

PROSPER AWUNI

Senior Cyber Security Engineer | SIEM, EDR and Security Platform Specialist

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of experience managing and optimising enterprise security platforms across large, complex organisations. I specialise in Security Information and Event Management (SIEM), Security Orchestration, Automation and Response (SOAR), Endpoint Detection and Response (EDR), Privileged Access Management (PAM), and vulnerability management. I have deep hands-on expertise in CrowdStrike Falcon (including NG-SIEM, EDR, Prevent, Insight and Discover modules), Microsoft Sentinel with Kusto Query Language (KQL), and the Microsoft Defender suite including Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI) and Microsoft 365 Defender. I am experienced in managing web and email security gateways including Mimecast, administering Entra ID (formerly Azure Active Directory) with Conditional Access policies, Multi-Factor Authentication (MFA) and Single Sign-On (SSO), and delivering Mobile Device Management (MDM) and Mobile Application Management (MAM) through Intune. I have a proven track record in remediating penetration test findings, delivering security awareness training, and managing Identity and Access Management (IAM) and PAM controls using BeyondTrust. I am now seeking a focused senior engineering position within a small, high-performing security team where I can apply my breadth of technical expertise to protect critical infrastructure and drive continuous security improvement.

CORE SKILLS AND TECHNICAL STACK

- **SIEM and SOAR:** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel (KQL), detection rule creation, alert triage, security automation
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon Prevent, Insight, Discover; Microsoft Defender for Endpoint (MDE)
- **Email and Web Security Gateways:** Mimecast, web proxy configuration, anti-phishing and anti-spam policy management
- **Identity and Access Management (IAM) and Privileged Access Management (PAM):** Entra ID (Azure Active Directory), Conditional Access, MFA, SSO; BeyondTrust PAM
- **Mobile Device Management (MDM) and Mobile Application Management (MAM):** Microsoft Intune, endpoint compliance policy enforcement
- **Vulnerability Management:** Tenable.io, AppCheck, Pentera Breach Attack Simulation (BAS); vulnerability scanning, remediation tracking, risk prioritisation
- **Firewall and Network Security:** Check Point Harmony; WAF and DDoS mitigation principles; IDS/IPS administration
- **Incident Response:** NIST SP 800-61, MITRE ATT&CK framework, threat hunting, security incident lifecycle management
- **Cloud Security:** Microsoft Azure, Entra ID, Microsoft 365 security controls
- **Security Awareness:** Delivery of staff security awareness training programmes
- **Frameworks and Standards:** NIST CSF, CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK
- **Scripting and Automation:** PowerShell, SOAR automation workflows

PROFESSIONAL EXPERIENCE

- University of the Arts, London (UAL) - Senior Cyber Security Analyst/Engineer** (March 2025 - Present)
- Responsible for managing and optimising enterprise security platforms including CrowdStrike Falcon NG-SIEM, Microsoft Sentinel, and Microsoft Defender for Endpoint (MDE) across an estate of over 8,000 users.
- Administer and tune SIEM and SOAR detection rules using KQL and CrowdStrike NG-SIEM, reducing alert noise and improving mean time to detect (MTTD) and mean time to respond (MTTR) for security incidents.

- Manage CrowdStrike Falcon EDR (Prevent, Insight, Discover) policies and configurations across all endpoints, ensuring consistent coverage and timely response to threats.
- Oversee the full vulnerability management lifecycle using Tenable.io and AppCheck, coordinating remediation activities and tracking risk reduction across the estate.
- Administer Entra ID (Azure Active Directory) including Conditional Access policies, MFA enforcement and SSO configurations to protect identity across the organisation.
- Manage Mimecast email security gateway, configuring anti-phishing, anti-spam and data loss prevention (DLP) policies to reduce email-borne threats.
- Maintain and manage MDM and MAM configurations in Microsoft Intune, enforcing device compliance and application security policies.
- Oversee BeyondTrust Privileged Access Management (PAM) platform, controlling and auditing privileged account access across systems and infrastructure.
- Lead incident response activities in accordance with NIST SP 800-61 and MITRE ATT&CK, serving as a senior escalation point for high-priority security events.
- Deliver security awareness training to staff, improving the organisation's overall security culture and reducing susceptibility to phishing and social engineering.
- Remediate penetration test findings by working with IT and infrastructure teams to implement required technical controls and validate fixes.
- Contribute to security certificate management and IDS/IPS policy maintenance to uphold availability and integrity of security monitoring capabilities.

University of the Arts London (UAL) -- Cyber Security Analyst, Cyber Security and Identity
 Targeted and investigated security alerts from SIEM, EDR, and email security platforms, carrying out structured incident response and root cause analysis. *March 2022 -- March 2025*

- Deployed and managed CrowdStrike Falcon across the enterprise, configuring Falcon Prevent and Insight policies to maximise threat prevention and visibility.
- Managed Mimecast email security gateway policies, responding to email threats and tuning rules to minimise false positives and negatives.
- Administered Azure Active Directory (now Entra ID) Conditional Access, MFA, and SSO, supporting secure identity and access governance for 8,000 users.
- Conducted proactive threat hunting using CrowdStrike Falcon Insight and Microsoft Sentinel, identifying indicators of compromise (IOCs) and attacker behaviours aligned to MITRE ATT&CK.
- Managed vulnerability scanning using Tenable.io, coordinating findings with infrastructure and application teams to drive timely remediation.
- Supported Intune MDM and MAM policy management, onboarding and securing mobile and remote devices.
- Assisted in the management of BeyondTrust PAM controls, reviewing privileged access requests and conducting access audits.
- Contributed to the development and delivery of security awareness training and phishing simulation exercises.
- Produced monthly vulnerability and incident management metrics for security leadership, supporting governance and reporting obligations.

HICX Solutions Ltd (SaaS/FinTech) -- IT Engineer: Security, Quality and Infrastructure
 Delivered security engineering support across cloud and on-premises infrastructure, implementing access controls, endpoint security policies and security monitoring capabilities. *February 2021 -- March 2022*

- Administered identity and access management controls including MFA, SSO and directory services, ensuring least-privilege access across the organisation.
- Conducted vulnerability assessments and coordinated remediation of identified weaknesses across the internal technology estate.
- Supported firewall and network security policy management, and contributed to the configuration of email security controls to protect against phishing and malware.
- Managed device compliance and endpoint security using MDM tooling, ensuring all endpoints met security baselines before network access was granted.

- Contributed to IT security quality processes including risk assessments, policy reviews and the maintenance of security documentation aligned to ISO 27001.

KEY ACHIEVEMENTS

- Deployed and fully configured CrowdStrike Falcon EDR across an estate of over 8,000 users at UAL, achieving near-complete endpoint visibility and significantly reducing dwell time for threats.
- Implemented Microsoft Sentinel as the primary SIEM platform, authoring KQL detection rules aligned to MITRE ATT&CK, reducing false positive rates and improving analyst efficiency.
- Led the implementation of BeyondTrust PAM controls, eliminating standing privileged access for over 200 administrative accounts and improving audit trail quality.
- Deployed Pentera Breach Attack Simulation (BAS) platform to continuously validate security controls, identifying and remediating critical attack paths across the hybrid estate.
- Reduced mean time to respond (MTTR) to security incidents by 40% through SOAR automation workflows built on CrowdStrike and Microsoft Sentinel.
- Achieved and maintained Cyber Essentials Plus certification for UAL, demonstrating compliance with UK government baseline security standards.
- Developed and delivered a security awareness training programme resulting in a measurable reduction in user susceptibility to phishing simulations across the organisation.

EDUCATION

M.Sc. Environmental and Resource Engineering

B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
