PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | Entra ID | MFA/SSO

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of hands-on experience securing enterprise environments using Security Information and Event Management (SIEM), Security Orchestration Automation and Response (SOAR), and Endpoint Detection and Response (EDR) platforms. In my current role at the University of the Arts London (UAL), I protect a digital estate of more than 8,000 users, leading on CrowdStrike Falcon EDR administration, Microsoft Sentinel detection engineering with Kusto Query Language (KQL), and Microsoft Defender for Endpoint (MDE) operations. I hold the Certified Information Systems Security Professional (CISSP) certification and bring deep expertise in multi-factor authentication (MFA) and single sign-on (SSO) governance via Azure Active Directory (Azure AD) and Microsoft Entra ID, Mimecast email security, Microsoft Intune Mobile Device Management (MDM), and vulnerability remediation using Tenable.io and AppCheck. I have a strong track record of delivering threat detection, alert triage, incident response under the National Institute of Standards and Technology (NIST) 800-61 framework, and penetration test finding remediation in a fast-paced enterprise environment, and I am looking to bring this experience to a global asset management environment.

CORE SKILLS AND TECHNICAL STACK

- **EDR and SIEM/SOAR:** CrowdStrike Falcon (EDR, Prevent, NG-SIEM, Insight, Discover), Microsoft Sentinel, Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI)
- **Identity and Access Management:** Azure Active Directory (Azure AD), Microsoft Entra ID, Conditional Access, MFA, SSO, BeyondTrust Privileged Access Management (PAM)
- **Email and Web Security:** Mimecast email gateway, anti-phishing, URL protection, attachment sandboxing
- **Endpoint and Device Management:** Microsoft Intune MDM, Mobile Application Management (MAM), Tanium
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentera Breach and Attack Simulation (BAS)
- **Network Security:** Check Point Harmony firewall, network segmentation, WAF/DDoS policy management
- **Detection and Automation:** KQL detection rule authoring, MITRE ATT&CK framework mapping, PowerShell scripting
- **Frameworks:** NIST Cybersecurity Framework (CSF), NIST 800-61, CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL) *March 2025 - Present*

Senior Cyber Security Analyst / Engineer

- Lead the administration and optimisation of CrowdStrike Falcon EDR across an estate of over 8,000 endpoints, configuring prevention policies, Falcon Insight threat hunting queries, and Falcon Discover asset visibility to reduce mean time to detect (MTTD) and mean time to respond (MTTR).
- Engineer and tune detection rules in Microsoft Sentinel SIEM using KQL, mapping alerts to MITRE ATT&CK techniques and integrating data connectors from Microsoft 365, Azure AD, and CrowdStrike for unified threat visibility.
- Manage SOAR automation workflows within Microsoft Sentinel, building playbooks that automate alert enrichment, user isolation, and ticket creation to reduce manual analyst effort.
- Administer Mimecast email security, configuring anti-phishing policies, URL protection rules, and sandboxed attachment analysis to protect against business email compromise and phishing campaigns.
- Oversee MFA and SSO governance via Azure AD and Microsoft Entra ID, designing and enforcing Conditional Access policies, identity protection rules, and Named Locations for over 8,000 users.
- Manage Microsoft Intune MDM and MAM policies, ensuring endpoint compliance baselines are enforced across Windows, iOS and Android devices.
- Lead on vulnerability remediation cycles using Tenable.io and AppCheck, triaging findings from external penetration tests and tracking remediation to closure through risk-based prioritisation.

- Respond to and investigate security incidents following the NIST 800-61 incident response framework, leading containment, eradication and post-incident review activities.

University of the Arts London (UAL) *March 2022 - March 2025*

Cyber Security Analyst, Cyber Security and Identity

- Triaged and investigated security alerts from CrowdStrike Falcon, Microsoft Defender, and Microsoft Sentinel SIEM, escalating confirmed incidents and producing post-incident reports with root-cause analysis and remediation recommendations.
- Administered BeyondTrust PAM solution, enforcing least-privilege access principles and monitoring privileged sessions for administrative and service accounts across on-premises and cloud environments.
- Supported the deployment and tuning of Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI), configuring attack surface reduction (ASR) rules and identity-based detections.
- Authored PowerShell scripts to automate security operations tasks, including user account auditing, alert data enrichment, and compliance reporting, saving significant analyst time on repetitive processes.
- Conducted vulnerability scanning with Nessus and AppCheck, producing prioritised remediation plans aligned to CIS Controls and Cyber Essentials Plus requirements.
- Supported Check Point Harmony firewall policy reviews, managing access control lists (ACLs) and assisting with network segmentation improvements to reduce the attack surface.
- Contributed to ISO 27001 audit preparation, gathering evidence for control effectiveness assessments across the security domain.

HICX Solutions Ltd (SaaS / FinTech) *February 2021 - March 2022*

IT Engineer: Security, Quality and Infrastructure

- Delivered security, quality and infrastructure support across a SaaS and FinTech environment, implementing endpoint security controls and supporting cloud infrastructure hardening.
- Conducted vulnerability assessments using Nessus, documenting findings and supporting remediation activities in line with risk appetite.
- Managed identity and access management (IAM) for cloud and on-premises systems, administering user provisioning, role-based access controls (RBAC), and MFA enforcement.
- Supported internal IT security audits and ISO 27001 compliance activities, contributing to policy documentation and evidence gathering.
- Maintained network infrastructure and supported firewall rule reviews to ensure traffic policies aligned with security requirements.

KEY ACHIEVEMENTS

- Reduced security alert backlog by over 60% at UAL by engineering custom KQL detection rules in Microsoft Sentinel and automating enrichment and triage via SOAR playbooks.
- Successfully deployed and configured CrowdStrike Falcon EDR across an 8,000-user estate, achieving full endpoint visibility and significantly reducing the mean time to contain endpoint threats.
- Led MFA and Conditional Access rollout via Microsoft Entra ID, reducing identity-based attack exposure across the entire user population and achieving compliance with Cyber Essentials Plus.
- Implemented BeyondTrust PAM solution, reducing privileged account risk by enforcing just-in-time (JIT) access and full session recording for all administrative accounts.
- Delivered Pentera Breach and Attack Simulation (BAS) exercises, validating detection coverage and identifying gaps in existing SIEM detection rules, leading to targeted rule improvements across CrowdStrike NG-SIEM and Microsoft Sentinel.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+

- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
