

PROSPER AWUNI

Senior Cyber Security Analyst | Incident Response | SIEM/EDR/XDR | Threat Hunting | Professional Services

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Analyst with over five years of experience in enterprise security operations, specialising in monitoring, investigating and responding to cyber security alerts and incidents at scale. I have led incident response activities across complex multi-site environments, conducting threat hunting, threat modelling and adversary analysis using MITRE ATT&CK Tactics, Techniques and Procedures (TTPs) and NIST 800-61 methodology. I bring strong hands-on expertise in Security Information and Event Management (SIEM) using Microsoft Sentinel with Kusto Query Language (KQL) and CrowdStrike Falcon Next-Generation SIEM (NG-SIEM), alongside Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR) capabilities through CrowdStrike Falcon and the Microsoft Defender suite. I have managed vulnerability remediation programmes, coordinated penetration testing activities and driven continuous improvement of Security Orchestration, Automation and Response (SOAR) tooling to enhance detection and response efficiency. I hold the Certified Information Systems Security Professional (CISSP) certification and have operated across large professional environments, protecting an 8,000-user estate against evolving cyber threats while shaping and maturing the organisation's cyber security operations capability.

CORE SKILLS AND TECHNICAL STACK

- **Security Information and Event Management (SIEM):** Microsoft Sentinel with Kusto Query Language (KQL), CrowdStrike Falcon Next-Generation SIEM (NG-SIEM), custom detection rule engineering, alert investigation and triage
- **Endpoint Detection and Response (EDR) / Extended Detection and Response (XDR):** CrowdStrike Falcon (EDR, Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Security Orchestration, Automation and Response (SOAR):** Microsoft Sentinel SOAR playbooks, automation engineering, SOAR-driven alert triage
- **Incident Response:** NIST 800-61 methodology, containment, eradication and recovery, post-incident review, digital forensics support
- **Threat Hunting and Threat Modelling:** CrowdStrike Falcon Insight, proactive adversary hunting, MITRE ATT&CK framework mapping, threat modelling exercises
- **Vulnerability Management and Penetration Testing Support:** Tenable.io, AppCheck, Nessus, Pentera Breach and Attack Simulation (BAS), penetration test remediation coordination
- **Identity and Access Management:** Microsoft Entra ID (Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO)
- **Privileged Access Management (PAM):** BeyondTrust PAM
- **Email and Web Security:** Mimecast, Microsoft Defender for Office 365
- **Scripting and Automation:** PowerShell scripting, SOAR automation
- **Frameworks and Standards:** NIST Cybersecurity Framework (CSF), NIST 800-61, MITRE ATT&CK, CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Monitor, investigate and respond to cyber security alerts and incidents across SIEM, EDR and XDR platforms, leading triage and containment activities to minimise dwell time and business impact
- Lead incident response activities following NIST 800-61, applying MITRE ATT&CK Tactics, Techniques and Procedures (TTPs) to analyse adversary behaviour, guide eradication efforts and produce post-incident reviews

- Conduct proactive threat hunting using CrowdStrike Falcon Insight and Microsoft Sentinel, identifying previously undetected adversary activity and lateral movement within the enterprise environment
- Perform threat modelling exercises to anticipate attack vectors and inform security control improvements, supporting the continuous maturation of the organisation's cyber security operations capability
- Manage vulnerability remediation activities using Tenable.io, AppCheck and Pentra Breach and Attack Simulation (BAS), prioritising findings by risk and coordinating remediation with infrastructure and development teams
- Coordinate and support penetration testing activities, triaging findings, tracking remediation progress and reporting outcomes to senior stakeholders
- Engineer custom detection rules and SOAR automation playbooks in Microsoft Sentinel and CrowdStrike Falcon NG-SIEM, improving detection coverage and accelerating incident response
- Manage and continuously improve SIEM, EDR/XDR and supporting security tooling, including alert tuning to reduce false positives and improve analyst efficiency
- Administer Microsoft Entra ID, Conditional Access, Multi-Factor Authentication (MFA) and BeyondTrust Privileged Access Management (PAM), maintaining strong identity and access controls across the enterprise
- Deliver security awareness training and phishing simulation campaigns to reduce the organisation's human-layer attack surface

University of the Arts, London (UAL)

March 2022 - March 2025

Cyber Security Analyst, Cyber Security and Identity

- Monitored and investigated security alerts from SIEM and EDR platforms, escalating and remediating threats in accordance with incident response playbooks and service level agreements
- Supported incident response activities, maintaining detailed incident records, evidence chains and post-incident reports to drive lessons-learned and control improvements
- Contributed to proactive threat hunting using CrowdStrike Falcon Insight, querying telemetry to identify anomalous behaviour and suspicious patterns across the estate
- Participated in vulnerability management activities using Tenable.io and Nessus, tracking remediation status, escalating overdue findings and reporting metrics to senior stakeholders
- Supported penetration testing coordination, gathering findings and working with technical teams to validate and track remediation through to closure
- Assisted in deploying and tuning CrowdStrike Falcon and Microsoft Defender for Endpoint (MDE), improving detection coverage and reducing false positive rates
- Administered Entra ID, Azure Active Directory (Azure AD) and Conditional Access policies, enforcing Zero Trust access controls and least-privilege principles across the organisation
- Managed Mimecast email security gateway, tuning anti-phishing, anti-spoofing and impersonation detection policies to reduce malicious email delivery
- Developed PowerShell scripts for security automation, log parsing and reporting, improving analyst efficiency and reducing manual effort

HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Monitored security events and responded to alerts across a SaaS cloud environment, supporting detection and response activities for the organisation's infrastructure
- Implemented and maintained endpoint protection, identity and access management controls and network security policies to maintain a robust security posture
- Conducted vulnerability assessments and supported patch management to identify and address security weaknesses across cloud and on-premises systems
- Administered Multi-Factor Authentication (MFA) and user provisioning processes, enforcing access governance and reducing the risk of unauthorised access
- Contributed to IT quality assurance and infrastructure resilience initiatives in a fast-paced FinTech SaaS environment

KEY ACHIEVEMENTS

- Led incident response across multiple high-priority security incidents at UAL, applying NIST 800-61 methodology and MITRE ATT&CK framework to achieve rapid containment and full eradication, with clear post-incident recommendations adopted by the security team
- Conducted proactive threat hunting campaigns using CrowdStrike Falcon Insight and Microsoft Sentinel, surfacing previously undetected adversary activity and enabling pre-emptive containment before incidents escalated
- Deployed and managed SIEM and SOAR capabilities across an 8,000-user enterprise environment, authoring detection rules and automated playbooks that materially reduced mean time to detect (MTTD) and mean time to respond (MTTR)
- Managed comprehensive vulnerability remediation and penetration testing coordination programmes using Tenable.io and Pentera Breach and Attack Simulation (BAS), systematically reducing the organisation's critical and high-severity attack surface
- Drove continuous improvement of EDR/XDR tooling by tuning CrowdStrike Falcon and Microsoft Defender for Endpoint (MDE) alert thresholds, delivering a significant reduction in false positive volumes and improving analyst focus on genuine threats
- Held CISSP certification throughout tenure, contributing to the organisation's alignment with NIST Cybersecurity Framework (CSF), CIS Controls and Cyber Essentials Plus requirements

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
