

PROSPER AWUNI

Security Engineer | Cloud & Production Infrastructure Security | Cloud-Native Security | DevSecOps |
CISSP

Greater London, United Kingdom | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a CISSP-certified Security Engineer with over five years of experience securing hybrid cloud and on-premises production infrastructure, with deep practical expertise in endpoint and cloud security engineering through CrowdStrike Falcon and Microsoft Defender, and identity engineering through Entra ID / Azure AD and Conditional Access. I bring strong engineering rigour to securing production environments and close collaboration with infrastructure and product teams to embed security into operational processes. I am drawn to Wiz's cloud-native security mission and am seeking a Security Engineer role on the Product & Production Infrastructure team where I can apply this cloud and production security background to protecting a fast-growing cloud security product company.

CORE SKILLS AND TECHNICAL STACK

- **Cloud and Endpoint Security Engineering:** CrowdStrike Falcon (Prevent, Insight, Discover, NG-SIEM, Spotlight); Microsoft Defender for Endpoint (MDE); endpoint policy design, detection tuning and proactive threat hunting
- **Identity and Access Management (IAM):** Entra ID / Azure Active Directory; Conditional Access; Zero Trust architecture; MFA and SSO; OAuth2 / OIDC; SCIM provisioning
- **Network and Perimeter Security:** Check Point Harmony; Tanium; IDS/IPS; certificate lifecycle management; DNS security
- **SIEM and Detection Engineering:** CrowdStrike Falcon NG-SIEM; Microsoft Sentinel (KQL); Splunk (SPL); MITRE ATT&CK-aligned detection content; SOAR automation playbooks
- **Privileged Access Management (PAM):** BeyondTrust; least-privilege design; just-in-time (JIT) access; privileged account governance
- **Vulnerability Management:** Tenable.io; Pentera Breach and Attack Simulation (BAS); AppCheck; Nessus; risk-based remediation prioritisation aligned to CVSS and business impact
- **Email and Phishing Defence:** Mimecast (anti-phishing, anti-spoofing, URL rewriting, DLP); phishing simulation; security awareness training
- **MDM / Device Management:** Microsoft Intune; device compliance policy enforcement; endpoint hardening; patch management
- **Scripting and Automation:** PowerShell; SOAR playbook development; automated security reporting and alerting
- **Security Frameworks:** NIST CSF, CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK, NIST 800-61

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 to Present

Senior Cyber Security Analyst / Engineer

- Engineer and operate CrowdStrike Falcon EDR across an 8,000-endpoint estate, designing detection policies, configuring prevention settings, and conducting proactive threat hunting aligned to MITRE ATT&CK TTPs.
- Design and maintain Entra ID / Azure AD Conditional Access policies, MFA controls and SSO integrations, enforcing Zero Trust access principles across cloud and on-premises applications and enforcing least-privilege access for all user tiers.
- Manage BeyondTrust PAM solution, engineering least-privilege and just-in-time access controls for all privileged accounts and critical infrastructure components.
- Build and maintain SOAR automation playbooks in CrowdStrike Falcon and Microsoft Sentinel, automating detection-to-response workflows to reduce manual triage and accelerate MTTR.

- Administer Microsoft Intune MDM/MAM, engineering device compliance policies and endpoint hardening baselines across mobile and desktop devices.
- Deploy and manage Microsoft Defender for Endpoint, Defender for Identity and Microsoft 365 Defender, providing unified threat protection across identity, endpoint and cloud workloads.
- Engineer Mimecast email security controls — anti-phishing, anti-spoofing, URL rewriting and DLP policies — to reduce email-borne attack surface.
- Conduct vulnerability management using Tenable.io, Pentera BAS and AppCheck, translating findings into prioritised, business-risk-aligned remediation plans and tracking closure to completion.
- Lead incident response in line with NIST 800-61 and MITRE ATT&CK, coordinating containment, eradication and recovery for all significant security events.
- Remediate penetration test findings, working directly with infrastructure and development teams to close vulnerabilities in a structured, evidence-based manner.
- Leverage Tanium for real-time endpoint compliance monitoring and vulnerability management, using asset discovery, software inventory and patch compliance modules to maintain accurate endpoint visibility and enforce compliance baselines across the estate.

University of the Arts, London (UAL)

March 2022 to March 2025

Cyber Security Analyst, Cyber Security and Identity

- Performed daily alert triage and investigation across CrowdStrike Falcon, Microsoft Sentinel and Mimecast, applying structured escalation procedures aligned to agreed SLAs.
- Supported CrowdStrike Falcon EDR deployment, policy engineering and detection rule development across the full endpoint estate.
- Managed Entra ID / Azure AD identity lifecycle — Conditional Access policy review, MFA configuration, and identity governance controls.
- Conducted vulnerability scanning and remediation tracking with Tenable.io and Nessus, reporting compliance posture to senior management.
- Authored IR playbooks and runbooks aligned to NIST 800-61 and MITRE ATT&CK, improving response consistency and reducing dwell time.
- Maintained IDS/IPS rule sets and security certificate lifecycle management across perimeter and internal infrastructure.

HICX Solutions Ltd (SaaS/FinTech)

February 2021 to March 2022

IT Engineer: Security, Quality and Infrastructure

- Administered endpoint security, email security and IAM across a cloud-first SaaS/FinTech environment, supporting security engineering and operational monitoring across cloud and on-premises workloads.
- Engineered PAM controls and MFA/SSO for privileged and standard accounts; maintained firewalls, MDM/MAM solutions and security monitoring tooling.
- Supported vulnerability management programme and security risk assessments, contributing remediation recommendations to the security risk register.

KEY ACHIEVEMENTS

- Achieved full CrowdStrike Falcon EDR deployment and policy optimisation across 8,000 endpoints at UAL, reducing malware dwell time and improving mean time to detect (MTTD).
- Implemented BeyondTrust PAM to enforce least-privilege and just-in-time access across all privileged accounts, materially reducing the organisation's privileged attack surface.
- Delivered SOAR automation in CrowdStrike Falcon and Microsoft Sentinel that eliminated manual triage for high-volume alert categories, freeing the team for complex engineering work.
- Deployed unified Microsoft Defender suite (MDE, MDI, M365D) across an 8,000-user estate, delivering integrated cross-domain threat detection for identity, endpoint and cloud.
- Reduced phishing click rates through engineered Mimecast controls and targeted awareness campaigns.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
