PROSPER AWUNI

Senior IT Security Analyst / Engineer

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) and Senior IT Security Analyst and Engineer with over five years of experience operationalising and leading enterprise cybersecurity domains, with specialist expertise in CrowdStrike Falcon administration, tuning, and Endpoint Detection and Response (EDR) investigation. At University of the Arts London I lead the security operations function across an 8,000-user estate, administering and optimising CrowdStrike Falcon across prevention, detection, and discovery modules to deliver comprehensive endpoint and identity protection. I have a strong track record of leading and operationalising key cybersecurity domains including endpoint security, identity security using Azure Active Directory and BeyondTrust Privileged Access Management (PAM), incident response aligned to NIST 800-61, and vulnerability management. I bring proven skills in Security Information and Event Management (SIEM) operations using Microsoft Sentinel and Kusto Query Language (KQL), SOAR automation, and detection engineering, and am experienced in network security through Check Point Harmony firewall management. My technical breadth, combined with my ability to drive security programmes from strategy through to hands-on delivery, makes me well-placed to lead and operationalise cybersecurity across complex enterprise environments.

CORE SKILLS AND TECHNICAL STACK

- **CrowdStrike Falcon:** Expert-level administration and tuning of CrowdStrike Falcon including NG-SIEM, EDR/Prevent, Falcon Insight (threat hunting), and Falcon Discover (asset visibility and identity); EDR investigation and alert triage
- **Endpoint and Identity Security:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 (M365) Defender, BeyondTrust PAM, Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM)
- **SIEM and Automation:** Microsoft Sentinel, Kusto Query Language (KQL), detection rule authoring, SOAR playbook development, PowerShell scripting
- **Incident Response:** NIST 800-61, MITRE ATT&CK, end-to-end incident lifecycle management, containment and remediation
- **Network and Perimeter Security:** Check Point Harmony firewall, network traffic analysis, Tanium
- **Email Security:** Mimecast administration, phishing investigation, email policy management
- **Identity and Access Management:** Azure Active Directory (Azure AD) / Microsoft Entra ID, Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO)
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Cloud Security:** Microsoft Azure, Amazon Web Services (AWS)
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)
Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Lead the administration, tuning, and optimisation of CrowdStrike Falcon across prevention, EDR, NG-SIEM, Insight, and Discover modules for an 8,000-user estate, ensuring detection quality and minimising false positives
- Conduct in-depth CrowdStrike Falcon EDR investigations, analysing process trees, network connections, and file system activity to determine scope, root cause, and impact of security incidents
- Lead incident response end-to-end using the NIST 800-61 framework, from initial detection and triage through containment, eradication, and recovery, mapping adversary behaviour to MITRE ATT&CK
- Operationalise key cybersecurity domains including endpoint protection, identity and access management, vulnerability management, and SIEM operations, aligning them to NIST Cybersecurity Framework and CIS Controls
- Administer BeyondTrust Privileged Access Management to enforce least-privilege principles and reduce attack surface across administrator and service accounts

- Manage Microsoft Defender for Endpoint and Identity, configuring detection policies, investigating alerts, and remediating threats across endpoint and identity domains
- Author Sentinel detection rules and KQL queries, and develop SOAR automation playbooks to accelerate analyst response and reduce mean time to respond
- Oversee vulnerability management using Tenable.io, AppCheck, and Pentera Breach and Attack Simulation, prioritising findings by risk and tracking remediation progress
- Govern network security through Check Point Harmony firewall administration and policy management, and manage email security controls via Mimecast
- Manage endpoint fleet visibility through Tanium and enforce device compliance policies via Microsoft Intune Mobile Device Management
- Produce security metrics, risk dashboards, and incident reports for senior leadership and technical teams

University of the Arts, London (UAL)
Cyber Security Analyst, Cyber Security and Identity *March 2022 - March 2025*

- Supported CrowdStrike Falcon operations including alert triage, policy management, and EDR investigation for the university's endpoint estate
- Investigated security incidents and alerts raised by CrowdStrike Falcon, Microsoft Defender, and Microsoft Sentinel, performing log analysis and threat correlation to determine severity and scope
- Supported deployment of Microsoft Defender for Endpoint to 8,000 devices, configuring detection policies, onboarding endpoints, and tuning alerts to reduce noise
- Managed Azure Active Directory identity controls including Conditional Access policies, MFA configuration, and access reviews to strengthen identity security posture
- Conducted vulnerability assessments using Nessus and Tenable.io, coordinating remediation with infrastructure and application teams
- Administered Mimecast email security, investigating phishing campaigns and implementing anti-spoofing, anti-malware, and URL protection policies
- Contributed to incident response playbook development and tabletop exercises aligned to NIST 800-61 and MITRE ATT&CK
- Supported Cyber Essentials Plus certification assessments, gathering evidence and remediating identified gaps across endpoint, network, and identity controls

HICX Solutions Ltd (SaaS/FinTech)
IT Engineer: Security, Quality and Infrastructure *February 2021 - March 2022*

- Delivered security and IT engineering for a Software-as-a-Service FinTech organisation, managing endpoint security, access controls, and infrastructure hardening
- Administered identity and access management solutions including MFA and SSO to protect user accounts and reduce credential-based risk
- Supported security audits and assessments aligned to ISO 27001 and CIS Controls, identifying gaps and tracking remediation
- Managed cloud and on-premises infrastructure across AWS and Azure, applying security configurations and monitoring for anomalous activity
- Provided technical support and engineering for security tools, networking equipment, and managed devices across the organisation

KEY ACHIEVEMENTS

- Deployed and operationalised CrowdStrike Falcon NG-SIEM, Discover, and Insight modules across UAL, delivering enterprise-wide endpoint visibility, threat hunting capability, and advanced threat correlation
- Led the Microsoft Defender for Endpoint rollout across 8,000 users, establishing full EDR coverage and reducing incident detection time across the endpoint estate
- Implemented BeyondTrust Privileged Access Management across the UAL estate, enforcing least-privilege access and reducing the risk of privileged account compromise
- Developed an automated incident response workflow using PowerShell and SOAR playbooks, reducing average analyst investigation time and improving response consistency

- Successfully led UAL through Cyber Essentials Plus recertification by identifying and remediating critical control gaps across endpoint, network, identity, and patch management domains
- Built a proactive threat hunting programme using CrowdStrike Falcon Insight and Pentera Breach and Attack Simulation outputs, identifying and mitigating high-risk attack paths across the estate

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
