

PROSPER AWUNI

Senior Cyber Security Analyst | Professional Services | SIEM | EDR | Stakeholder Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniproper

PROFESSIONAL PROFILE

I am an experienced Senior Cyber Security Analyst with more than five years of experience in cyber security operations, incident response, threat intelligence, and vulnerability management within large, complex enterprise environments. I hold the Certified Information Systems Security Professional (CISSP) certification alongside CompTIA Security+, and I bring strong expertise in Security Information and Event Management (SIEM) platforms, Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR) tooling, network and endpoint security, and Microsoft Azure cloud security technologies. I have a proven ability to communicate effectively with non-technical stakeholders, translating complex security risk into clear and actionable language. I am experienced in delivering proactive, risk-based cyber security operations within regulated and compliance-driven environments, and I bring strong knowledge of security frameworks including NIST, ISO 27001, CIS Controls, and Cyber Essentials Plus. My background supporting large, diverse organisations makes me well placed to operate effectively within a professional services environment requiring mature stakeholder management and a service-oriented approach.

CORE SKILLS AND TECHNICAL STACK

- **Security Information and Event Management (SIEM):** CrowdStrike Next-Generation SIEM (NG-SIEM), Microsoft Sentinel (Kusto Query Language (KQL)), Splunk (Search Processing Language (SPL))
- **Endpoint Detection and Response (EDR) / Extended Detection and Response (XDR):** CrowdStrike Falcon, Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Tanium
- **Network and Endpoint Security:** Check Point Harmony firewall, Intrusion Detection System (IDS) / Intrusion Prevention System (IPS), Mimecast email security
- **Identity and Access Management:** Microsoft Entra ID (formerly Azure Active Directory (AD)), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), BeyondTrust Privileged Access Management (PAM)
- **Microsoft Azure Cloud Security:** Microsoft 365 (M365) Defender, Microsoft Entra ID, Conditional Access, Microsoft Intune
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentra Breach and Attack Simulation (BAS)
- **Threat Intelligence and Incident Response:** NIST 800-61, MITRE ATT&CK, threat hunting, detection engineering, alert triage
- **Scripting and Automation:** PowerShell, Security Orchestration, Automation and Response (SOAR)
- **Compliance Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials+

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Deliver efficient, effective, and proactive day-to-day cyber security operations across an 8,000-user enterprise environment, minimising risk of security incidents through continuous monitoring, threat detection, and rapid response.
- Operate SIEM platforms including CrowdStrike NG-SIEM and Microsoft Sentinel, performing alert triage, threat investigation, and incident response in accordance with the NIST 800-61 framework and MITRE ATT&CK threat model.
- Manage Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR) tooling, including CrowdStrike Falcon (EDR, NG-SIEM, Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE), and Microsoft Defender for Identity (MDI).
- Provide expert cyber security advice and requirements to organisational change programmes, ensuring that security good practice and security-by-design principles are embedded into new and changed

services.

- Deliver threat intelligence-driven threat hunting exercises using the MITRE ATT&CK framework, converting hunt findings into detection rules and tuning recommendations within the SIEM platform.
- Manage vulnerability management programmes using Tenable.io, AppCheck, and Nessus, prioritising remediation based on risk scoring and reporting progress to senior stakeholders in clear, non-technical language.
- Administer Microsoft Entra ID, Conditional Access, Multi-Factor Authentication (MFA), and Single Sign-On (SSO) to maintain strong identity and access controls across the enterprise.
- Manage network and endpoint security tooling including Check Point Harmony firewalls, Intrusion Detection System (IDS) and Intrusion Prevention System (IPS) policies, and Mimecast email security gateway.
- Administer BeyondTrust Privileged Access Management (PAM) to enforce least-privilege access across the infrastructure, including session recording, credential vaulting, and regular access reviews.
- Communicate regularly with senior stakeholders and non-technical colleagues across the university, presenting risk assessments, incident reports, and security improvement recommendations in accessible language.
- Deliver security awareness training and phishing simulation exercises, improving the security culture of the organisation through targeted staff education.

University of the Arts, London (UAL) - Cyber Security and Identity

March 2022 - March 2025

Cyber Security Analyst

- Performed day-to-day cyber security operations within the Cyber Security and Identity function, monitoring SIEM alerts, triaging incidents, and supporting incident response activities across the university estate.
- Supported the deployment of Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 (M365) Defender across an 8,000-user enterprise, delivering Microsoft Azure cloud security at scale.
- Developed KQL (Kusto Query Language) detection queries and correlation rules in Microsoft Sentinel to improve SIEM coverage across endpoint, identity, and network threat vectors.
- Conducted vulnerability scanning using Tenable.io and Nessus, producing risk-based remediation reports and tracking findings through to verified closure.
- Administered Microsoft Entra ID, Conditional Access, and Multi-Factor Authentication (MFA), maintaining secure access controls for a diverse and distributed user population.
- Contributed to threat hunting activities using the MITRE ATT&CK framework, identifying suspicious patterns and potential indicators of compromise within the enterprise environment.
- Engaged with technical and non-technical stakeholders to communicate security findings and support remediation of identified risks.

HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Delivered security, quality, and infrastructure engineering within a Software-as-a-Service (SaaS) and FinTech environment, contributing to secure system operations and security control implementation across cloud and on-premise environments.
- Implemented security controls, identity management policies, and endpoint security configurations, supporting a compliant and well-governed IT environment.

KEY ACHIEVEMENTS

- Delivered proactive, risk-based cyber security operations across an 8,000-user enterprise, significantly improving incident detection-to-response times through SIEM tuning, automated SOAR playbooks, and structured threat hunting.
- Led deployment of Microsoft Defender (MDE, MDI, M365 Defender) organisation-wide to an 8,000-user estate, delivering comprehensive Microsoft Azure cloud security visibility and centralising threat response in Microsoft Sentinel.
- Developed a comprehensive library of KQL detection rules and MITRE ATT&CK-aligned threat hunting playbooks in Microsoft Sentinel and CrowdStrike NG-SIEM, significantly improving detection coverage and reducing mean time to detect security incidents.

- Implemented BeyondTrust Privileged Access Management (PAM) to enforce least-privilege access across a complex hybrid environment, reducing risk of privilege escalation and insider threat.
- Delivered structured vulnerability management cycles using Tenable.io and AppCheck, achieving measurable reduction in critical and high-severity vulnerabilities validated through Pentera Breach and Attack Simulation (BAS) exercises.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
