

PROSPER AWUNI

Cyber Security Engineer | CrowdStrike EDR & SIEM/SOAR | Endpoint Detection & Response | Identity & Access Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Cyber Security Engineer with over five years of experience protecting complex enterprise environments across higher education and financial technology sectors. I specialise in managing Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, overseeing Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR) alert triage, and administering email and web security gateways including Mimecast. At the University of the Arts London (UAL), I have led the engineering and operational management of CrowdStrike Falcon across its full suite including Next-Generation SIEM (NG-SIEM), EDR, Falcon Prevent, Insight and Discover, while also deploying Microsoft Defender for Endpoint (MDE) to over 8,000 users. I have strong hands-on expertise in Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), Mobile Device Management (MDM), Mobile Application Management (MAM) via Intune, and vulnerability scanning programmes using Tenable.io, Nessus and AppCheck. I am seeking a senior engineering role within a global asset management or financial services environment where I can apply my detection engineering, incident response and platform administration expertise in a hybrid setting.

CORE SKILLS AND TECHNICAL STACK

- **SIEM/SOAR:** CrowdStrike Falcon NG-SIEM (LogScale), Microsoft Sentinel with Kusto Query Language (KQL), Splunk/SPL; SOAR playbook development and alert automation
- **EDR/XDR:** CrowdStrike Falcon EDR, Falcon Prevent, Falcon Insight, Falcon Discover; Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender (M365)
- **Email and Web Security Gateways:** Mimecast email security administration and policy management
- **Identity and Access Management:** Microsoft Entra ID, Azure Active Directory (Azure AD), Conditional Access policies, MFA, SSO; BeyondTrust Privileged Access Management (PAM)
- **Endpoint and Device Management:** Microsoft Intune MDM/MAM, Group Policy; Tanium
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Firewalls and Network Security:** Check Point Harmony; experience evaluating Palo Alto and perimeter security architectures
- **Incident Response:** NIST 800-61 framework; MITRE ATT&CK-aligned detection and response; evidence collection and forensic triage
- **Scripting and Automation:** PowerShell scripting for security automation and SOAR integration
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) — Senior Cyber Security Analyst / Engineer *March 2025 – Present*

- Lead the engineering, configuration and operational management of the CrowdStrike Falcon platform (NG-SIEM, EDR, Prevent, Insight, Discover) across a multi-site higher education environment.
- Oversee SIEM/SOAR platforms including CrowdStrike Falcon NG-SIEM and Microsoft Sentinel; develop KQL-based detection rules, correlation alerts and automated SOAR playbooks to reduce mean time to detect and respond.
- Manage EDR/XDR alert triage and response workflows, investigating and containing endpoint threats using CrowdStrike Falcon and Microsoft Defender for Endpoint.
- Administer Mimecast email security gateway including anti-phishing, anti-spoofing and Data Loss Prevention (DLP) policies for a user base of over 8,000.

- Engineer and maintain Entra ID Conditional Access policies, MFA rollouts and SSO integrations to enforce zero-trust identity controls.
- Oversee MDM/MAM deployment through Microsoft Intune, managing endpoint compliance policies across corporate and bring-your-own-device (BYOD) fleets.
- Conduct vulnerability scanning and risk prioritisation using Tenable.io, Nessus and Pentera BAS; present findings and remediation plans to senior stakeholders.
- Lead incident response activities aligned to NIST 800-61, coordinating cross-functional response teams and producing post-incident reports.
- Administer BeyondTrust PAM to control privileged account access, audit privileged sessions and enforce least-privilege principles.

University of the Arts, London (UAL) — Cyber Security Analyst, Cyber Security and Identity

March 2022 – March 2025

- Administered and tuned Microsoft Sentinel SIEM, building KQL analytics rules and hunting queries to detect insider threats, credential abuse and lateral movement.
- Monitored and responded to EDR/XDR alerts from CrowdStrike Falcon and Microsoft Defender for Endpoint, performing root-cause analysis and containment actions.
- Managed Mimecast email security gateway policies; investigated phishing campaigns and coordinated takedown requests.
- Supported the deployment of Microsoft Defender for Identity (MDI) and Microsoft 365 Defender, aligning detection coverage to MITRE ATT&CK techniques.
- Performed regular vulnerability assessments using Tenable.io and AppCheck; tracked remediation progress against agreed service level agreements.
- Configured and maintained Entra ID Conditional Access and Azure AD identity governance controls.
- Contributed to ISO 27001 and Cyber Essentials Plus accreditation activities, including risk register updates and control evidence gathering.

HICX Solutions Ltd (SaaS/FinTech) — IT Engineer: Security, Quality and Infrastructure

February 2021 – March 2022

- Administered cloud and on-premises security tools including endpoint protection, email security gateways and identity management platforms within a SaaS/FinTech environment.
- Managed MFA, SSO and access control policies for internal and customer-facing systems.
- Supported vulnerability management and patch management programmes, coordinating remediation with development and infrastructure teams.
- Assisted with security incident triage, contributing to root-cause analysis and lessons-learned documentation.
- Maintained security documentation and supported compliance activities aligned to ISO 27001.

KEY ACHIEVEMENTS

- Deployed Microsoft Defender for Endpoint (MDE) to over 8,000 users at UAL, achieving full endpoint telemetry coverage and reducing the mean time to detect (MTTD) for endpoint threats by over 40%.
- Engineered and operationalised CrowdStrike Falcon NG-SIEM, consolidating log ingestion and alert correlation across multiple data sources and enabling automated SOAR-driven response playbooks.
- Designed and implemented an Entra ID Conditional Access policy framework enforcing risk-based MFA and device compliance checks, eliminating a category of credential-based attacks.
- Led a Pentera Breach and Attack Simulation (BAS) programme that identified and remediated critical attack paths across the network perimeter and identity plane.
- Reduced alert fatigue by 30% through detection rule refinement and SOAR automation, freeing analyst capacity for proactive threat hunting.
- Achieved and maintained Cyber Essentials Plus accreditation for UAL, demonstrating a robust security baseline across endpoint, network and identity controls.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
