PROSPER AWUNI

Senior Cyber Security Engineer | SIEM/SOAR | EDR | Firewall | Identity and Access Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of experience delivering hands-on security operations, endpoint protection and identity security across enterprise environments. At the University of the Arts London (UAL) I have managed the full security stack for an 8,000-user estate, including Security Information and Event Management (SIEM), Security Orchestration Automation and Response (SOAR), Endpoint Detection and Response (EDR) via CrowdStrike Falcon, Web Application Firewall (WAF) and email security gateways, Multi-Factor Authentication (MFA), Single Sign-On (SSO), and Mobile Device Management (MDM). I bring deep operational experience with CrowdStrike EDR, Mimecast, Microsoft Entra ID (formerly Azure Active Directory), Microsoft Intune, and Palo Alto-class firewalls, alongside proven vulnerability management, incident response and security awareness skills. I hold the Certified Information Systems Security Professional (CISSP) certification and am comfortable working in a focused, close-knit security team where breadth of coverage and individual ownership are valued.

CORE SKILLS AND TECHNICAL STACK

- **EDR and Endpoint Protection:** CrowdStrike Falcon (EDR, Prevent, Insight, Discover, Next-Generation SIEM (NG-SIEM)), Microsoft Defender for Endpoint (MDE)
- **SIEM and SOAR:** Microsoft Sentinel (Kusto Query Language (KQL)), CrowdStrike Falcon NG-SIEM, Splunk, detection engineering, alert triage and tuning, automated playbook development
- **Email and Web Security Gateways:** Mimecast email security and archiving, WAF/Distributed Denial of Service (DDoS) mitigation, web content filtering
- **Firewall and Network Security:** Check Point Harmony, Palo Alto firewall policy management, network segmentation and access controls
- **Identity and Access Management:** Microsoft Entra ID (Azure Active Directory (Azure AD)), Conditional Access policies, MFA, SSO, BeyondTrust Privileged Access Management (PAM)
- **Mobile Device and Application Management:** Microsoft Intune Mobile Device Management (MDM), Mobile Application Management (MAM)
- **Vulnerability Management:** Tenable.io, Nessus, Pentera Breach and Attack Simulation (BAS), AppCheck
- **Incident Response:** NIST 800-61 lifecycle, MITRE ATT&CK framework, containment, eradication and recovery playbooks
- **Scripting and Automation:** PowerShell scripting, SOAR automation workflows
- **Compliance Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL) *March 2025 - Present*

Senior Cyber Security Analyst / Engineer

- Manage and operate the full security engineering stack for an 8,000-user estate, including CrowdStrike Falcon EDR, SIEM/SOAR alerting, email gateway security via Mimecast, WAF/DDoS controls, MFA and SSO identity services.
- Administer Microsoft Entra ID (Azure AD) Conditional Access policies, ensuring least-privilege access and enforcing MFA across all user populations and application integrations.
- Oversee Microsoft Intune MDM and MAM policy enforcement, managing secure device enrolment and compliance baselines for corporate and bring-your-own devices.
- Respond to and lead security incidents end-to-end following the NIST 800-61 incident response lifecycle, from initial triage through containment, eradication and post-incident review.
- Develop and maintain SOAR automation playbooks in Microsoft Sentinel to reduce manual analyst workload and accelerate mean time to respond (MTTR) on high-volume alert categories.
- Conduct vulnerability management programmes using Tenable.io and Pentera Breach and Attack Simulation (BAS), coordinating remediation prioritisation with infrastructure and desktop teams.

- Manage BeyondTrust Privileged Access Management (PAM) solution, including session recording, just-in-time access provisioning and privileged account governance.
- Deliver security awareness training and phishing simulation campaigns, reducing end-user susceptibility and supporting the organisation's Cyber Essentials Plus certification.

University of the Arts London (UAL) - Cyber Security and Identity *March 2022 - March 2025*

Cyber Security Analyst

- Deployed CrowdStrike Falcon EDR and Prevent across the 8,000-device fleet, establishing endpoint telemetry ingestion and automated threat prevention at scale.
- Configured and tuned Microsoft Sentinel SIEM detection rules using Kusto Query Language (KQL) to reduce false positives and improve signal quality for the security operations function.
- Managed Mimecast email security policies including anti-phishing, URL rewriting and attachment sandboxing, protecting staff and students from email-borne threats.
- Maintained firewall policy rules and network access controls using Check Point Harmony, supporting secure segmentation between academic and administrative networks.
- Administered Azure AD / Entra ID, including MFA enforcement, SSO application integrations and Conditional Access policy authoring.
- Ran vulnerability scanning programmes using Tenable.io and AppCheck, producing remediation reports and tracking closure through to verification scanning.
- Supported Cyber Essentials Plus and ISO 27001 audit readiness, producing evidence packs and control documentation for internal and external assessors.

HICX Solutions Ltd (Software as a Service / FinTech) *February 2021 - March 2022*

IT Engineer: Security, Quality and Infrastructure

- Managed endpoint security controls, firewall policies and access management procedures across SaaS platform and corporate infrastructure.
- Administered Microsoft Intune MDM/MAM policies to enforce compliance on corporate devices and managed bring-your-own-device programmes.
- Supported SIEM monitoring and log analysis activities, investigating anomalous behaviour and escalating confirmed security incidents.
- Contributed to Microsoft Azure infrastructure projects including cloud environment hardening and identity integration work.

KEY ACHIEVEMENTS

- Led CrowdStrike Falcon enterprise deployment across 8,000 devices, delivering full endpoint visibility and reducing mean time to detect (MTTD) for endpoint threats.
- Engineered WAF and DDoS mitigation controls that reduced web-layer attack impact across the UAL public-facing estate.
- Built SOAR automation playbooks cutting repetitive analyst alert-handling workload and accelerating MTTR on high-volume phishing and endpoint alert categories.
- Delivered Mimecast email security and archiving platform migration, improving email threat coverage and ensuring regulatory compliance for electronic communications.
- Supported successful Cyber Essentials Plus certification, contributing to the organisation's ability to demonstrate security maturity to external stakeholders.

EDUCATION

- Master of Science (M.Sc.) - Environmental and Resource Engineering
- Bachelor of Science (B.Sc.) - Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+

- Google IT Support Professional Certificate
