

PROSPER AWUNI

Senior Cyber Security Analyst | Incident Response | Azure and M365 | SIEM | Vulnerability Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Analyst with more than five years of experience in cyber security operations, including hands-on delivery of incident response, Security Information and Event Management (SIEM), vulnerability management, and threat detection within complex enterprise environments. I have a proven track record of managing cyber security incidents from initial triage through to containment, remediation, and close-down, applying the NIST 800-61 Incident Response framework and the MITRE ATT&CK threat model throughout the full lifecycle. I bring strong expertise in Microsoft Azure and Microsoft 365 (M365) cloud security, including Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft Sentinel with Kusto Query Language (KQL). I have experience across a range of investigation tooling including SIEM log analysis, endpoint analysis, and network traffic review, and I am comfortable supporting and mentoring less experienced team members. I hold the Certified Information Systems Security Professional (CISSP) certification and I bring a methodical, evidence-based approach to cyber investigations and security improvement.

CORE SKILLS AND TECHNICAL STACK

- **Cyber Incident Response:** Full lifecycle management (triage, investigation, containment, eradication, recovery, lessons learned), NIST 800-61, MITRE ATT&CK
- **Security Information and Event Management (SIEM):** Microsoft Sentinel (Kusto Query Language (KQL)), CrowdStrike Next-Generation SIEM (NG-SIEM), Splunk (Search Processing Language (SPL))
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon, Microsoft Defender for Endpoint (MDE), Tanium
- **Cloud Security:** Microsoft Azure Active Directory (AD) / Entra ID, Microsoft 365 (M365) Defender, Microsoft Defender for Identity (MDI), Conditional Access, Multi-Factor Authentication (MFA)
- **Log Analysis and Investigation Tooling:** KQL, Splunk Search Processing Language (SPL), network traffic analysis, endpoint event log analysis
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentera Breach and Attack Simulation (BAS)
- **Threat Hunting and Detection Engineering:** Threat hunting using MITRE ATT&CK, detection rule development, alert triage
- **Email and Identity Security:** Mimecast, BeyondTrust Privileged Access Management (PAM), Microsoft Entra ID
- **Automation:** PowerShell scripting, Security Orchestration, Automation and Response (SOAR)
- **Compliance and Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials+

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Manage and investigate cyber security incidents from initial alert through to close-down, applying the NIST 800-61 framework for identification, containment, eradication, recovery, and lessons learned, and coordinating with internal IT teams and third-party suppliers throughout the response lifecycle.
- Operate Microsoft Sentinel as the primary SIEM platform, developing and maintaining KQL (Kusto Query Language) detection rules, correlation alerts, and investigation workbooks to identify and surface threat activity across endpoint, identity, and cloud environments.
- Administer the CrowdStrike Falcon platform (Endpoint Detection and Response (EDR), Next-Generation SIEM (NG-SIEM), Prevent, Insight, Discover) across an 8,000-user estate, managing policy configuration, alert investigation, and automated SOAR response playbooks.

- Manage Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 (M365) Defender, providing centralised visibility and response capability across endpoint and identity threats in Azure and on-premise environments.
- Conduct log analysis and endpoint analysis during investigations, reviewing event logs, process activity, file system artefacts, and network traffic indicators to establish root cause and scope of incidents.
- Deliver vulnerability management programmes using Tenable.io, AppCheck, and Nessus, scoping and running vulnerability assessments, prioritising remediation based on risk, and tracking findings through to verified closure.
- Scope and support penetration testing engagements, working with testing partners to define assessment scope, review findings, and implement agreed security improvements across the estate.
- Develop and execute threat hunting exercises using the MITRE ATT&CK framework, converting findings into detection rules or tuning recommendations within the SIEM platform.
- Support and mentor junior members of the cyber security team, providing guidance on investigation techniques, tooling, and incident response processes.
- Conduct Breach and Attack Simulation (BAS) using Pentera to validate security controls and identify gaps in detection coverage before real-world threat actors can exploit them.
- Manage Microsoft Entra ID, Conditional Access, Multi-Factor Authentication (MFA), and Single Sign-On (SSO) configuration across the enterprise, maintaining secure identity posture for the full user base.
- Administer BeyondTrust Privileged Access Management (PAM) and Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) for fleet-wide endpoint compliance.

University of the Arts, London (UAL) - Cyber Security and Identity

March 2022 - March 2025

Cyber Security Analyst

- Supported the deployment of Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 (M365) Defender across an 8,000-user estate, delivering comprehensive cloud and endpoint threat protection from a centralised Microsoft Sentinel SIEM.
- Performed day-to-day security monitoring, alert triage, and investigation across SIEM and EDR tooling, developing KQL detection queries and escalating confirmed incidents through the defined response process.
- Contributed to incident response activities including investigation, containment, and recovery, supporting senior analysts in managing security events from detection through to lessons-learned review.
- Conducted endpoint log analysis, reviewing Windows Event Logs, process execution data, and network connection records to identify indicators of compromise and support incident scoping.
- Managed vulnerability scanning using Tenable.io and Nessus, tracking findings and supporting remediation prioritisation in coordination with infrastructure teams.
- Administered Microsoft Entra ID, Conditional Access, and Multi-Factor Authentication (MFA) policies to maintain secure access controls across a diverse user base.
- Supported threat hunting activities using the MITRE ATT&CK framework, identifying anomalous behaviour patterns and potential intrusion indicators across cloud and on-premise environments.

HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Delivered security, quality, and infrastructure engineering within a Software-as-a-Service (SaaS) and FinTech environment, contributing to secure system operations and security control implementation.
- Supported cloud and on-premise infrastructure security, including identity management, endpoint protection policy configuration, and security baseline implementation.

KEY ACHIEVEMENTS

- Led the deployment of Microsoft Defender (MDE, MDI, and M365 Defender) across an 8,000-user estate, providing full endpoint and identity threat visibility and enabling centralised incident investigation through Microsoft Sentinel.
- Established a structured incident response capability using the NIST 800-61 framework, improving incident detection-to-containment times and producing systematic lessons-learned outputs to drive continuous security improvement.

- Developed a library of KQL (Kusto Query Language) detection rules in Microsoft Sentinel and CrowdStrike NG-SIEM, increasing detection coverage across endpoint, identity, and email threat vectors and reducing mean time to detect (MTTD).
- Delivered structured threat hunting exercises using the MITRE ATT&CK framework, converting findings into actionable detection rules and significantly reducing gaps in the security monitoring coverage.
- Delivered vulnerability management programme using Tenable.io and AppCheck, achieving measurable reduction in critical and high-severity vulnerabilities across the estate through risk-based remediation cycles.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
-
