

# PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike | SIEM | EDR | Vulnerability Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniproper

---

## PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with more than five years of hands-on experience protecting complex enterprise environments across large, multi-site organisations. I specialise in Security Information and Event Management (SIEM) platforms and Endpoint Detection and Response (EDR), with expert-level capability across the CrowdStrike Falcon platform including Next-Generation SIEM (NG-SIEM), EDR, Prevent, Insight, and Discover modules. I bring deep experience managing email and web security gateways through Mimecast, securing Microsoft Entra ID environments including Conditional Access, Multi-Factor Authentication (MFA), and Single Sign-On (SSO), and administering Privileged Access Management (PAM) through BeyondTrust. I have a strong record of delivering vulnerability management programmes using Tenable.io, AppCheck, and Nessus, and of managing security incidents from initial alert through to containment, eradication, and lessons learned in accordance with the NIST 800-61 Incident Response framework. I am adept at taking technical ownership of security tooling across a global infrastructure and contributing to a focused, high-impact security team.

---

## CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR) / Extended Detection and Response (XDR):** CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover), Tanium, Microsoft Defender for Endpoint (MDE)
- **Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR):** CrowdStrike NG-SIEM, Microsoft Sentinel (Kusto Query Language (KQL)), Splunk (Search Processing Language (SPL))
- **Identity and Access Management:** Microsoft Entra ID (formerly Azure Active Directory (AD)), Conditional Access, MFA, SSO
- **Email and Web Security:** Mimecast, Check Point Harmony
- **Mobile Device Management (MDM) and Mobile Application Management (MAM):** Microsoft Intune
- **Privileged Access Management (PAM):** BeyondTrust
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentera Breach and Attack Simulation (BAS)
- **Threat Detection and Incident Response:** NIST 800-61, MITRE ATT&CK, detection engineering, threat hunting, alert triage
- **Automation and Scripting:** PowerShell, SOAR automation
- **Compliance Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials+

---

## PROFESSIONAL EXPERIENCE

### University of the Arts, London (UAL)

March 2025 - Present

#### Senior Cyber Security Analyst / Engineer

- Administer and optimise the CrowdStrike Falcon platform across its full suite (EDR, NG-SIEM, Prevent, Insight, and Discover), managing policy configuration, alert investigation, and automated response playbooks across an enterprise environment of 8,000 users.
- Operate SIEM and SOAR platforms to detect, investigate, and respond to security threats; develop detection engineering rules and tune logic to reduce false positives and improve signal fidelity across the security estate.
- Perform EDR and XDR alert response and triage, managing endpoint threats from initial detection through to containment and remediation, and reporting findings to senior stakeholders.
- Administer Mimecast email security gateway, managing anti-phishing policies, quarantine review, URL rewriting, and Data Loss Prevention (DLP) controls to protect the organisation against email-borne threats.

- Manage Microsoft Entra ID, Conditional Access policies, Multi-Factor Authentication (MFA), and Single Sign-On (SSO) configuration, ensuring secure identity and access controls across a global user base.
- Administer BeyondTrust Privileged Access Management (PAM), including privileged credential vaulting, session recording, and access reviews to enforce least-privilege access across the infrastructure.
- Oversee Mobile Device Management (MDM) and Mobile Application Management (MAM) through Microsoft Intune, managing fleet compliance, device security baselines, and application policies.
- Deliver vulnerability management cycles using Tenable.io, AppCheck, and Nessus, prioritising remediation based on risk scoring and tracking findings through to verified closure.
- Conduct Breach and Attack Simulation (BAS) exercises using Pentera to validate security control effectiveness and identify gaps in the defence-in-depth posture.
- Manage and remediate penetration test findings, coordinating with system owners and IT teams to implement security improvements across the estate in a timely manner.
- Respond to and manage security incidents in accordance with the NIST 800-61 Incident Response framework, from initial triage through to eradication, recovery, and lessons-learned review.
- Maintain and optimise Check Point Harmony firewall rule sets alongside Intrusion Detection System (IDS) and Intrusion Prevention System (IPS) policies to protect the network perimeter.
- Deliver security awareness training programmes and phishing simulation exercises to staff across the university, reducing risk of successful social engineering attacks.
- Develop PowerShell scripts to automate routine security operations tasks and accelerate incident investigation workflows.

## **University of the Arts, London (UAL) - Cyber Security and Identity**

*March 2022 - March 2025*

### **Cyber Security Analyst**

- Supported the deployment and ongoing management of Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 (M365) Defender across an 8,000-user estate, delivering comprehensive endpoint and identity threat protection.
- Performed day-to-day security monitoring, alert triage, and investigation using Microsoft Sentinel, developing Kusto Query Language (KQL) detection queries and correlation rules to surface threat activity.
- Contributed to incident response activities following the NIST 800-61 framework, including identification, containment, eradication, and recovery phases across a range of security events.
- Managed vulnerability scanning using Tenable.io and Nessus, supporting risk-based remediation prioritisation and tracking findings through structured reporting.
- Administered Microsoft Entra ID, Conditional Access, and Multi-Factor Authentication (MFA) policies, ensuring secure access controls for staff and students.
- Assisted in the administration of Mimecast email filtering, Tanium endpoint management, and Microsoft Intune Mobile Device Management (MDM) policies.
- Contributed to the development of PowerShell automation scripts to streamline security operations tasks and improve investigation efficiency.
- Supported threat hunting activities using the MITRE ATT&CK framework, identifying anomalous behaviour and potential indicators of compromise within the environment.

## **HICX Solutions Ltd (SaaS/FinTech)**

*February 2021 - March 2022*

### **IT Engineer: Security, Quality and Infrastructure**

- Delivered security, quality, and infrastructure engineering within a Software-as-a-Service (SaaS) and FinTech environment, supporting secure operations and security tooling management.
- Implemented and managed security controls for cloud and on-premise infrastructure, including identity management, endpoint security policies, and network security configurations.
- Contributed to security quality assurance processes and infrastructure hardening activities to maintain a strong security posture.

## **KEY ACHIEVEMENTS**

---

- Administered CrowdStrike Falcon across an 8,000-user enterprise environment, achieving full EDR coverage and improving threat detection and response times through automated SOAR playbooks integrated with the NG-SIEM platform.

- Led the deployment of Microsoft Defender (MDE, MDI, and M365 Defender) organisation-wide across an 8,000-user estate, delivering comprehensive endpoint and identity threat protection with centralised reporting through Microsoft Sentinel.
- Implemented BeyondTrust Privileged Access Management (PAM) to secure administrative access, significantly reducing risk of privilege escalation and credential theft across a complex hybrid IT environment.
- Delivered a structured vulnerability management programme using Tenable.io and AppCheck, achieving measurable reduction in critical and high-severity vulnerabilities through risk-based remediation cycles validated by Pentera BAS exercises.
- Developed a library of KQL (Kusto Query Language) detection rules in Microsoft Sentinel and CrowdStrike NG-SIEM, enhancing detection coverage across endpoint, identity, and email threat vectors.

## EDUCATION

---

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

## CERTIFICATIONS

---

- Certified Information Systems Security Professional (CISSP)
  - CompTIA Security+
  - Microsoft Certified Solutions Associate (MCSA)
  - CompTIA A+
  - Google IT Support Professional Certificate
-
