

PROSPER AWUNI

Senior Cyber Security Engineer | Microsoft 365 | Azure | Identity Security | Zero Trust | Cloud Security

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) with over five years of hands-on experience in cyber security engineering, with a particular specialisation in securing identity, devices, and cloud platforms. I have deep expertise working within Microsoft 365 and Azure environments, implementing and governing cloud security controls that align with Zero Trust principles. I am highly experienced in administering Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, Multifactor Authentication (MFA), Single Sign-On (SSO) lifecycle management, and integrating Software as a Service (SaaS) platforms for secure identity federation. I have owned security engineering projects end-to-end, from design and planning through to implementation, documentation, and transition into Business As Usual (BAU). I work closely with technology leadership, infrastructure managed service providers (MSPs), and Security Operations Centre (SOC) functions to ensure cloud and hybrid environments are secure, resilient, and well-governed. I am now seeking a hands-on, delivery-focused Senior Cyber Security Engineer role where I can drive cloud security improvements and Zero Trust initiatives within a forward-thinking organisation.

CORE SKILLS AND TECHNICAL STACK

- **Cloud and Identity Security (Microsoft 365 and Azure):** Microsoft Entra ID (formerly Azure Active Directory (Azure AD)), Conditional Access, MFA, SSO, Azure Active Directory Identity Protection, Microsoft Defender for Identity (MDI)
- **Zero Trust Architecture:** Zero Trust principle implementation across identity, device, application, and network layers; least-privilege access enforcement; continuous access evaluation
- **Endpoint and Device Security:** Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM); CrowdStrike Falcon Endpoint Detection and Response (EDR) - Expert; Microsoft Defender for Endpoint (MDE); Tanium endpoint management
- **Cloud Security Features and Controls:** Microsoft 365 Defender; Microsoft Defender for Cloud; Azure security governance; cloud security posture management; SaaS application security integration
- **Security Operations:** Security Information and Event Management (SIEM) via CrowdStrike NG-SIEM and Microsoft Sentinel (Kusto Query Language (KQL)); Security Orchestration, Automation and Response (SOAR); threat hunting; incident triage and response
- **PAM:** BeyondTrust Privileged Access Management (PAM); just-in-time (JIT) privileged access and session recording
- **Vulnerability Management:** Tenable.io, Nessus, Pentera Breach and Attack Simulation (BAS), AppCheck; risk-based vulnerability prioritisation and remediation
- **Scripting and Automation:** PowerShell scripting for security automation; SOAR workflow development and integration
- **Frameworks/Standards:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK framework
- **Certifications (Desirable):** CISSP - held; AZ-500 (Microsoft Azure Security Technologies) equivalent experience; SC-300 (Microsoft Identity and Access Administrator) equivalent experience

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL)

March 2025 - Present

- Lead security engineering projects end-to-end within the Microsoft 365 and Azure environment, owning delivery from design and planning through implementation, documentation, and transition into BAU operations
- Improve overall security posture in line with Zero Trust principles, rolling out cloud security features and controls including Conditional Access policies, Entra ID Identity Protection, and continuous access evaluation

- Administer Microsoft Entra ID (Azure AD) for secure identity lifecycle management, including SSO integration for SaaS platforms, Conditional Access policy governance, and MFA enforcement across over 8,000 users
- Manage Microsoft Intune MDM and MAM to enforce device compliance baselines and application management policies across Windows, iOS, and Android platforms
- Operate the CrowdStrike Falcon EDR platform and Microsoft 365 Defender suite, working closely with the SOC to ensure endpoint and cloud detection coverage aligns with the current threat landscape
- Administer BeyondTrust Privileged Access Management (PAM), eliminating standing privileged access and enforcing just-in-time access for all administrator accounts
- Work alongside internal stakeholders, the IT managed service provider, and the SOC to ensure the cloud and hybrid environment is secure, resilient, and well-governed
- Implement and maintain Security Orchestration, Automation and Response (SOAR) playbooks within Microsoft Sentinel and CrowdStrike NG-SIEM, automating repetitive triage tasks and improving detection response times
- Lead vulnerability management using Tenable.io, Nessus, Pentera BAS, and AppCheck, providing risk-based prioritisation and tracking remediation through to validated closure
- Contribute to cloud security roadmap initiatives, evaluating emerging Microsoft security features and recommending adoption to improve the organisation's security posture

University of the Arts, London (UAL) Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Administered Microsoft Entra ID and Azure AD identity configurations, delivering Conditional Access policy implementations, MFA enrolment campaigns, and SSO integrations for over 50 enterprise applications
- Supported the rollout of Zero Trust access controls including continuous access evaluation, identity risk policies, and Entra ID Identity Protection across the organisation
- Managed Microsoft Intune MDM and MAM policies for a mixed-platform environment, ensuring device compliance and application security baselines were enforced and evidenced
- Operated SIEM platforms including Microsoft Sentinel with KQL and CrowdStrike Falcon, performing alert triage, incident investigation, and security event escalation
- Supported BeyondTrust PAM administration including privileged account onboarding, policy compliance monitoring, and session recording review
- Conducted vulnerability assessments using Nessus and Tenable.io, produced remediation reports, and collaborated with system owners to close critical findings
- Supported integration of SaaS applications for secure SSO and identity lifecycle management using Azure AD federation and SAML/OAuth2 protocols

HICX Solutions Ltd (SaaS FinTech) Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Maintained security controls within a cloud-hosted SaaS FinTech platform, supporting identity lifecycle management, MFA enforcement, and privileged access governance
- Managed user provisioning and access reviews across cloud and on-premises environments, enforcing least-privilege access principles and role-based access control (RBAC)
- Supported integration of SaaS application security controls and assisted with patch management and vulnerability management cycles
- Contributed to infrastructure quality assurance processes and produced security documentation aligned to compliance and governance requirements

KEY ACHIEVEMENTS

- Led end-to-end implementation of Microsoft Entra ID Conditional Access across an 8,000-user estate, enforcing Zero Trust access principles and reducing identity-based attack surface significantly
- Integrated over 50 SaaS applications for secure SSO and automated lifecycle management using Microsoft Entra ID federation, eliminating orphaned account risk across the application portfolio
- Implemented BeyondTrust PAM across the organisation, eliminating standing privileged access for over 200 administrator accounts and meeting Cyber Essentials Plus compliance requirements
- Designed and deployed automated SOAR playbooks within Microsoft Sentinel, reducing alert-to-triage time by over 40 per cent and enabling the security team to focus on high-fidelity investigation

- Managed full Microsoft Intune MDM and MAM deployment across a mixed-platform estate, achieving 100 per cent device enrolment and compliance within a six-month programme
- Reduced critical and high vulnerability exposure by 60 per cent within 12 months through a structured vulnerability management programme using Tenable.io and Pentera BAS

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
