

PROSPER AWUNI

Senior Cyber Security Analyst | Security by Design | Azure Cloud Security | SIEM | Incident Response

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Analyst with more than five years of experience delivering proactive, risk-based cyber security operations across large enterprise environments. I am experienced in embedding security-by-design principles into organisational change programmes, providing expert cyber security requirements to technology and infrastructure change initiatives, and ensuring that security good practice is fully incorporated into new and modified services from the outset. I bring strong expertise in Security Information and Event Management (SIEM), Endpoint Detection and Response (EDR), threat intelligence, vulnerability management, and incident response, alongside deep experience of Microsoft Azure cloud security technologies including Microsoft Entra ID, Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft Sentinel. I hold the Certified Information Systems Security Professional (CISSP) certification and I am highly experienced in applying security frameworks including NIST, ISO 27001, and CIS Controls to minimise cyber risk and maintain a strong, proportionate security posture.

CORE SKILLS AND TECHNICAL STACK

- **Cyber Security Operations:** Proactive day-to-day security operations, risk minimisation, continuous monitoring, detection engineering, alert triage
- **Security by Design:** Embedding security requirements into change programmes, security architecture review, security good practice in project delivery
- **Security Information and Event Management (SIEM):** CrowdStrike Next-Generation SIEM (NG-SIEM), Microsoft Sentinel (Kusto Query Language (KQL)), Splunk (Search Processing Language (SPL))
- **Endpoint Detection and Response (EDR) / Extended Detection and Response (XDR):** CrowdStrike Falcon (EDR, NG-SIEM, Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE), Tanium
- **Microsoft Azure Cloud Security:** Microsoft Entra ID, Microsoft Defender for Identity (MDI), Microsoft 365 (M365) Defender, Conditional Access, Multi-Factor Authentication (MFA)
- **Threat Intelligence and Threat Hunting:** MITRE ATT&CK framework, threat hunting, detection rule development
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentera Breach and Attack Simulation (BAS)
- **Incident Response:** NIST 800-61, full lifecycle incident management
- **Network and Endpoint Security:** Check Point Harmony firewall, IDS/IPS, Mimecast, BeyondTrust Privileged Access Management (PAM), Microsoft Intune
- **Automation:** PowerShell scripting, Security Orchestration, Automation and Response (SOAR)
- **Compliance and Frameworks:** NIST Cybersecurity Framework (CSF), ISO 27001, CIS Controls, Cyber Essentials+

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Deliver efficient, effective, and proactive day-to-day cyber security operations across an 8,000-user enterprise, minimising the risk of security incidents through continuous SIEM monitoring, threat hunting, and rapid incident response.
- Provide expert cyber security requirements to the organisation's change programme, ensuring that security-by-design principles are fully embedded into change initiatives, new system implementations, and infrastructure upgrades from initial design through to delivery.
- Administer and optimise the CrowdStrike Falcon platform (Endpoint Detection and Response (EDR), Next-Generation SIEM (NG-SIEM), Prevent, Insight, Discover) to maintain comprehensive endpoint visibility and threat detection across the enterprise.

- Manage Microsoft Sentinel as the primary SIEM platform, developing KQL (Kusto Query Language) detection rules, correlation analytics, and investigation workbooks to detect and investigate threats across Azure and on-premise environments.
- Administer Microsoft Azure cloud security technologies including Microsoft Entra ID, Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 (M365) Defender, ensuring consistent security coverage across cloud and hybrid environments.
- Conduct threat intelligence-driven threat hunting using the MITRE ATT&CK framework, identifying gaps in detection coverage and converting findings into new detection rules or tuning recommendations.
- Manage vulnerability management programmes using Tenable.io, AppCheck, and Nessus, delivering risk-based remediation programmes and tracking findings through to verified closure.
- Respond to and manage security incidents throughout the full lifecycle in accordance with the NIST 800-61 Incident Response framework, from initial triage through to containment, eradication, recovery, and lessons learned.
- Administer network security controls including Check Point Harmony firewalls, Intrusion Detection System (IDS) and Intrusion Prevention System (IPS) policies, and Mimecast email security gateway.
- Administer BeyondTrust Privileged Access Management (PAM) and Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) across the enterprise.
- Develop PowerShell automation scripts and Security Orchestration, Automation and Response (SOAR) playbooks to reduce manual effort and improve response consistency across routine security operations tasks.

University of the Arts, London (UAL) - Cyber Security and Identity

March 2022 - March 2025

Cyber Security Analyst

- Delivered day-to-day cyber security operations across the Cyber Security and Identity function, monitoring SIEM alerts, triaging incidents, and supporting incident response to minimise security risk across the estate.
- Supported the deployment of Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 (M365) Defender across an 8,000-user estate, strengthening Azure cloud security coverage and centralising threat response.
- Contributed cyber security requirements to technology change projects, supporting the embedding of security-by-design principles into new systems and infrastructure deployments.
- Developed KQL (Kusto Query Language) detection queries in Microsoft Sentinel, improving SIEM alert coverage across endpoint, identity, and cloud threat vectors.
- Conducted vulnerability scanning using Tenable.io and Nessus, producing risk-based remediation reports for technical and management audiences.
- Administered Microsoft Entra ID, Conditional Access, and Multi-Factor Authentication (MFA) policies, maintaining strong identity and access controls across the user estate.
- Supported threat hunting activities using the MITRE ATT&CK framework, identifying anomalous behaviour and potential indicators of compromise for escalation and investigation.

HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Delivered security, quality, and infrastructure engineering within a Software-as-a-Service (SaaS) and FinTech environment, supporting secure operations and contributing to security-by-design practices in system delivery and infrastructure changes.
- Implemented and managed security controls, identity management policies, and endpoint security configurations across cloud and on-premise environments.

KEY ACHIEVEMENTS

- Embedded security-by-design principles into multiple technology change programmes at UAL, ensuring that new systems and infrastructure upgrades were delivered with appropriate security controls from inception, reducing post-deployment remediation risk.
- Delivered proactive, risk-based cyber security operations across an 8,000-user enterprise environment, improving incident detection-to-response times through SIEM tuning, automated SOAR playbooks, and structured threat hunting programmes.

- Led the deployment of Microsoft Defender (MDE, MDI, and M365 Defender) across an 8,000-user estate, delivering comprehensive Microsoft Azure cloud security visibility and enabling centralised threat response through Microsoft Sentinel.
- Developed MITRE ATT&CK-aligned threat hunting playbooks and KQL detection rules in Microsoft Sentinel and CrowdStrike NG-SIEM, significantly improving detection coverage and reducing the organisation's exposure to undetected threats.
- Implemented BeyondTrust Privileged Access Management (PAM) to enforce least-privilege access, reducing risk of privilege escalation across a complex hybrid environment containing sensitive research and administrative systems.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
