integrations for the organisation's identity estate
- Carried out regular vulnerability scans using Tenable.io and Nessus, tracking findings against the organisation's risk register and coordinating remediation with infrastructure teams
- Administered Mimecast email security, responding to phishing incidents and tuning policies to block malicious content and data exfiltration attempts
- Supported BeyondTrust PAM administration, managing privileged account governance and access review processes
- Contributed to ISO 27001 and Cyber Essentials+ compliance activities, providing evidence and supporting internal and external audit processes
- Assisted with MDM/MAM policy management via Intune, ensuring mobile device compliance across the organisation

IT Engineer: Security, Quality and Infrastructure - HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

- Implemented and maintained security controls across a SaaS/FinTech environment, supporting the organisation's security posture, risk management and compliance activities
- Managed firewall and network security configurations, endpoint protection platforms and identity and access management tooling
- Performed vulnerability assessments and supported remediation activities, contributing to the organisation's vulnerability management programme
- Supported incident response activities, including alert triage, investigation and stakeholder communication
- Managed infrastructure quality assurance processes and contributed to system hardening and security architecture reviews

KEY ACHIEVEMENTS

- Led the deployment and optimisation of CrowdStrike Falcon across an 8,000+ user estate, achieving full EDR coverage and significantly reducing mean time to detect advanced threats
- Designed and implemented Microsoft Sentinel KQL detection rules that reduced alert noise by prioritising high-fidelity signals, improving the security operations team's response efficiency
- Deployed and managed BeyondTrust PAM across the organisation, enforcing least-privilege access controls and reducing the risk of privileged account misuse
- Led incident response for multiple high-severity security events, containing and remediating threats with minimal business disruption and producing board-level post-incident reports

- Drove vulnerability management programme using Tenable.io and Pentera BAS, achieving measurable reduction in the organisation's exploitable attack surface through risk-prioritised remediation
- Implemented SOAR automation playbooks that reduced manual alert handling time and improved consistency of response across common threat scenarios
- Managed Mimecast email security for 8,000+ users, responding to phishing campaigns and tuning policies to block emerging threats

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
