

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | Vulnerability Management |
Financial Services

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) with over five years of progressive experience in cyber security engineering and operations, with a strong focus on implementing and maintaining robust security across complex hybrid enterprise environments. I hold expert-level proficiency in CrowdStrike Falcon Endpoint Detection and Response (EDR), and I am highly experienced operating Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms including CrowdStrike Next-Generation SIEM (NG-SIEM) and Microsoft Sentinel. I have managed Web Application Firewall (WAF) and Distributed Denial of Service (DDoS) protection controls, web and email security gateways including Mimecast, Intrusion Detection and Prevention Systems (IDS/IPS), Privileged Access Management (PAM) solutions, and Mobile Device Management (MDM) and Mobile Application Management (MAM) platforms via Microsoft Intune. I have a strong track record delivering vulnerability scans and remediation programmes, remediating penetration test findings, and providing security awareness training to large user populations. I am now seeking a focused Cyber Security Engineer position within a specialist security team where I can apply my technical depth across SIEM/SOAR/EDR, identity, gateway, and vulnerability management to deliver measurable risk reduction.

CORE SKILLS AND TECHNICAL STACK

- **EDR/XDR:** CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover) - Expert; Microsoft Defender for Endpoint (MDE); Microsoft Defender for Identity (MDI)
- **SIEM/SOAR:** CrowdStrike NG-SIEM, Microsoft Sentinel with Kusto Query Language (KQL), Splunk/SPL; SOAR automation, playbook and runbook development
- **Email and Web Security Gateways:** Mimecast email security gateway; Check Point Harmony web gateway and firewall
- **WAF/DDoS:** Web Application Firewall (WAF) policy management and DDoS protection configuration
- **Identity and Access Management:** Microsoft Entra ID (formerly Azure Active Directory (Azure AD)), Conditional Access, Multifactor Authentication (MFA), Single Sign-On (SSO), Group Policy
- **PAM:** BeyondTrust Privileged Access Management (PAM); just-in-time privileged access and session recording
- **MDM/MAM:** Microsoft Intune MDM and MAM; Tanium endpoint management
- **Vulnerability Management:** Tenable.io, Nessus, Pentra Breach and Attack Simulation (BAS), AppCheck; penetration test finding triage and remediation
- **Incident Response:** NIST Special Publication (SP) 800-61, MITRE ATT&CK framework; alert triage, investigation, containment, and recovery
- **Scripting/Automation:** PowerShell scripting; SOAR automation and workflow integration
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 - Present

- Administer and optimise the CrowdStrike Falcon EDR platform across an 8,000-user enterprise estate, managing Prevent policies, Insight-driven threat hunting, and Discover asset visibility to maintain full endpoint coverage
- Operate SIEM/SOAR/EDR platforms including CrowdStrike NG-SIEM and Microsoft Sentinel, triaging and responding to security alerts, reducing false positives through detection rule tuning using Kusto Query Language (KQL)

- Manage web and email security gateways including Mimecast email security gateway and Check Point Harmony, ensuring policies align with current threat intelligence and emerging attack patterns
- Administer WAF and DDoS protection controls, reviewing rule sets and blocking malicious traffic patterns to protect internet-facing applications and services
- Configure and maintain Microsoft Entra ID Conditional Access policies, MFA and SSO integrations, and Group Policy Objects (GPOs) to enforce least-privilege access across the organisation
- Manage Microsoft Intune MDM and MAM policies, ensuring corporate devices and mobile applications are enrolled, compliant, and aligned with security baselines across Windows, iOS, and Android
- Administer BeyondTrust PAM, enforcing just-in-time privileged access and session recording for all privileged administrator accounts, eliminating standing privileged access
- Lead vulnerability scanning and remediation using Tenable.io, Nessus, Pentra BAS, and AppCheck; prioritise findings by criticality and track remediation progress with asset and system owners
- Remediate penetration test findings, liaising with external testing teams to validate fixes and ensure re-test sign-off within agreed timelines
- Monitor and maintain security certificate lifecycles, preventing expiry events across internal and external services
- Manage IDS/IPS rules, reviewing and updating signatures to reduce false positives and ensure coverage of current threat indicators
- Deliver security awareness training programmes and phishing simulation campaigns across the organisation, achieving measurable reductions in end-user risk behaviours
- Contribute to ad-hoc security engineering projects including SOAR playbook development, detection engineering enhancements, and incident response tabletop exercises

University of the Arts, London (UAL) Cyber Security Analyst, Cyber Security

March 2022 - March 2025

- Operated SIEM/SOAR platforms including Microsoft Sentinel and CrowdStrike Falcon, performing alert triage, log investigation, and security incident escalation
- Conducted vulnerability scans using Nessus and Tenable.io, produced remediation reports, and worked with system owners to track and evidence remediation of critical and high findings
- Administered Microsoft Entra ID and Azure AD identity configurations including Conditional Access policies, MFA enrolment campaigns, and SSO integrations for enterprise applications
- Managed Mimecast email security gateway policies, investigated email-borne threats including phishing and Business Email Compromise (BEC), and reduced malicious email delivery rates
- Supported BeyondTrust PAM administration, onboarding privileged accounts, enforcing policy compliance, and reviewing privileged session recordings
- Assisted with penetration test scoping and coordination, liaised with external testers, and tracked remediation of identified findings through to closure
- Configured and maintained Microsoft Intune MDM and MAM policies for a mixed-platform estate, enforcing compliance baselines and device health checks
- Supported IDS/IPS management, firewall policy reviews, and contributed to WAF rule reviews for internet-facing services
- Delivered security awareness training sessions and coordinated phishing simulation campaigns, improving security culture across the organisation

HICX Solutions Ltd (SaaS FinTech) Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Maintained and monitored security controls across a cloud-hosted Software as a Service (SaaS) FinTech platform, supporting vulnerability management and patch management cycles
- Managed identity and access management processes including user provisioning, access reviews, MFA enforcement, and privileged account controls across cloud and on-premises systems
- Supported security incident response activities including log analysis, SIEM alert investigation, and escalation of confirmed incidents
- Contributed to infrastructure quality assurance and produced documentation for security controls, compliance standards, and change management procedures

KEY ACHIEVEMENTS

- Implemented automated SOAR playbooks within CrowdStrike NG-SIEM and Microsoft Sentinel, reducing alert-to-triage time by over 40 per cent across a complex multi-platform environment
- Deployed and configured CrowdStrike Falcon EDR across an 8,000-user estate, achieving full endpoint visibility and reducing threat dwell time to under two hours on average
- Implemented BeyondTrust PAM organisation-wide, eliminating standing privileged access for over 200 administrator accounts and achieving compliance with Cyber Essentials Plus requirements
- Delivered a vulnerability management programme using Tenable.io and Pentera BAS, reducing critical and high vulnerability exposure by 60 per cent within 12 months
- Rebuilt Mimecast email security gateway policies following a targeted phishing campaign, reducing malicious email delivery rates by over 95 per cent
- Developed over 30 custom SIEM detection rules in Microsoft Sentinel using KQL, improving detection coverage against MITRE ATT&CK tactics with a measurable reduction in false positives

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
