

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | Azure | IAM | PAM

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience designing, implementing, and managing enterprise security controls across cloud and on-premises environments. I specialise in Endpoint Detection and Response (EDR) tooling, Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) operations, web and email gateway security, and identity and access management. I have deep expertise with CrowdStrike Falcon EDR across an organisation of more than 8,000 users, alongside strong experience administering Microsoft Sentinel, Microsoft Defender for Endpoint (MDE), Microsoft Entra ID, and Microsoft Intune Mobile Device Management (MDM). I am comfortable working within a focused security team, managing multiple toolsets simultaneously, and driving vulnerability remediation, Privileged Access Management (PAM), and incident response in fast-paced environments. I bring a methodical, hands-on approach to securing infrastructure and thrive in roles where I can take direct ownership of security platforms and tooling.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (EDR, Next-Generation SIEM (NG-SIEM), Prevent, Insight, Discover) - Expert
- **SIEM/SOAR:** Microsoft Sentinel and Kusto Query Language (KQL), alert triage, automated playbooks, correlation rule development
- **Microsoft Defender Suite:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Email and Web Gateway Security:** Mimecast (anti-spoofing, sandboxing, URL rewriting, Data Loss Prevention (DLP))
- **Identity and Access Management (IAM):** Microsoft Entra ID, Azure Active Directory (AD), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO)
- **Mobile Device and Application Management:** Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM)
- **Privileged Access Management (PAM):** BeyondTrust PAM
- **Vulnerability Management:** Pentra Breach and Attack Simulation (BAS), Tenable.io, AppCheck, Nessus
- **Firewall and Network Security:** Check Point Harmony, Web Application Firewall (WAF)/DDoS, IDS/IPS
- **Endpoint Management:** Tanium, Microsoft Intune
- **Incident Response:** NIST SP 800-61, MITRE ATT&CK framework
- **Scripting and Automation:** PowerShell, SOAR playbook development
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) — Senior Cyber Security Analyst / Engineer *March 2025 – Present*

- Manage and optimise the CrowdStrike Falcon Endpoint Detection and Response (EDR) platform across an estate of more than 8,000 endpoints, including policy configuration, alert triage and response, and ongoing platform health monitoring
- Operate Microsoft Sentinel Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR), building custom Kusto Query Language (KQL) detection rules, automated playbooks, and dashboards to accelerate incident identification and response
- Administer email and web gateway security via Mimecast, tuning anti-spoofing controls, Data Loss Prevention (DLP) policies, URL rewriting, and attachment sandboxing

- Manage Multi-Factor Authentication (MFA), Single Sign-On (SSO), and Conditional Access policies in Microsoft Entra ID and Azure Active Directory (AD) for 8,000-plus users, enforcing Zero Trust access principles
- Maintain Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) policies across the full device estate, ensuring endpoint compliance with security baselines
- Oversee Privileged Access Management (PAM) using BeyondTrust, controlling and auditing administrative access across the organisation's infrastructure
- Lead vulnerability scanning and remediation programmes using Pentera Breach and Attack Simulation (BAS), Tenable.io, and AppCheck, prioritising findings by risk and tracking remediation through to closure
- Manage IDS/IPS, security certificate lifecycle, and web application security controls as part of end-to-end infrastructure security ownership
- Lead incident response investigations following NIST SP 800-61 methodology, coordinating containment, eradication, recovery, and post-incident reporting
- Deliver security awareness training and phishing simulations to build a security-conscious culture across the organisation
- Manage Check Point Harmony firewall policies and network perimeter security controls

University of the Arts, London (UAL) — Cyber Security Analyst, Cyber Security and Identity

March 2022 – March 2025

- Deployed and configured CrowdStrike Falcon EDR, Prevent, and Insight modules across the organisation, establishing baseline detection and response capabilities for the full endpoint estate
- Built and tuned Microsoft Sentinel SIEM detection rules using Kusto Query Language (KQL), reducing false positive rates and improving alert fidelity across the Security Operations Centre (SOC)
- Managed Mimecast email security gateway, configuring policies for attachment sandboxing, URL rewriting, and impersonation protection to reduce phishing and Business Email Compromise (BEC) risk
- Administered Azure Active Directory (AD) and Microsoft Entra ID, implementing Conditional Access policies, enforcing Multi-Factor Authentication (MFA), and managing Single Sign-On (SSO) integrations for enterprise applications
- Supported BeyondTrust Privileged Access Management (PAM) deployment and ongoing policy management, eliminating standing privileged access across the estate
- Configured and maintained Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) policies for all managed devices
- Conducted vulnerability assessments using Tenable.io and AppCheck, coordinating with infrastructure and application teams to track and remediate findings in line with risk appetite
- Participated in incident response activities including alert triage, forensic investigation, and post-incident reporting using NIST SP 800-61 and MITRE ATT&CK frameworks
- Developed PowerShell scripts and SOAR automations to streamline repetitive security operations tasks and reduce manual effort

HICX Solutions Ltd (SaaS/FinTech) — IT Engineer: Security, Quality and Infrastructure

February 2021 – March 2022

- Managed endpoint protection and firewall configuration, maintaining security controls across cloud and on-premises infrastructure
- Administered Microsoft Azure and Microsoft 365 security controls, including identity management and access policy configuration
- Conducted vulnerability assessments and maintained patch management processes to reduce exposure across the technology estate
- Supported incident investigation and remediation activities, contributing to root cause analysis and post-incident reporting
- Assisted with IT infrastructure security hardening and contributed to security compliance activities aligned to industry standards

KEY ACHIEVEMENTS

- Deployed CrowdStrike Falcon Endpoint Detection and Response (EDR) across 8,000-plus endpoints, achieving full endpoint visibility and rapid threat detection with sub-one-minute alert generation for known

threat patterns

- Built automated Microsoft Sentinel Security Orchestration, Automation and Response (SOAR) playbooks that reduced mean time to respond (MTTR) to security incidents by approximately 40 per cent
- Implemented a structured vulnerability management cycle using Pentera Breach and Attack Simulation (BAS), Tenable.io, and AppCheck, reducing critical and high-risk exposure by 60 per cent within 12 months
- Deployed BeyondTrust Privileged Access Management (PAM) across all administrative accounts, eliminating standing privilege and significantly reducing the attack surface for credential-based attacks
- Configured Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) policies for 8,000-plus devices, achieving full endpoint compliance with organisational security baselines
- Led end-to-end Microsoft Defender for Identity (MDI) deployment to detect lateral movement and identity-based attacks across the enterprise estate

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
