

PROSPER AWUNI

Senior Cyber Security Analyst | SIEM | EDR/XDR | Threat Hunting | Incident Response | Azure Security
| Vulnerability Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Analyst with over five years of experience monitoring, investigating and responding to cyber security alerts and incidents across enterprise-scale global infrastructure. I have strong, hands-on expertise with Security Information and Event Management (SIEM), Endpoint Detection and Response (EDR/XDR), Intrusion Detection and Prevention Systems (IDS/IPS), and firewalls, combined with deep knowledge of Microsoft Azure security technologies including Microsoft Sentinel, Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft Entra ID. I am experienced in leading incident response activities following the National Institute of Standards and Technology (NIST) SP 800-61 framework, conducting threat hunting exercises, managing vulnerability remediation and penetration testing programmes, and applying the Center for Internet Security (CIS) Controls, ISO 27001, and MITRE ATT&CK framework. I am seeking a Senior Cyber Security Analyst role within a leading international professional services firm where I can continue to shape and mature cyber operations at enterprise scale.

CORE SKILLS AND TECHNICAL STACK

- **SIEM and SOAR:** Microsoft Sentinel (KQL), CrowdStrike Falcon NG-SIEM, Security Orchestration Automation and Response (SOAR) playbook development, alert triage and tuning
- **EDR/XDR:** CrowdStrike Falcon (EDR, Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender (XDR)
- **IDS/IPS and Firewalls:** Intrusion detection and prevention monitoring, Check Point Harmony firewall, perimeter defence management, network traffic analysis
- **Microsoft Azure Security Technologies:** Microsoft Entra ID (Azure Active Directory), Conditional Access, Privileged Identity Management (PIM), Microsoft Defender for Cloud, Azure security policies
- **Threat Hunting and Threat Intelligence:** Proactive threat hunting using KQL and CrowdStrike Falcon Insight, indicator of compromise (IOC) analysis, MITRE ATT&CK-led hunting, threat intelligence integration
- **Incident Response:** NIST SP 800-61 Incident Response lifecycle, containment, eradication and recovery, post-incident lessons learnt, digital forensics support
- **Vulnerability Management and Penetration Testing:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS), remediation tracking, risk-based prioritisation
- **Identity and Access Management (IAM):** MFA (Multifactor Authentication), SSO (Single Sign-On), BeyondTrust PAM (Privileged Access Management), Microsoft Intune MDM/MAM
- **Frameworks:** NIST CSF (Cybersecurity Framework), ISO 27001, CIS Controls, Cyber Essentials Plus, MITRE ATT&CK
- **Scripting and Automation:** PowerShell scripting, SOAR playbook development, automated reporting

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Monitor, investigate and respond to cyber security alerts and incidents across enterprise-scale infrastructure, triaging events from SIEM (Microsoft Sentinel), EDR (CrowdStrike Falcon) and XDR (Microsoft 365 Defender) platforms
- Lead incident response activities end-to-end following the NIST SP 800-61 framework, coordinating containment, eradication and recovery, and producing post-incident reports mapping adversary behaviour to the MITRE ATT&CK framework
- Conduct proactive threat hunting exercises using CrowdStrike Falcon Insight and Microsoft Sentinel KQL, identifying latent threats and indicators of compromise across the estate

- Manage vulnerability remediation and penetration testing programmes using Tenable.io, AppCheck and Pentera BAS, tracking findings from discovery through to evidenced closure and producing risk-based prioritisation reports for senior stakeholders
- Support and administer SIEM, EDR/XDR and security tooling, including design and continuous tuning of detection rules in Microsoft Sentinel (KQL) and CrowdStrike Falcon NG-SIEM to improve detection fidelity and reduce false positives
- Administer Microsoft Azure security technologies including Microsoft Entra ID, Conditional Access, PIM and Microsoft Defender for Cloud, maintaining robust identity and access governance across the organisation
- Deploy and manage Microsoft Defender for Endpoint (MDE) across 8,000 users, enforcing endpoint compliance and security baselines at enterprise scale
- Govern privileged access via BeyondTrust PAM, controlling administrative credentials and session recording in line with least-privilege principles
- Develop and maintain SOAR playbooks and PowerShell automation to streamline incident triage, response and reporting workflows
- Produce threat intelligence reporting, communicating technical findings and risk recommendations to both technical teams and executive stakeholders

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Monitored and investigated cyber security alerts across SIEM and EDR/XDR platforms, triaging incidents and escalating confirmed threats in line with documented incident response procedures
- Performed threat hunting exercises using CrowdStrike Falcon EDR, identifying endpoint anomalies and indicators of compromise and supporting containment activities
- Managed vulnerability assessment activities using Tenable.io and Nessus, tracking remediation progress and reporting on risk exposure to management
- Supported identity and access management (IAM) governance via Microsoft Entra ID (Azure Active Directory), including Conditional Access policy reviews and MFA/SSO enforcement
- Contributed to incident response activities, including post-incident lessons learnt reviews and improvements to security procedures and tooling configurations
- Contributed to the successful delivery of Cyber Essentials Plus certification, demonstrating compliance with NCSC baseline security controls
- Produced security documentation, runbooks and reports to maintain an auditable record of security operations activity

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Supported security engineering and monitoring activities across a Software as a Service (SaaS) and FinTech environment, including endpoint security tooling deployment and integration
- Conducted infrastructure security assessments, identifying vulnerabilities and implementing improvements to access controls, endpoint protection and monitoring capabilities
- Assisted with quality assurance for security controls, contributing to audit and compliance activities and documenting security procedures and configurations
- Collaborated with development and infrastructure teams to embed security best practices within the software development lifecycle and infrastructure delivery processes

KEY ACHIEVEMENTS

- Led deployment of Microsoft Defender for Endpoint (MDE) across 8,000 users at University of the Arts London, delivering enterprise-wide endpoint visibility and materially reducing threat dwell time
- Designed and tuned CrowdStrike Falcon NG-SIEM and Microsoft Sentinel detection rules using KQL, reducing false positive alert volumes and improving Security Operations Centre (SOC) analyst efficiency
- Delivered proactive threat hunting campaigns that identified latent adversary activity not surfaced by automated alerting, enabling earlier containment and reduced organisational risk
- Managed vulnerability management programme using Pentera BAS, Tenable.io and AppCheck, achieving consistent remediation of critical and high findings within agreed service level timeframes

- Automated incident response workflows using PowerShell and SOAR playbooks, reducing mean time to respond and freeing analyst capacity for higher-value investigation work
- Contributed to successful Cyber Essentials Plus certification and ongoing ISO 27001-aligned security operations, supporting organisational risk management and compliance posture

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
