

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike, SIEM/SOAR and Security Operations

United Kingdom (Hybrid) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniproper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience designing, implementing and operating enterprise security controls. I have deep expertise in Endpoint Detection and Response (EDR) using CrowdStrike Falcon, Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) operations, Privileged Access Management (PAM), vulnerability management and incident response. I have a strong track record of managing email security gateways, Mobile Device Management (MDM) and Mobile Application Management (MAM), Multi-Factor Authentication (MFA), Single Sign-On (SSO) and identity controls across large, complex environments. I have supported penetration test remediation, delivered security awareness programmes and collaborated with small, focused security teams to protect critical infrastructure. I am seeking a Senior Cyber Security Engineer role within a structured security environment where I can apply my breadth of hands-on tooling experience to drive measurable risk reduction.

CORE SKILLS AND TECHNICAL STACK

- **EDR / Endpoint Security:** CrowdStrike Falcon (NG-SIEM, EDR Prevent, Insight, Discover), Tanium, Microsoft Defender for Endpoint (MDE)
- **SIEM / SOAR:** Microsoft Sentinel with Kusto Query Language (KQL), CrowdStrike NG-SIEM, SOAR playbook development and automation via PowerShell and Logic Apps
- **Email and Web Security:** Mimecast (anti-phishing, anti-spoofing, data loss prevention), web proxy and gateway management
- **Identity and Access Management:** Microsoft Entra ID / Azure Active Directory (AD), Conditional Access, MFA, SSO, Role-Based Access Control (RBAC)
- **Privileged Access Management (PAM):** BeyondTrust (session recording, just-in-time access, privileged account lifecycle)
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune, device compliance and policy enforcement
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS); risk-based prioritisation and remediation tracking
- **Firewall and Network Security:** Check Point Harmony Firewall, Intrusion Detection System (IDS) / Intrusion Prevention System (IPS) rule management
- **Incident Response (IR):** NIST 800-61 framework, MITRE ATT&CK-aligned threat analysis, root cause analysis, containment and recovery
- **Frameworks and Standards:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus
- **Scripting and Automation:** PowerShell, Logic Apps, SOAR playbook development

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 – Present

Senior Cyber Security Analyst / Engineer

- Lead the engineering, configuration and operations of CrowdStrike Falcon across the enterprise, encompassing NG-SIEM, EDR Prevent, Falcon Insight and Falcon Discover, delivering full endpoint visibility and significantly reducing mean time to detect and respond to threats.
- Manage SIEM and SOAR operations using Microsoft Sentinel and CrowdStrike NG-SIEM: triage and investigate security alerts, develop and tune detection rules, and build automated SOAR playbooks in PowerShell and Logic Apps to accelerate response and reduce analyst workload.
- Administer the Mimecast email security gateway, managing anti-phishing, anti-spoofing, attachment sandboxing and Data Loss Prevention (DLP) policies across a 15,000-user institution.

- Manage MDM and MAM controls via Microsoft Intune, enforcing device compliance policies and application protection across iOS, Android and Windows endpoints.
- Administer Microsoft Entra ID (formerly Azure Active Directory) including Conditional Access policies, MFA enforcement and SSO integrations to secure identity across staff and student populations.
- Operate BeyondTrust Privileged Access Management (PAM) to manage privileged account lifecycles, session recording and just-in-time access, minimising standing privileges across critical systems.
- Lead vulnerability management programme using Tenable.io, Nessus and AppCheck; correlate findings against business risk, prioritise remediation activity and track closure through structured reporting to stakeholders.
- Conduct Breach and Attack Simulation (BAS) using Pentera to test security control effectiveness and validate defensive coverage against MITRE ATT&CK techniques.
- Lead Incident Response (IR) activities following NIST 800-61, performing end-to-end investigation, containment, eradication and post-incident reporting across a range of security events including ransomware, phishing and insider threat scenarios.
- Manage Intrusion Detection and Prevention System (IDS/IPS) rules and tuning within CrowdStrike and Tanium platforms to improve detection fidelity and reduce false positives.
- Coordinate remediation of penetration test findings, liaising with third-party test teams and internal stakeholders to prioritise and close identified vulnerabilities within agreed timelines.
- Design and deliver security awareness training and phishing simulation programmes to educate staff and students, reducing susceptibility rates measurably year on year.
- Maintain security certificates and PKI infrastructure, and manage firewall policy reviews using Check Point Harmony to enforce least-privilege network access.

University of the Arts, London (UAL)

March 2022 – March 2025

Cyber Security Analyst, Cyber Security and Identity

- Monitored and investigated SIEM alerts and Security Operations Centre (SOC) dashboards, performing initial triage, escalation and incident handling across the Cyber Security and Identity team.
- Administered identity and access management controls within Azure Active Directory, managing account provisioning, de-provisioning, RBAC and lifecycle policies for staff and students.
- Supported vulnerability management activities using Nessus and Tenable, producing risk-based remediation reports for both technical and non-technical stakeholders.
- Contributed to firewall policy reviews and network segmentation using Check Point Harmony, ensuring traffic rules aligned with the principle of least privilege.
- Assisted with MDM and MAM policy configuration in Microsoft Intune, supporting device compliance monitoring and remediation for managed endpoints.
- Participated in Incident Response exercises and live incident handling, developing playbooks for common threat scenarios including phishing and credential compromise.
- Supported delivery of security awareness campaigns and contributed to the university's Cyber Essentials Plus and ISO 27001-aligned security posture.

HICX Solutions Ltd (SaaS / FinTech)

February 2021 – March 2022

IT Engineer: Security, Quality and Infrastructure

- Implemented and maintained security controls across cloud and on-premises infrastructure within a Software as a Service (SaaS) and financial technology (FinTech) environment, supporting engineering and operations teams.
- Managed network security tooling including firewall configuration and access control list reviews, ensuring compliance with internal security policies.
- Conducted system hardening activities across Windows and Linux servers, reducing attack surface in line with CIS Controls benchmarks.
- Supported endpoint protection deployment, MDM policy configuration and security incident investigation, including initial triage and escalation of alerts.
- Contributed to security quality assurance processes, including change management reviews and vulnerability assessment activities.

KEY ACHIEVEMENTS

- Deployed and operationalised CrowdStrike Falcon NG-SIEM and EDR across the enterprise, achieving full endpoint visibility and reducing mean time to detect by over 40%.
- Led the deployment of Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI) and Microsoft 365 Defender across 8,000 users, improving threat detection coverage across identity, email and endpoint vectors.
- Implemented BeyondTrust Privileged Access Management (PAM) from design to production, eliminating standing privileged access and reducing risk exposure across critical systems.
- Designed and tuned detection rules in Microsoft Sentinel and CrowdStrike NG-SIEM using KQL and custom logic, reducing false positives by a significant margin and improving alert fidelity for the SOC.
- Built SOAR automation playbooks using PowerShell and Logic Apps, automating repetitive alert response workflows and reducing analyst workload across common incident types.
- Conducted Pentera Breach and Attack Simulation (BAS) campaigns and Tenable vulnerability assessments, identifying and driving remediation of critical vulnerabilities before they could be exploited.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
