

PROSPER AWUNI

Senior Microsoft Security Consultant / Architect | CISSP | Microsoft Defender XDR, Sentinel and Identity

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) with over five years of experience delivering Microsoft security solutions across endpoint, identity, cloud, compliance, and management domains. I hold deep expertise in the full Microsoft security portfolio, including Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender, Microsoft Sentinel, and Microsoft Entra ID (formerly Azure Active Directory), and have led the enterprise deployment and management of these solutions protecting over 8,000 users at the University of the Arts London (UAL). I have extensive experience designing and implementing comprehensive security architectures across on-premises and cloud environments, including Conditional Access policy frameworks, Privileged Access Management (PAM) using BeyondTrust, Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune, and identity governance controls. I am skilled at acting as a subject matter expert for Microsoft security, compliance, identity, and management, communicating complex security concepts clearly to stakeholders at all levels, from technical teams to senior leadership. I am now looking to bring this expertise into a senior consulting environment where I can deliver Microsoft security, compliance, identity, and management solutions to a diverse range of clients and contribute to a rapidly growing Microsoft Security Consultancy Practice.

CORE SKILLS AND TECHNICAL STACK

- **Microsoft Defender for Endpoint (MDE):** enterprise deployment, policy configuration, threat and vulnerability management, EDR investigation and tuning
- **Microsoft Defender for Identity (MDI):** identity threat detection, lateral movement detection, investigation and response
- **Microsoft 365 Defender:** unified Extended Detection and Response (XDR), cross-domain incident investigation and response
- **Microsoft Sentinel:** SIEM deployment, Kusto Query Language (KQL) analytics rules, log onboarding, SOAR automation, workbooks
- **Microsoft Entra ID (Azure AD):** Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), identity governance, Privileged Identity Management (PIM)
- **Microsoft Intune:** MDM, MAM, device compliance and configuration policy management
- **Microsoft 365 Compliance:** information protection, Data Loss Prevention (DLP), Microsoft Purview
- **CrowdStrike Falcon:** EDR, Prevent, NG-SIEM, Insight, Discover
- **Privileged Access Management (PAM):** BeyondTrust
- **Incident Response:** NIST 800-61 framework, MITRE ATT&CK threat model
- **Vulnerability Management:** Tenable.io, AppCheck, Pentra BAS, Nessus
- **Security Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK
- **Stakeholder Engagement:** translating technical Microsoft security capabilities into clear business risk language for senior leadership and governance audiences

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer

March 2025 - Present

University of the Arts London (UAL)

- Lead enterprise deployment and management of Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender across 8,000+ users, delivering comprehensive Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR) capabilities

- Architect and manage Microsoft Sentinel Security Information and Event Management (SIEM) deployment, integrating security telemetry from across the Microsoft security ecosystem and third-party tools including CrowdStrike Falcon, Mimecast, and network infrastructure
- Design and implement Microsoft Entra ID Conditional Access policies, Multi-Factor Authentication (MFA), and Single Sign-On (SSO) architecture for 8,000+ users, enforcing least-privilege identity security across the organisation
- Configure and administer Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM), enforcing security baselines and compliance policies across the enterprise device fleet
- Deliver security risk recommendations and Microsoft security roadmap briefings to senior leadership and governance committees, translating complex Microsoft security capabilities into clear business risk language
- Implement and manage BeyondTrust PAM to enforce least-privilege access controls and audit privileged account activity across administrative accounts
- Conduct incident response using Microsoft Defender and Microsoft Sentinel, applying the NIST 800-61 framework and MITRE ATT&CK model to investigate, contain, and remediate threats
- Manage Microsoft 365 compliance and information protection controls, including Data Loss Prevention (DLP) policies and Microsoft Purview configuration
- Lead vulnerability management using Tenable.io, AppCheck, Pentera Breach and Attack Simulation (BAS), and Nessus, and report findings against ISO 27001, NIST Cybersecurity Framework (CSF), CIS Controls, and Cyber Essentials Plus
- Administer CrowdStrike Falcon EDR, Prevent, Insight, and Discover alongside the Microsoft Defender suite, providing defence-in-depth across the endpoint estate
- Develop PowerShell automation scripts and SOAR playbooks to streamline Microsoft Sentinel alert triage, incident response, and reporting workflows

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

University of the Arts London (UAL)

- Supported the enterprise-scale deployment of Microsoft Defender for Endpoint (MDE) across 8,000+ users, configuring detection and response policies, onboarding endpoints, and tuning alert thresholds
- Administered Microsoft Entra ID (formerly Azure Active Directory), managing user identities, Conditional Access policies, MFA enforcement, and access reviews across the organisation
- Operated Microsoft Sentinel SIEM and CrowdStrike Falcon, conducting security monitoring, alert triage, and incident investigation aligned to the MITRE ATT&CK framework
- Implemented Microsoft Intune MDM and MAM policies for enterprise device management and compliance policy enforcement
- Supported the delivery of Microsoft 365 security and compliance controls, including information protection policies and Data Loss Prevention (DLP) configuration
- Conducted vulnerability assessments and tracked remediation activities, maintaining compliance with Cyber Essentials Plus and ISO 27001 requirements
- Developed and delivered security awareness training materials and phishing simulation campaigns across the organisation
- Participated in tabletop exercises and incident response simulations, applying NIST 800-61 and MITRE ATT&CK frameworks to test and improve response capability
- Produced security assurance reports and risk briefings for the information security leadership team, communicating technical findings in clear, business-focused language

IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

HICX Solutions Ltd (SaaS/FinTech)

- Implemented and maintained security controls across the SaaS and FinTech infrastructure, including endpoint security, network monitoring, and identity and access controls within a cloud-native environment
- Conducted security quality assurance activities, including vulnerability assessments and security configuration reviews

- Supported IT infrastructure provisioning, maintenance, and technical support, building a strong foundation in security engineering and Microsoft technology stack management
- Contributed to security policy documentation and supported compliance activities aligned to industry security standards

KEY ACHIEVEMENTS

- Led enterprise deployment of Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender across 8,000+ users, establishing comprehensive Extended Detection and Response (XDR) capabilities and full Microsoft security ecosystem coverage
- Architected and deployed Microsoft Sentinel SIEM, integrating telemetry from Microsoft Defender, CrowdStrike Falcon, Mimecast, and network infrastructure, providing a unified and comprehensive security operations view for the organisation
- Designed and implemented Microsoft Entra ID Conditional Access and Multi-Factor Authentication (MFA) architecture for 8,000+ users, materially reducing the identity attack surface and improving compliance with access control requirements
- Delivered security risk reporting and Microsoft security roadmap recommendations to senior leadership, enabling evidence-based investment decisions in security controls and capability improvements
- Implemented BeyondTrust PAM, establishing centralised privileged access governance and reducing the risk of credential-based attacks and insider threats
- Maintained compliance with Cyber Essentials Plus, ISO 27001, and NIST Cybersecurity Framework (CSF) standards, providing ongoing security assurance reporting across the organisation

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
