

PROSPER AWUNI

Senior Security Engineer | CISSP | SIEM | EDR | PAM | Vulnerability Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) with over five years of hands-on experience as a senior security engineer, implementing, configuring, and continuously evolving enterprise-grade security technology portfolios across complex hybrid IT environments. I have deep practical expertise managing Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, Endpoint Detection and Response (EDR) solutions, Web Application Firewall (WAF) and email security gateways, Privileged Access Management (PAM), Multi-Factor Authentication (MFA), Single Sign-On (SSO), Intrusion Detection and Prevention Systems (IDS/IPS), and Data Loss Prevention (DLP) tooling. I am experienced in conducting risk assessments, vulnerability scanning, and penetration testing remediation, and I am skilled at monitoring security infrastructure to detect, investigate, and respond to threats. I communicate effectively with both technical teams and senior stakeholders and have a proven track record of driving measurable security improvements across large, complex environments.

CORE SKILLS AND TECHNICAL STACK

- **SIEM and SOAR:** Microsoft Sentinel (KQL, analytics rules, playbooks, Logic Apps), CrowdStrike Falcon Next-Generation SIEM (NG-SIEM), Splunk (Security Processing Language - SPL)
- **EDR and XDR:** CrowdStrike Falcon (Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE), Microsoft Defender Extended Detection and Response (XDR), enterprise deployment across 8,000 users
- **PAM and Identity:** BeyondTrust PAM, Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, MFA, SSO, Privileged Identity Management (PIM)
- **Vulnerability Management:** Tenable.io, Nessus, Pentera Breach and Attack Simulation (BAS), AppCheck; risk assessment and remediation tracking
- **Email, Web and Network Security:** Mimecast email security gateway, Check Point Harmony firewall, IDS/IPS, DDoS mitigation, network segmentation
- **Incident Response:** NIST 800-61 incident response lifecycle, MITRE ATT&CK framework, threat hunting, digital forensics, SOC operations
- **Endpoint and Device Management:** Tanium, Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM)
- **Security Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK
- **Scripting and Automation:** PowerShell scripting, API integrations, SOAR playbook development

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) | Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Implement, configure, and evolve a broad enterprise security technology portfolio encompassing SIEM (Microsoft Sentinel and CrowdStrike NG-SIEM), EDR (CrowdStrike Falcon and Microsoft Defender for Endpoint), PAM (BeyondTrust), MFA, SSO, and email security (Mimecast).
- Monitor security infrastructure continuously using Microsoft Sentinel and CrowdStrike Falcon to detect and respond to potential threats across an 8,000-user environment; act as the escalation point for complex security events.
- Conduct regular risk assessments and vulnerability scans using Tenable.io and Pentera BAS; coordinate with infrastructure and application teams to prioritise and track remediation of identified vulnerabilities.
- Lead security incident response in accordance with NIST 800-61, managing containment, eradication, recovery, and lessons-learned activities, and delivering timely communications to senior stakeholders.
- Implement preventative security measures including Conditional Access policies, Entra ID hardening, endpoint prevention rules, and network segmentation to reduce the attack surface.

- Design and deliver security awareness training and cross-functional engagement to ensure security policies are understood and adhered to across all departments.
- Perform threat-hunting operations using CrowdStrike Falcon Insight and KQL-based Microsoft Sentinel queries to proactively identify advanced threats and reduce adversary dwell time.

University of the Arts, London (UAL) | Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Deployed and managed the Microsoft Sentinel SIEM platform, including data connector configuration, analytics rule development, and playbook automation to improve detection and response capability.
- Managed BeyondTrust PAM to enforce least-privilege access controls and audit privileged account activity across on-premises and cloud environments.
- Administered Microsoft Entra ID and Conditional Access, ensuring MFA and SSO were enforced for all user populations including third-party and privileged accounts.
- Managed Mimecast email security gateway policies, investigating email-based threats and tuning filtering rules to minimise both false positives and missed detections.
- Conducted penetration testing support and remediation using Pentera BAS, AppCheck, and Tenable.io, producing risk-ranked findings reports and tracking remediation to closure.
- Onboarded and managed CrowdStrike Falcon EDR across the enterprise endpoint estate; configured prevention policies and conducted Falcon Insight threat-hunting exercises.
- Maintained compliance alignment with ISO 27001, Cyber Essentials Plus, NIST CSF, and CIS Controls; produced audit evidence and participated in external certification assessments.
- Managed Tanium and Intune MDM/MAM for endpoint visibility and mobile device policy enforcement across the organisation.

HICX Solutions Ltd (Software as a Service / FinTech) | IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Implemented and maintained security controls across the SaaS and cloud infrastructure, including firewall policy management using Check Point Harmony, network segmentation, and endpoint security tooling.
- Administered Mimecast email security to reduce phishing and malware delivery risk, performing regular log review and threat investigation.
- Managed Azure Active Directory identities, MFA, SSO, and Conditional Access policies for cloud-based SaaS applications used by a globally distributed workforce.
- Conducted vulnerability scans, risk assessments, and remediation tracking, reporting findings to management with clear prioritisation and remediation guidance.
- Contributed to ISO 27001 compliance activities, internal security audits, and process documentation to support annual certification renewal.

KEY ACHIEVEMENTS

- Led the full lifecycle deployment of Microsoft Defender XDR across an 8,000-user enterprise environment, achieving comprehensive endpoint, identity, and email threat detection and response coverage.
- Implemented BeyondTrust PAM solution organisation-wide, eliminating shared administrator credentials and achieving full audit trail compliance for all privileged access sessions.
- Automated security alert triage and incident response workflows using Microsoft Sentinel SOAR playbooks, reducing analyst workload and mean time to respond significantly.
- Identified and remediated critical vulnerabilities across the infrastructure using Pentera BAS and Tenable.io, reducing the organisation's exposure to ransomware and lateral movement attacks.
- Achieved and maintained Cyber Essentials Plus certification, implementing and documenting all required technical controls across the IT estate.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)

- CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
