

PROSPER AWUNI

Senior Cyber Security Engineer

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniproper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of hands-on experience managing enterprise security operations, endpoint detection and response (EDR), Security Information and Event Management (SIEM), Security Orchestration, Automation and Response (SOAR), privileged access management (PAM), and vulnerability management across complex hybrid environments. I hold deep expertise in CrowdStrike Falcon across Prevent, EDR, Insight, and Discover modules, and I manage a broad security technology stack that includes Mimecast email security, Microsoft Defender for Endpoint (MDE), Microsoft Entra ID (formerly Azure Active Directory), BeyondTrust PAM, Tenable.io vulnerability scanning, and Microsoft Intune mobile device management (MDM). I hold the Certified Information Systems Security Professional (CISSP) certification and have a proven track record of implementing and hardening security controls at scale, driving vulnerability remediation, delivering security awareness training, and managing incidents end to end in line with the NIST 800-61 framework.

CORE SKILLS AND TECHNICAL STACK

- **EDR/XDR:** CrowdStrike Falcon (Prevent, EDR, Insight, Discover, Next-Generation SIEM (NG-SIEM)), Microsoft Defender for Endpoint (MDE), Tanium
- **SIEM/SOAR:** Microsoft Sentinel, Kusto Query Language (KQL), SOAR playbook development, alert triage automation
- **Email and Web Security:** Mimecast (anti-phishing, anti-spoofing, Data Loss Prevention (DLP), safe links), Web Application Firewall (WAF)
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentera Breach and Attack Simulation (BAS)
- **Identity and Access:** Microsoft Entra ID, Azure Active Directory (Azure AD), Conditional Access, Multi-factor Authentication (MFA), Single Sign-On (SSO), Privileged Identity Management (PIM)
- **Privileged Access Management (PAM):** BeyondTrust PAM (password vaulting, session management, least-privilege enforcement)
- **Endpoint Management:** Microsoft Intune, MDM, Mobile Application Management (MAM)
- **Network Security:** Check Point Harmony firewall, Intrusion Detection and Prevention System (IDS/IPS), distributed denial of service (DDoS) protection
- **Microsoft Security:** Microsoft Defender for Identity (MDI), Microsoft 365 (M365) Defender
- **Automation:** PowerShell scripting, SOAR automation workflows
- **Incident Response:** NIST 800-61, MITRE ATT&CK framework
- **Compliance Frameworks:** ISO 27001, CIS Controls, NIST Cybersecurity Framework (CSF), Cyber Essentials Plus (CE+)

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

Senior Cyber Security Analyst / Engineer

March 2025 - Present

- Own and administer the CrowdStrike Falcon platform (Prevent, EDR, Insight, and Discover) for a 10,000+ user estate, managing detection policy tuning, alert triage, proactive threat containment, and automated response
- Manage SIEM and SOAR operations using Microsoft Sentinel, developing KQL detection rules and automated incident response playbooks to reduce mean time to respond (MTTR)
- Administer Mimecast email security gateway, configuring anti-phishing, anti-spoofing, safe links, and DLP controls to protect inbound and outbound communications across the estate
- Administer BeyondTrust PAM, including password vaulting, session recording, and least-privilege access enforcement across all privileged accounts

- Lead the vulnerability management programme using Tenable.io, AppCheck, Nessus, and Pentera BAS, triaging findings from penetration tests and driving remediation to closure
- Manage Microsoft Entra ID, Conditional Access policies, MFA, and SSO, enforcing Zero Trust identity principles across a hybrid Azure and on-premises environment
- Administer Microsoft Intune MDM and MAM for a mixed Windows, iOS, and Android estate, enforcing security baselines and device compliance policies
- Maintain and configure Check Point Harmony firewall, IDS/IPS, and WAF rules, conducting periodic rule-base reviews and decommissioning legacy access
- Deliver security awareness training to 10,000+ staff, achieving measurable reductions in phishing simulation click rates
- Manage security incidents end to end in line with the NIST 800-61 incident response framework, coordinating cross-functional stakeholders from detection through post-incident review
- Remediate penetration test findings and contribute to ad hoc security improvement projects across the IT infrastructure

University of the Arts, London (UAL)

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Led the deployment of MDE across 8,000 users, establishing detection baselines, automated remediation actions, and alert suppression policies
- Performed daily alert triage and incident investigation across SIEM and EDR platforms, escalating high-severity incidents in line with response procedures
- Administered Microsoft Entra ID and Azure AD, including Conditional Access policy reviews, role-based access control (RBAC) audits, and PIM assignments
- Administered BeyondTrust PAM, supporting least-privilege access reviews and maintaining privileged account governance
- Conducted vulnerability assessments using Tenable.io and Nessus, producing risk-ranked remediation reports for infrastructure, application, and cloud workloads
- Managed Mimecast anti-phishing and email security configurations, responding to malicious email incidents and maintaining policy hygiene
- Administered Microsoft Intune MDM/MAM policies, ensuring endpoint compliance across the organisation
- Developed PowerShell scripts to automate repetitive security administration tasks, reducing manual effort within the security operations function
- Contributed to ISO 27001 and CE+ compliance activities, including evidence gathering, gap assessments, and control reviews

HICX Solutions Ltd (SaaS/FinTech)

IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Administered CrowdStrike Falcon EDR and endpoint security controls across a cloud-hosted SaaS and FinTech environment, monitoring for threat indicators and managing incident response actions
- Configured and maintained firewall rules, network segmentation, and perimeter security controls for a cloud-hosted platform
- Managed vulnerability scanning using Nessus, prioritising remediation of critical and high-severity findings in collaboration with development and infrastructure teams
- Administered identity and access management controls including MFA, SSO, and group policy, enforcing least-privilege access principles across the organisation
- Contributed to security quality assurance processes, reviewing change controls for security impact and supporting policy and process documentation

KEY ACHIEVEMENTS

- Deployed CrowdStrike Falcon (Prevent, EDR, Insight, and Discover) enterprise-wide for a 10,000+ user estate, reducing mean time to detect (MTTD) by over 40% through optimised detection policies and proactive tuning
- Led the MDE rollout to 8,000 users with zero service disruption, delivering full EDR coverage, automated remediation, and real-time alert management

- Implemented BeyondTrust PAM across all privileged accounts, eliminating uncontrolled standing access and supporting Cyber Essentials Plus certification
- Reduced phishing susceptibility by over 60% through a restructured security awareness training programme incorporating targeted simulation campaigns
- Automated 12 key incident response workflows via SOAR playbooks, cutting MTTR by 35% and enabling consistent response at scale

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
