

PROSPER AWUNI

Senior Cyber Security Engineer | Threat Detection and Response | IAM | Vulnerability Management | Security Governance

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) with over five years of experience delivering senior-level threat detection and response, Identity and Access Management (IAM), endpoint and vulnerability management, and security governance across large and complex enterprise environments. I have a deep technical background across CrowdStrike Falcon Endpoint Detection and Response (EDR) and Next-Generation SIEM (NG-SIEM), Microsoft Sentinel, Microsoft Defender Extended Detection and Response (XDR), Microsoft Entra ID (formerly Azure Active Directory), Mimecast email security, Privileged Access Management (PAM) via BeyondTrust, and endpoint management through Microsoft Intune. I am comfortable operating within structured, compliance-driven organisations and enjoy contributing to security architecture decisions, remediating penetration test findings and delivering security awareness training alongside day-to-day security engineering operations. I bring a strong financial services mindset developed through employment at HICX Solutions Ltd, a Software as a Service and Financial Technology company, and through managing security for a regulated higher education institution with complex stakeholder governance requirements and a user base of over 8,000 individuals.

CORE SKILLS AND TECHNICAL STACK

- **Threat Detection and Response (SIEM/SOAR/EDR):** CrowdStrike Falcon (Prevent, EDR, Insight, Discover, NG-SIEM), Microsoft Sentinel, Security Orchestration, Automation and Response (SOAR), detection engineering, threat hunting
- **Email and Web Security Gateway:** Mimecast; web filtering, Data Loss Prevention (DLP), anti-phishing
- **Identity and Access Management (IAM):** Microsoft Entra ID (Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO)
- **Privileged Access Management (PAM):** BeyondTrust; least-privilege enforcement, privileged session management, access reviews
- **Endpoint and Vulnerability Management:** Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM), Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus; risk-based remediation planning
- **Microsoft Defender XDR:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft Defender for Microsoft 365 (M365)
- **Firewall and Network Security:** Check Point Harmony; Intrusion Detection and Prevention (IDS/IPS); network security monitoring
- **Incident Response:** NIST 800-61, MITRE ATT&CK, end-to-end incident lifecycle from triage to post-incident review
- **Security Governance and Architecture:** Security architecture review, penetration test remediation, security awareness training, ISO 27001, NIST Cybersecurity Framework (CSF), CIS Controls, Cyber Essentials Plus
- **Scripting and Automation:** PowerShell, Kusto Query Language (KQL)

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Oversee threat detection and response operations across Security Information and Event Management (SIEM), Security Orchestration, Automation and Response (SOAR) and Endpoint Detection and Response (EDR) platforms including CrowdStrike Falcon NG-SIEM and Microsoft Sentinel, protecting a 8,000-user enterprise environment.

- Manage email and web security gateway controls through Mimecast, administering anti-phishing, anti-spam and Data Loss Prevention (DLP) policies and responding to email-borne threats and security incidents.
- Administer Identity and Access Management (IAM) using Microsoft Entra ID (Azure Active Directory), enforcing Conditional Access, Multi-Factor Authentication (MFA) and Single Sign-On (SSO) policies and managing joiner, mover and leaver processes for all staff.
- Manage BeyondTrust Privileged Access Management (PAM) platform, controlling and auditing privileged access across the organisation's most sensitive systems and enforcing least-privilege principles.
- Administer Microsoft Intune for Mobile Device Management (MDM) and Mobile Application Management (MAM), maintaining device compliance, managing mobile security policies and supporting endpoint lifecycle management.
- Execute the vulnerability management programme using Tenable.io and Pentera Breach and Attack Simulation (BAS), translating scan findings into risk-prioritised remediation plans and engaging technology stakeholders to track closure against agreed timescales.
- Contribute to security architecture decisions, reviewing proposed changes and infrastructure designs to ensure alignment with security standards and controls.
- Remediate penetration test findings identified through internal and third-party assessments, coordinating across technology and business teams to address vulnerabilities within agreed risk appetites.
- Deliver security awareness training across the organisation, strengthening security culture and improving resilience to social engineering and phishing attacks.
- Respond to cyber security incidents in line with NIST 800-61, managing triage, severity assessment, containment, eradication and post-incident review for Priority 1 to Priority 4 (P1-P4) events.

University of the Arts, London (UAL)

March 2022 - March 2025

Cyber Security Analyst, Cyber Security and Identity

- Delivered senior-level support for business-as-usual security engineering, ensuring the stability, resilience and effective operation of Security Information and Event Management (SIEM), Endpoint Detection and Response (EDR) and Identity and Access Management (IAM) platforms.
- Managed CrowdStrike Falcon Endpoint Detection and Response (EDR) and Microsoft Sentinel SIEM, performing alert triage, escalation and investigation and tuning detection rules to improve coverage and reduce noise.
- Administered Microsoft Entra ID (Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA) and Single Sign-On (SSO), managing identity governance and access reviews across the organisation.
- Managed BeyondTrust Privileged Access Management (PAM) controls, supporting privilege escalation requests, conducting access reviews and maintaining audit trails for all privileged activity.
- Administered Mimecast email security gateway, enforcing policies and managing quarantine review to protect staff from phishing and malware delivery.
- Supported Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) rollout across the 8,000-user estate, configuring device compliance policies and mobile security baselines.
- Conducted vulnerability assessments using Tenable.io, AppCheck and Nessus, producing risk-prioritised remediation reports and working with technology teams to address findings.
- Mentored and supported junior cyber security team members, sharing technical knowledge and providing guidance on security operations best practices.

HICX Solutions Ltd (Software as a Service / Financial Technology)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Delivered security engineering activities within a Software as a Service (SaaS) and Financial Technology environment, managing endpoint security, email security (Mimecast), firewall operations and vulnerability scanning across a hybrid infrastructure.
- Administered Identity and Access Management (IAM) and Privileged Access Management (PAM) controls, enforcing Multi-Factor Authentication (MFA) and least-privilege access governance.

- Supported penetration test remediation activities and contributed to ISO 27001 compliance work and security policy development.
- Delivered security awareness training and contributed to ad-hoc security architecture and hardening projects.

KEY ACHIEVEMENTS

- Led the deployment of Microsoft Defender for Endpoint (MDE) and CrowdStrike Falcon Endpoint Detection and Response (EDR) across an 8,000-user estate at UAL, delivering enterprise-scale endpoint protection and dramatically improving threat detection and response coverage.
- Contributed to security architecture initiatives that strengthened UAL's security posture across endpoint, identity and network domains, aligning controls with CIS Controls, ISO 27001 and Cyber Essentials Plus requirements.
- Implemented Pentera Breach and Attack Simulation (BAS) as part of the vulnerability management programme, enabling continuous, automated validation of attack paths and providing board-level visibility of residual risk.
- Designed and deployed Security Orchestration, Automation and Response (SOAR) playbooks using PowerShell and Microsoft Sentinel automation, reducing manual analyst effort and accelerating mean time to respond (MTTR) across the Security Operations Centre (SOC).
- Supported UAL's achievement and maintenance of Cyber Essentials Plus certification and contributed to external audit preparation for ISO 27001 compliance.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
