

PROSPER AWUNI

Senior Security Engineer | Microsoft Sentinel | SIEM | Threat-Led Detection | Information Security Operations

United Kingdom (Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Security Engineer with over five years of experience implementing, configuring and guiding the evolution of enterprise security technology portfolios, with deep expertise in Security Information and Event Management (SIEM) platforms, threat-led detection engineering and security operations. In my current role within the Cyber Security team at the University of the Arts London (UAL), I implement and manage CrowdStrike Falcon Next-Generation SIEM (NG-SIEM) and Microsoft Sentinel, developing detection logic informed by the MITRE ATT&CK framework and Cyber Kill Chain, managing technical escalations through to resolution and maximising security value from existing technology investments. I hold the Certified Information Systems Security Professional (CISSP) certification and bring a structured, threat-led approach to generating mitigation and countermeasures, with strong expertise in log ingestion, monitoring, parsing and SIEM configuration that directly aligns with the Cyber Engineering function within a mature Information Security Operations team.

CORE SKILLS AND TECHNICAL STACK

- **SIEM Platforms:** Microsoft Sentinel, CrowdStrike Falcon NG-SIEM, KQL (Kusto Query Language), log ingestion, monitoring, parsing and data connector configuration
- **Threat-Led Detection Engineering:** MITRE ATT&CK framework, Cyber Kill Chain, detection rule development, threat use case creation, alert tuning
- **Security Technology Portfolio Management:** Implementation, configuration, optimisation and evolution of enterprise security tooling
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon Prevent, Falcon Insight, Falcon Discover; Microsoft Defender for Endpoint (MDE)
- **Security Orchestration, Automation and Response (SOAR):** Playbook development, automated triage, technical escalation management
- **Identity and Access Management (IAM):** Azure Active Directory (Azure AD) / Microsoft Entra ID, Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO)
- **Privileged Access Management (PAM):** BeyondTrust
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentera Breach and Attack Simulation (BAS)
- **Network Security:** Check Point Harmony firewall, Mimecast email security
- **Scripting and Automation:** PowerShell
- **Frameworks:** NIST CSF, CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK
- **Incident Response:** NIST 800-61 lifecycle, technical escalation management, end-to-end case ownership

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL)

March 2025 - Present

- Implement, configure and guide the evolution of the security technology portfolio across an 8,000-user enterprise environment, operating Microsoft Sentinel and CrowdStrike Falcon NG-SIEM as primary Security Information and Event Management (SIEM) platforms
- Take a threat-led approach to generating mitigation and countermeasures, developing detection logic and monitoring rules informed by the MITRE ATT&CK framework and Cyber Kill Chain to improve coverage across the most relevant threat categories
- Manage logging, monitoring, ingestion and parsing across diverse log sources including Active Directory (AD), cloud platforms, endpoints, firewalls and servers, ensuring SIEM data quality and fidelity
- Manage technical escalations through to successful resolution, working with infrastructure, identity and application teams to investigate, contain and remediate complex security incidents

- Develop and maintain SOAR automation playbooks, identifying ways to maximise security value from existing technology investments and reduce analyst workload through automation
- Raise awareness of security policies and develop corresponding procedures, championing best practices across the organisation and supporting security culture improvement
- Administer BeyondTrust Privileged Access Management (PAM), enforcing least-privilege and just-in-time access controls across critical systems and cloud infrastructure
- Manage Azure Active Directory (Azure AD) / Microsoft Entra ID, Conditional Access, Multi-Factor Authentication (MFA) and Single Sign-On (SSO), securing identity across the enterprise
- Drive vulnerability management using Tenable.io, AppCheck, Nessus and Pentra BAS, translating findings into actionable risk-led remediation plans
- Analyse business needs to research and recommend security solutions, providing advisory input on tool evaluations and proof-of-concept (POC) assessments

University of the Arts, London (UAL) Cyber Security Analyst, Cyber Security

March 2022 - March 2025

- Monitored security alerts across SIEM, Endpoint Detection and Response (EDR) and email security platforms, triaging and investigating incidents and managing escalations in line with incident response procedures
- Built and refined detection rules and monitoring use cases, applying the MITRE ATT&CK framework to improve threat detection coverage and reduce alert fatigue
- Supported logging, ingestion and parsing configuration within SIEM platforms, contributing to improved data quality and detection fidelity
- Contributed to identity security programme, supporting Azure Active Directory (Azure AD) governance, access reviews and privileged access management implementation
- Assisted in vulnerability management activities, tracking remediation of findings against risk-prioritised plans across on-premise and cloud infrastructure
- Developed and maintained incident response playbooks, contributing to continuous improvement of the security operations function and escalation procedures
- Raised awareness of security policies and supported the development of corresponding operational procedures

HICX Solutions Ltd (SaaS/FinTech) Engineer, Security, Quality and Infrastructure

February 2021 - March 2022

- Delivered security engineering, quality assurance and infrastructure management within a Software as a Service (SaaS) and FinTech environment, implementing and maintaining security controls across cloud and on-premise systems
- Identified ways to maximise security value from existing infrastructure investments, recommending and implementing improvements to endpoint security, network access controls and monitoring
- Contributed to internal security audits, compliance activities and the development of security policies and procedures

KEY ACHIEVEMENTS

- Implemented CrowdStrike Falcon NG-SIEM and Microsoft Sentinel as the enterprise SIEM platform portfolio, establishing comprehensive logging, monitoring and detection capability across the hybrid infrastructure
- Developed a library of MITRE ATT&CK-aligned detection rules and monitoring controls, improving threat detection fidelity and extending coverage across key attack vectors including credential theft, lateral movement and persistence
- Led deployment of Microsoft Defender for Endpoint (MDE) across 8,000 users, delivering full endpoint detection and response coverage across the enterprise estate
- Deployed BeyondTrust Privileged Access Management (PAM) solution, materially reducing privileged account risk and enforcing least-privilege access across critical systems
- Built SOAR automation playbooks that reduced mean time to respond (MTTR) to security incidents, maximising value from existing security technology investments
- Supported achievement and maintenance of Cyber Essentials Plus certification, demonstrating robust baseline security controls across the organisation

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
