

PROSPER AWUNI

Cyber Security Threat Hunter | Threat Intelligence | MITRE ATT&CK | CrowdStrike Falcon | SIEM Analytics

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Cyber Security professional with over five years of experience in Security Operations Centre (SOC) and security engineering environments, with a strong focus on proactively identifying threat actors that have evaded traditional security defences. Throughout my career at the University of the Arts London (UAL), I have applied a threat-hunting mindset to continuously search for indicators of compromise, anomalous behaviours and attacker tactics, techniques and procedures (TTPs) across enterprise environments using CrowdStrike Falcon, Microsoft Sentinel and Kusto Query Language (KQL)-based analytics. I have deep knowledge of the MITRE ATT&CK Framework and the cyber kill chain, and I use this knowledge to hypothesise, design and execute structured hunting campaigns that uncover threats hiding in large datasets. My background in Breach and Attack Simulation (BAS) using Pentera, vulnerability management and detection engineering gives me a comprehensive understanding of how adversaries operate and where defenders must look. I am now seeking to bring this expertise to a dedicated threat hunting role within a specialist financial services organisation.

CORE SKILLS AND TECHNICAL STACK

- **Threat Hunting:** Hypothesis-driven hunting campaigns; proactive search for adversary TTPs evading traditional defences; structured hunting using the MITRE ATT&CK Framework and cyber kill chain
- **SIEM and Analytics:** CrowdStrike Falcon NG-SIEM (LogScale); Microsoft Sentinel with KQL; Splunk/SPL; large dataset analysis and anomaly detection; correlation rule engineering
- **Threat Intelligence:** Adversary TTP analysis; indicator of compromise (IoC) management; threat modelling and risk-based prioritisation; MITRE ATT&CK mapping
- **EDR/XDR:** CrowdStrike Falcon EDR, Falcon Prevent, Falcon Insight, Falcon Discover; Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender (M365)
- **Incident Response (IR):** NIST 800-61 IR framework; Security Orchestration, Automation and Response (SOAR) automation; containment, eradication and recovery; post-incident reporting
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck; Pentera Breach and Attack Simulation (BAS); attack surface identification and remediation tracking
- **Identity and Access Security:** Microsoft Entra ID, Azure Active Directory (Azure AD), Conditional Access, Multi-Factor Authentication (MFA), BeyondTrust Privileged Access Management (PAM)
- **Scripting and Automation:** PowerShell for hunting automation, log parsing and SOAR integration
- **Frameworks:** MITRE ATT&CK, NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) — Senior Cyber Security Analyst / Engineer *March 2025 – Present*

- Proactively hunt for threat actors that have evaded perimeter and signature-based defences, using CrowdStrike Falcon NG-SIEM, Microsoft Sentinel and KQL to analyse large datasets and surface hidden threats.
- Develop and execute structured threat hunting campaigns based on MITRE ATT&CK techniques, cyber kill chain stages and current threat intelligence, targeting adversary TTPs such as credential theft, lateral movement, defence evasion and data exfiltration.
- Design and maintain KQL hunting queries and detection rules in Microsoft Sentinel, continually refining coverage based on new intelligence and hunt findings.
- Leverage CrowdStrike Falcon EDR telemetry (Falcon Insight, Falcon Discover) to investigate suspicious behaviours, correlate endpoint activity with network and identity signals, and trace attacker activity across the kill chain.

- Conduct Pentera Breach and Attack Simulation (BAS) exercises to emulate adversary techniques and validate detection coverage, identifying gaps that feed directly into the hunting programme.
- Lead incident response for confirmed intrusions identified through hunting activities, applying the NIST 800-61 framework and coordinating with infrastructure and identity teams to contain and eradicate threats.
- Produce threat hunting reports and intelligence briefs for senior stakeholders, translating technical findings into actionable risk insights.
- Engineer SOAR playbooks to automate responses to hunt-validated detections, reducing mean time to respond (MTTR) for recurring threat patterns.

University of the Arts, London (UAL) — Cyber Security Analyst, Cyber Security and Identity

March 2022 – March 2025

- Performed continuous threat hunting and alert triage across CrowdStrike Falcon EDR and Microsoft Sentinel, proactively identifying indicators of compromise and anomalous behaviour in the environment.
- Authored KQL queries and Sentinel analytics rules to detect credential abuse, Business Email Compromise (BEC), insider threats and MITRE ATT&CK-mapped techniques across identity and endpoint telemetry.
- Investigated phishing campaigns and intrusion attempts; traced adversary activity across the cyber kill chain and produced detailed incident reports with MITRE ATT&CK technique mappings.
- Conducted vulnerability assessments with Tenable.io and AppCheck; correlated vulnerability data with threat intelligence to prioritise remediation of high-risk attack paths.
- Developed threat models for key business systems, applying knowledge of attacker TTPs and organisational risk appetite to guide detection investment.
- Supported the deployment of Microsoft Defender for Identity (MDI) to detect Active Directory-based attacks including pass-the-hash, pass-the-ticket and Kerberoasting.

HICX Solutions Ltd (SaaS/FinTech) — IT Engineer: Security, Quality and Infrastructure

February 2021 – March 2022

- Monitored security event logs and EDR telemetry for indicators of compromise, responding to alerts and escalating confirmed incidents in accordance with the IR process.
- Administered endpoint protection, identity management and vulnerability scanning tools within a SaaS/FinTech cloud environment.
- Conducted threat modelling exercises for new product features and infrastructure changes, mapping potential attack vectors to MITRE ATT&CK techniques.
- Supported incident response activities including forensic evidence collection, root-cause analysis and post-incident documentation.

KEY ACHIEVEMENTS

- Developed and executed a CrowdStrike Falcon NG-SIEM-based threat hunting programme that identified previously undetected persistence mechanisms across the UAL estate, leading to the remediation of multiple compromised accounts.
- Authored over 30 KQL hunting queries in Microsoft Sentinel, expanding detection coverage across MITRE ATT&CK tactics including initial access, persistence, lateral movement and exfiltration.
- Led a Pentera Breach and Attack Simulation (BAS) programme that validated detection coverage against emulated adversary techniques, identifying and closing critical detection gaps across the kill chain.
- Reduced mean time to detect (MTTD) by over 40% through systematic hunting query optimisation and SOAR-driven automated containment workflows.
- Produced a MITRE ATT&CK-aligned threat hunting playbook adopted as the standard operating procedure for the UAL security team, improving consistency and coverage of proactive hunting activities.
- Achieved and maintained Cyber Essentials Plus accreditation, demonstrating a robust security control baseline validated against common attacker TTPs.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
