

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | Financial Services Security

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of hands-on experience implementing and maintaining robust security across large enterprise environments. I specialise in CrowdStrike Falcon Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, with strong expertise in managing alert response, incident investigation and remediation at scale. I bring deep practical knowledge of Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA) and Single Sign-On (SSO), alongside Microsoft Intune for Mobile Device Management (MDM) and Mobile Application Management (MAM), Mimecast email security gateway, BeyondTrust Privileged Access Management (PAM), and vulnerability management using Tenable.io, AppCheck and Pentera Breach and Attack Simulation (BAS). I have managed Web Application Firewalls (WAF), Intrusion Detection and Prevention Systems (IDS/IPS), and firewall policy across complex multi-site infrastructure, and regularly delivered security awareness training and remediated penetration test findings. I hold the Certified Information Systems Security Professional (CISSP) certification and am experienced in operating within regulated, high-availability environments requiring strict security controls.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR) / Extended Detection and Response (XDR):** CrowdStrike Falcon (EDR, Prevent, Next-Generation SIEM, Insight, Discover), Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI)
- **Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR):** Microsoft Sentinel with Kusto Query Language (KQL), CrowdStrike Falcon Next-Generation SIEM (NG-SIEM), detection engineering, playbook automation
- **Identity and Access Management:** Microsoft Entra ID (Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), Group Policy
- **Email and Web Security Gateways:** Mimecast (phishing protection, impersonation detection, Data Loss Prevention)
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune, policy enforcement at scale
- **Privileged Access Management (PAM):** BeyondTrust PAM, least-privilege enforcement, session recording
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentera Breach and Attack Simulation (BAS), penetration test remediation
- **Network and Perimeter Security:** Check Point Harmony firewall, WAF/DDoS mitigation, IDS/IPS, firewall policy management
- **Scripting and Automation:** PowerShell, SOAR automation engineering
- **Frameworks and Standards:** NIST Cybersecurity Framework (CSF), NIST 800-61 Incident Response, MITRE ATT&CK, CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Lead SIEM operations using Microsoft Sentinel and CrowdStrike Falcon NG-SIEM, engineering custom detection rules and managing SOAR playbooks to automate alert triage and accelerate incident response across a complex multi-site environment
- Manage CrowdStrike Falcon EDR and Microsoft Defender for Endpoint (MDE) alert response, performing XDR correlation and containment, reducing mean time to detect (MTTD) and mean time to respond

(MTTR) to security incidents

- Administer Mimecast email security gateway, configuring phishing protection policies, impersonation detection rules and Data Loss Prevention (DLP) controls to protect users from email-borne threats
- Maintain Microsoft Entra ID (formerly Azure Active Directory), managing Conditional Access policies, Multi-Factor Authentication (MFA) enforcement and Single Sign-On (SSO) integrations across enterprise applications
- Oversee Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune, enforcing device compliance and application security policies across an 8,000-user estate
- Manage BeyondTrust Privileged Access Management (PAM) platform, enforcing least-privilege principles and securing administrative access to critical systems
- Conduct vulnerability scans using Tenable.io, AppCheck and Pentera Breach and Attack Simulation (BAS), triaging findings by severity and coordinating remediation with infrastructure teams
- Deliver security awareness training and phishing simulation campaigns, measurably reducing end-user susceptibility to social engineering attacks
- Remediate penetration test findings across infrastructure and application layers, tracking progress through to closure
- Lead incident response activities following the NIST 800-61 framework, mapping adversary behaviour to MITRE ATT&CK Tactics, Techniques and Procedures (TTPs) to guide containment and eradication
- Manage WAF/DDoS controls and IDS/IPS systems as part of the organisation's layered perimeter security posture

University of the Arts, London (UAL)

March 2022 - March 2025

Cyber Security Analyst, Cyber Security and Identity

- Monitored and triaged security alerts from SIEM, EDR and email gateway platforms, escalating and remediating threats in line with established incident response playbooks
- Supported deployment and configuration of Microsoft Defender for Endpoint (MDE) and CrowdStrike Falcon across the enterprise, contributing to a unified XDR security operations capability
- Administered Entra ID and Azure Active Directory (Azure AD), managing user access controls, Group Policy Objects (GPOs) and Conditional Access policies to enforce Zero Trust principles
- Managed Mimecast email security gateway day-to-day, reducing phishing and malware delivery to end users through policy tuning and threat intelligence integration
- Conducted vulnerability management activities using Tenable.io and Nessus, tracking remediation status across the estate and reporting progress to senior stakeholders
- Supported incident response and forensic investigation activities, maintaining detailed incident records, timelines and post-incident review reports
- Administered Multi-Factor Authentication (MFA) and Single Sign-On (SSO) rollouts across the enterprise, improving authentication security posture
- Developed and maintained PowerShell scripts for security automation, log analysis and reporting, reducing manual operational overhead
- Contributed to security awareness training content and campaigns targeted at high-risk user groups

HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Implemented and maintained security controls across a SaaS cloud environment, covering endpoint protection, identity and access management, and network security
- Managed firewall policies and network access controls, ensuring compliance with security standards and protecting cloud-hosted services
- Administered Multi-Factor Authentication (MFA) and user provisioning processes, enforcing access governance across the organisation
- Conducted vulnerability assessments and supported patch management activities to maintain a strong security posture for cloud and on-premises infrastructure
- Contributed to IT quality assurance and infrastructure improvement initiatives, supporting business continuity and operational resilience in a high-growth FinTech environment

KEY ACHIEVEMENTS

- Deployed and managed Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across an 8,000-user estate at UAL, delivering consolidated XDR visibility and significantly improving threat detection capability
- Engineered automated SOAR playbooks in Microsoft Sentinel, reducing analyst alert fatigue and cutting mean time to respond (MTTR) to high-priority security incidents
- Implemented BeyondTrust Privileged Access Management (PAM), eliminating standing administrative access and substantially reducing the risk of credential-based attacks and insider threats
- Drove vulnerability remediation programmes using Tenable.io and Pentera Breach and Attack Simulation (BAS), achieving measurable reduction in critical and high-severity vulnerability exposure across the estate
- Led phishing simulation and security awareness training campaigns, achieving a marked reduction in user click rates and improving the organisation's human-layer security posture
- Managed the deployment and tuning of CrowdStrike Falcon across the enterprise, leveraging Insight for threat hunting and Discover for asset visibility to strengthen the overall security programme

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
