

PROSPER AWUNI

Senior IT Security Analyst | Vulnerability and Exposure Management | Threat-Informed Remediation | Incident Response

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior IT Security Analyst with more than five years of experience owning selected cyber security domains end-to-end within large, complex organisations, combining analyst and engineering responsibilities across security tools, vulnerability and exposure management, web and email security, incident response, and threat-informed remediation. In my current role at the University of the Arts, London, I operate as a senior technical contributor within the cyber security team, driving practical improvements to reduce cyber risk across an estate of approximately 8,000 users. I have deep hands-on experience with Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM), vulnerability scanning and exposure prioritisation, Privileged Access Management (PAM), and identity security, as well as a strong track record of leading incident response engagements using a structured, threat-informed approach aligned to the MITRE ATT&CK framework and the National Institute of Standards and Technology (NIST) SP 800-61 framework. I hold the Certified Information Systems Security Professional (CISSP) certification and bring a collaborative, ownership-focused mindset suited to global cyber security teams.

CORE SKILLS AND TECHNICAL STACK

- **Vulnerability and Exposure Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS); risk-based prioritisation, remediation tracking, and continuous exposure monitoring
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (EDR, Prevent, Next Generation SIEM (NG-SIEM), Falcon Insight, Falcon Discover); detection rule creation and tuning, host investigation and response
- **Security Information and Event Management (SIEM):** Microsoft Sentinel with Kusto Query Language (KQL), CrowdStrike NG-SIEM; detection engineering, alert triage, and threat hunting
- **Incident Response and Threat-Informed Remediation:** NIST SP 800-61 framework; MITRE ATT&CK for detection alignment and adversary technique mapping; Security Orchestration Automation and Response (SOAR) playbook automation
- **Web and Email Security:** Mimecast (threat protection policies, impersonation controls, threat intelligence integration); Check Point Harmony firewall (policy management and access rule reviews)
- **Identity and Access Management (IAM):** Microsoft Entra ID, Azure Active Directory (AD), Conditional Access, Group Policy, BeyondTrust Privileged Access Management (PAM)
- **Endpoint and Identity Security:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 (M365) Defender; Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune
- **Detection Engineering and Threat Hunting:** MITRE ATT&CK-aligned detection development; KQL-based investigation and hypothesis-driven threat hunting
- **Scripting and Automation:** PowerShell for security tool automation, incident remediation, and operational reporting
- **Compliance and Frameworks:** NIST Cybersecurity Framework (CSF), Centre for Internet Security (CIS) Controls, ISO 27001, Cyber Essentials Plus (CE+)
- **Additional Tools:** Tanium (endpoint management), Splunk / Security Practitioner Knowledge (SPL), Microsoft Entra Privileged Identity Management (PIM)

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*
Senior technical contributor within the UAL cyber security team, owning selected security domains end-to-end and driving practical improvements to reduce cyber risk across an 8,000-user estate. Combining analyst and

engineering responsibilities across vulnerability management, endpoint and identity security, incident response, and threat-informed remediation.

- Own vulnerability and exposure management end-to-end: conduct scheduled and ad hoc scans using Tenable.io, AppCheck, and Nessus; prioritise findings by exploitability and business impact; track remediation to closure in collaboration with infrastructure and application teams
- Operate Pentera Breach and Attack Simulation (BAS) to validate the effectiveness of existing security controls, identify exploitable exposure paths, and provide evidence-based prioritisation for remediation activities
- Lead incident response engagements from initial detection through containment, eradication, recovery, and post-incident review, applying the NIST SP 800-61 framework and mapping attacker behaviour to the MITRE ATT&CK framework for threat-informed remediation
- Manage and operate CrowdStrike Falcon Endpoint Detection and Response (EDR), Prevent, NG-SIEM, Falcon Insight, and Falcon Discover; own console administration, detection rule tuning, and host investigation and response actions across the full endpoint estate
- Develop and tune detection rules in Microsoft Sentinel using Kusto Query Language (KQL); manage Security Orchestration Automation and Response (SOAR) playbooks to automate triage, containment, and notification workflows
- Operate web and email security tooling: manage Mimecast threat protection policies, impersonation controls, URL rewriting, and integration with threat intelligence feeds to protect against phishing, malware, and Business Email Compromise (BEC)
- Administer Privileged Access Management (PAM) via BeyondTrust, enforcing least-privilege access and just-in-time provisioning for administrative and service accounts across on-premises and cloud environments
- Maintain firewall policy using Check Point Harmony, performing periodic access rule reviews and aligning configurations to security standards and risk appetite
- Administer Microsoft Entra ID, Conditional Access policies, and Azure Active Directory (AD) to enforce identity-based controls, reducing identity-based attack surface across the hybrid environment
- Manage Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune, enforcing device compliance, configuration baselines, and application security policies
- Deliver security awareness training and phishing simulation campaigns, driving measurable reductions in human risk across the organisation

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

Delivered analyst and engineering responsibilities across the UAL cyber security team, contributing to improvements in detection capability, vulnerability management, and identity security within a growing hybrid cloud environment.

- Performed vulnerability assessments using Tenable.io and Nessus, producing risk-prioritised remediation reports and coordinating remediation cycles with system owners and infrastructure teams
- Conducted hypothesis-driven threat hunting exercises aligned to the MITRE ATT&CK framework, proactively searching for adversary techniques across endpoint and identity telemetry in Microsoft Sentinel and CrowdStrike Falcon
- Supported incident response investigations: triaged security alerts from SIEM and EDR platforms, coordinated containment of affected systems, and produced post-incident documentation with lessons learned
- Administered Mimecast email security platform, tuning inbound and outbound policies to block phishing, malware delivery, and Business Email Compromise (BEC) attacks
- Managed BeyondTrust Privileged Access Management (PAM) to enforce least-privilege access, record privileged sessions, and support access reviews
- Administered Microsoft Entra ID, Azure Active Directory (AD), and Conditional Access policies, enforcing Multi-Factor Authentication (MFA) and context-based access controls
- Wrote KQL detection rules and alert tuning logic in Microsoft Sentinel, reducing false-positive rates and improving signal quality for the analyst team

- Supported ISO 27001 and Cyber Essentials Plus (CE+) compliance activities, including gap analysis, technical control testing, and evidence collection
- Authored and delivered security awareness training content; administered phishing simulation campaigns and tracked improvement metrics over time

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Conducted vulnerability scans and managed patching cycles to maintain security baseline compliance across a Software as a Service (SaaS) cloud-first environment
- Implemented and maintained endpoint protection, Multi-Factor Authentication (MFA), and identity controls including Azure Active Directory (AD) and role-based access provisioning
- Supported Security Information and Event Management (SIEM) log ingestion, alert monitoring, and incident escalation following documented response procedures
- Managed Mobile Device Management (MDM) device compliance policies and administered network security including firewall rule reviews and Virtual Private Network (VPN) access controls
- Contributed to security quality processes, producing infrastructure documentation and supporting audit and compliance readiness activities

KEY ACHIEVEMENTS

- Built and owned a structured vulnerability and exposure management programme using Tenable.io and Pentera Breach and Attack Simulation (BAS), enabling continuous exposure tracking, attack path validation, and evidence-based remediation prioritisation across a complex hybrid estate
- Led end-to-end deployment of CrowdStrike Falcon Endpoint Detection and Response (EDR), Prevent, NG-SIEM, Insight, and Discover across an 8,000-user estate, significantly reducing mean time to detect (MTTD) and mean time to respond (MTTR)
- Reduced incident response dwell time by developing Security Orchestration Automation and Response (SOAR) playbooks automating triage and containment for common alert types
- Developed and maintained a library of MITRE ATT&CK-aligned detection rules in Microsoft Sentinel, improving threat coverage and reducing detection gaps across endpoint, identity, and network telemetry
- Achieved and maintained Cyber Essentials Plus (CE+) certification, leading technical control testing, evidence collection, and remediation coordination across infrastructure teams
- Designed and delivered phishing simulation and security awareness training programmes that measurably reduced click-through rates and improved organisational resilience year-on-year

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
