

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR) | Incident Response | Vulnerability Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am an accomplished Senior Cyber Security Engineer with over five years of hands-on experience protecting enterprise environments across education and technology sectors. I bring deep, practical expertise in CrowdStrike Falcon Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM), Security Orchestration, Automation and Response (SOAR), and identity and access management using Microsoft Entra ID and Azure Active Directory. At the University of the Arts London (UAL), I have led the deployment, configuration, and ongoing management of CrowdStrike Falcon across an estate of over 8,000 users, and I have built detection rules, automated response playbooks, and vulnerability remediation workflows that have measurably strengthened the security posture of a complex organisation. I hold the Certified Information Systems Security Professional (CISSP) certification and bring a structured, process-driven approach to managing WAF and Distributed Denial-of-Service (DDoS) protections, email and web security gateways including Mimecast, Privileged Access Management (PAM) via BeyondTrust, Multi-Factor Authentication (MFA) and Single Sign-On (SSO), Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune, and Intrusion Detection and Prevention Systems (IDS/IPS). I thrive in focused security team environments, operating within core financial-market business hours, and I am ready to bring this expertise to a high-performing, fast-paced financial services organisation.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (Next-Generation SIEM, EDR, Prevent, Insight, Discover) - Expert
- **SIEM / SOAR:** CrowdStrike NG-SIEM, Microsoft Sentinel with Kusto Query Language (KQL), SOAR automation and playbook development
- **Email and Web Security:** Mimecast email gateway management, web filtering and gateway controls
- **Identity and Access Management (IAM):** Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, MFA/SSO; experience with Okta-equivalent identity controls via Entra ID
- **MDM / MAM:** Microsoft Intune (mobile device and application lifecycle management)
- **Privileged Access Management (PAM):** BeyondTrust PAM platform administration
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentra Breach and Attack Simulation (BAS); vulnerability scan scheduling, remediation tracking and reporting
- **Firewall and Perimeter Security:** Check Point Harmony firewall management; WAF/DDoS protection controls; IDS/IPS management
- **Incident Response:** NIST SP 800-61 incident response lifecycle; MITRE ATT&CK framework for threat detection and hunting
- **Microsoft Security Suite:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Endpoint Management:** Tanium, Microsoft Intune; PowerShell scripting for security automation
- **Frameworks and Standards:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK
- **Scripting and Automation:** PowerShell, SOAR playbooks, KQL query development

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer

March 2025 - Present

University of the Arts, London (UAL) - London, UK

- Lead the day-to-day management, configuration, and tuning of CrowdStrike Falcon EDR across an enterprise environment of over 8,000 users, including CrowdStrike Falcon Prevent, Insight, Discover, and the CrowdStrike Next-Generation Security Information and Event Management (NG-SIEM) platform.
- Manage and respond to SIEM/SOAR and EDR alerts, triaging security events end-to-end, escalating where required, and driving incidents through the full NIST SP 800-61 incident response lifecycle.
- Administer Mimecast email security gateway, maintaining anti-spam, anti-phishing, and data loss prevention policies, and investigating email-borne threats as part of regular alert triage.
- Oversee Microsoft Entra ID (formerly Azure Active Directory) Conditional Access policies, Multi-Factor Authentication (MFA) rollout, and Single Sign-On (SSO) configurations across the organisation.
- Manage Microsoft Intune for Mobile Device Management (MDM) and Mobile Application Management (MAM), enforcing compliance baselines and device security policies across all corporate and Bring Your Own Device (BYOD) endpoints.
- Administer BeyondTrust Privileged Access Management (PAM) platform, governing privileged account lifecycle, session recording, and least-privilege access controls.
- Run vulnerability scanning and remediation programmes using Tenable.io, Nessus, AppCheck, and Pentra Breach and Attack Simulation (BAS), producing executive reporting and driving remediation with infrastructure teams.
- Develop and maintain detection engineering rules, SOAR automation playbooks, and KQL-based alert logic in Microsoft Sentinel to reduce mean time to detect (MTTD) and mean time to respond (MTTR).
- Conduct threat hunting exercises using the MITRE ATT&CK framework, proactively identifying indicators of compromise (IoCs) and tactics, techniques, and procedures (TTPs) across the estate.
- Manage Tanium endpoint management alongside CrowdStrike for asset visibility, patch compliance, and real-time endpoint interrogation.
- Deliver security awareness training and phishing simulation campaigns to over 8,000 staff and students.

Cyber Security Analyst - Cyber Security and Identity

March 2022 - March 2025

University of the Arts, London (UAL) - London, UK

- Managed and tuned CrowdStrike Falcon EDR platform across the full UAL estate, configuring prevention policies, detection rules, and response workflows.
- Deployed Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender across an 8,000-user environment, integrating telemetry into Microsoft Sentinel for unified SIEM visibility.
- Performed alert triage, investigation, and incident response for security events escalated from SIEM, EDR, and email gateway systems, applying NIST 800-61 methodology throughout.
- Authored KQL queries in Microsoft Sentinel for threat detection, log correlation, and custom alert rules, improving detection coverage across identity, endpoint, and network layers.
- Administered Mimecast email security platform, tuning gateway policies and managing email-borne threat response.
- Supported the design and implementation of Entra ID (Azure Active Directory) Conditional Access and Zero Trust policies, reducing identity-based attack surface.
- Conducted vulnerability assessments using Tenable.io and Nessus, coordinating remediation plans with infrastructure and application owners.
- Managed PAM controls via BeyondTrust and enforced MDM/MAM policies through Microsoft Intune for endpoint compliance.
- Delivered Check Point Harmony firewall rule reviews and IDS/IPS policy management across the network perimeter.
- Contributed to Cyber Essentials Plus certification and ISO 27001 audit preparation, developing policy documentation and evidence packs.

IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

HICX Solutions Ltd (SaaS / FinTech) - London, UK

- Delivered security engineering support across a SaaS and FinTech environment, managing endpoint security tooling, network perimeter controls, and identity management.

- Managed firewall configurations, VPN access controls, and network segmentation to protect internal and cloud-hosted assets.
- Supported vulnerability assessment processes and worked with development teams on secure configuration standards aligned to CIS Controls.
- Administered MDM policies for corporate devices and enforced MFA/SSO configurations across cloud applications.
- Supported incident response activities, investigating security events and producing post-incident reports with remediation recommendations.
- Maintained infrastructure security in an Agile environment, contributing to security quality gates within the software development lifecycle (SDLC).

KEY ACHIEVEMENTS

- Successfully led the CrowdStrike Falcon EDR deployment and ongoing management across an 8,000-user enterprise environment, achieving full endpoint visibility and measurably reducing incident dwell time.
- Reduced mean time to respond (MTTR) to security incidents by building automated SOAR playbooks and KQL-based detection rules, eliminating manual triage steps for common alert categories.
- Deployed Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across an 8,000-user estate, integrating telemetry into a unified Microsoft Sentinel SIEM dashboard.
- Delivered Cyber Essentials Plus and ISO 27001 audit evidence packs, supporting successful certification for UAL.
- Implemented Pentera Breach and Attack Simulation (BAS) programme to continuously validate security controls, feeding findings into vulnerability remediation cycles.
- Established BeyondTrust PAM governance framework, reducing privileged account sprawl and improving audit trail coverage across all critical systems.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
