

PROSPER AWUNI

Senior Cyber Security Engineer | SIEM Engineering | Threat Intelligence | Cloud Security | SOC Operations

London, United Kingdom (Hybrid) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on expertise in Security Information and Event Management (SIEM) engineering, threat detection, incident response, and cloud security operations. I have a strong background in deploying and optimising SIEM platforms including Microsoft Sentinel and CrowdStrike Falcon Next-Generation SIEM (NG-SIEM), authoring advanced detection rules using Kusto Query Language (KQL), and leading Security Operations Centre (SOC) threat detection activities across complex enterprise environments. I have extensive experience with Cyber Threat Intelligence (CTI), MITRE ATT&CK-aligned detection engineering, Data Loss Prevention (DLP) solutions, firewall management, and cloud security platforms. I am skilled at monitoring security systems and logs for suspicious activity, managing and maintaining the full security tooling stack, and supporting incident response activities from detection through to recovery.

CORE SKILLS AND TECHNICAL STACK

- **SIEM Engineering:** Microsoft Sentinel (KQL), CrowdStrike Falcon NG-SIEM, Splunk (SPL), detection rule authoring, log analysis, alert tuning, data correlation, User Behaviour Analytics (UBA)
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon EDR/Prevent/Insight/Discover, Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Threat Intelligence:** CTI, MITRE ATT&CK framework, Indicators of Compromise (IOC) analysis, threat-led detection engineering
- **Security Operations:** SOC operations, incident response (NIST 800-61), threat hunting, alert triage, escalation management
- **Network and Cloud Security:** Check Point Harmony firewall, TCP/IP networking, cloud security (Azure), DLP solutions, Mimecast email security
- **Privileged Access Management (PAM) and Identity:** BeyondTrust PAM, Azure Active Directory (Azure AD)/Microsoft Entra ID, Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO)
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Security Orchestration, Automation, and Response (SOAR):** Playbook development, automated triage, PowerShell scripting
- **Frameworks:** NIST CSF, ISO 27001, CIS Controls, Cyber Essentials+, MITRE ATT&CK, NCSC CAF

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst/Engineer

March 2025 - Present

- Deploy, configure, and optimise Microsoft Sentinel SIEM and CrowdStrike Falcon NG-SIEM, developing and tuning detection rules across cloud, endpoint, and network data sources using KQL and MITRE ATT&CK-aligned detection engineering methodology.
- Monitor security systems and logs for suspicious activity across an 8,000-user enterprise environment, leveraging CTI, UBA, and threat-led detection logic to identify and prioritise advanced threats.
- Manage and maintain the full security tooling estate including CrowdStrike Falcon EDR, Microsoft Defender (MDE, MDI, M365 Defender), BeyondTrust PAM, Check Point Harmony firewall, DLP solutions, Mimecast email security, and Tanium.
- Lead incident response activities following NIST 800-61 methodology, managing the full lifecycle from detection through to eradication and lessons-learned review; develop and maintain IR playbooks and procedures.

- Conduct threat hunts aligned with MITRE ATT&CK framework and CTI feeds, converting findings into detection rules and platform tuning recommendations to continuously improve SIEM coverage.
- Manage cloud security posture across Azure, enforcing Conditional Access, MFA, and Zero Trust controls via Microsoft Entra ID; configure and review DLP policies to prevent data exfiltration.
- Develop SOAR playbooks to automate alert triage and accelerate incident response workflows, reducing mean time to respond (MTTR) and analyst workload.
- Oversee vulnerability management programme using Tenable.io, AppCheck, and Pentera BAS, tracking remediation and reporting risk posture to senior stakeholders.
- Maintain alignment with ISO 27001, NIST CSF, CIS Controls, and Cyber Essentials+ frameworks; contribute to policy development and control evidence gathering.

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Operated SIEM and EDR platforms daily, conducting alert triage, log analysis, data correlation, and investigation of security events; contributed to detection rule development and alert tuning.
- Supported incident response investigations from detection through to containment and recovery, assisting with evidence gathering and root cause analysis.
- Contributed to detection engineering improvements, developing new SIEM rules informed by emerging threat intelligence and MITRE ATT&CK gap analysis.
- Administered Azure AD Conditional Access, MFA, and DLP policies, supporting cloud security monitoring and identity security operations.
- Developed PowerShell automation scripts to streamline security operations workflows and reduce manual analyst effort.
- Contributed to ISO 27001 and Cyber Essentials+ compliance activities, gathering control evidence and assisting with audit preparation.

IT Engineer, Security, Quality and Infrastructure

February 2021 - March 2022

- Delivered security assessments and improvement initiatives across a Software as a Service (SaaS) and FinTech cloud infrastructure environment.
- Managed endpoint security tools, firewall configurations, and network security controls.
- Supported ISO 27001 and Cyber Essentials compliance programmes, contributing to audit preparation and evidence collection.
- Provided IT security and infrastructure engineering support across cloud and on-premises systems.

KEY ACHIEVEMENTS

- Implemented a comprehensive threat detection programme at UAL using Microsoft Sentinel and CrowdStrike Falcon NG-SIEM, authoring a library of MITRE ATT&CK-aligned KQL detection rules informed by CTI and active threat hunting, significantly reducing mean time to detect (MTTD).
- Deployed Microsoft Defender across an 8,000-user estate (MDE, MDI, M365 Defender), establishing full endpoint and identity telemetry coverage and enabling unified detection and response across the enterprise.
- Built SOAR-driven automated alert triage capability in Microsoft Sentinel, reducing manual analyst workload and improving MTTR across the SOC.
- Configured and maintained the Check Point Harmony firewall, DLP, and Mimecast email security platforms, reducing perimeter risk and improving data protection posture across the organisation.
- Achieved CISSP certification, demonstrating expert-level knowledge across all eight domains of information security, including SIEM engineering, cloud security, threat intelligence, and security operations.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)

- CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
