PROSPER AWUNI

Senior Cyber Security Engineer | Enterprise Security Architecture | SIEM | EDR | Cloud Security

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of experience designing, implementing and operating enterprise-grade security controls across complex, large-scale environments. At the University of the Arts London (UAL) I have led the delivery of security capabilities covering Security Information and Event Management (SIEM), Endpoint Detection and Response (EDR), identity and access management, vulnerability management and incident response for an 8,000-user organisation. I have delivered projects of significant scope and complexity, working alongside infrastructure, cloud and IT operations teams to strengthen security posture end-to-end. I hold the Certified Information Systems Security Professional (CISSP) certification and bring broad technical depth across Microsoft Azure, Microsoft Sentinel, CrowdStrike Falcon, BeyondTrust Privileged Access Management (PAM) and a range of security tooling. I am eligible for UK Security Clearance and am committed to working across high-impact projects that require both technical excellence and stakeholder engagement.

CORE SKILLS AND TECHNICAL STACK

- **SIEM and Threat Detection:** Microsoft Sentinel (Kusto Query Language (KQL)), CrowdStrike Falcon Next-Generation SIEM (NG-SIEM), Splunk/Security Processing Language (SPL), detection engineering, alert triage, threat hunting
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (EDR, Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE)
- **Cloud and Identity Security:** Microsoft Azure, Azure Active Directory (Azure AD) / Microsoft Entra ID, Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Privileged Access Management (PAM):** BeyondTrust PAM, just-in-time access, session management and privileged account governance
- **Vulnerability Management:** Tenable.io, Nessus, Pentera Breach and Attack Simulation (BAS), AppCheck
- **Incident Response:** End-to-end lifecycle management aligned to NIST 800-61, MITRE ATT&CK framework, forensic investigation, containment and recovery
- **Security Orchestration Automation and Response (SOAR):** Microsoft Sentinel playbook development, PowerShell scripting, workflow automation
- **Network and Perimeter Security:** Check Point Harmony firewall, WAF/DDoS mitigation, network segmentation
- **Device Management:** Microsoft Intune Mobile Device Management (MDM), Mobile Application Management (MAM), CrowdStrike Falcon Discover
- **Compliance and Risk:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL) *March 2025 - Present*

Senior Cyber Security Analyst / Engineer

- Architect and operate enterprise security controls for an 8,000-user environment spanning Microsoft Azure, Microsoft 365, CrowdStrike Falcon and on-premises infrastructure, ensuring resilience and compliance with NIST and CIS security standards.
- Lead incident response engagements from detection through containment, eradication and recovery, producing post-incident reports and feeding lessons learned back into detection rule improvements.
- Drive SIEM engineering within Microsoft Sentinel, developing Kusto Query Language (KQL) analytics rules, workbooks and automated playbooks to reduce mean time to detect (MTTD) and mean time to respond (MTTR).
- Manage CrowdStrike Falcon NG-SIEM and EDR operations, configuring prevention policies, conducting threat hunting and responding to endpoint alerts across the estate.

- Oversee vulnerability management lifecycle using Tenable.io and Pentera Breach and Attack Simulation (BAS), coordinating remediation with infrastructure and application owners.
- Administer BeyondTrust Privileged Access Management (PAM), enforcing least-privilege principles and governing privileged account access across critical systems.
- Maintain and harden Microsoft Entra ID (Azure AD) Conditional Access and MFA configurations to protect against identity-based attacks.
- Deliver security projects involving cross-functional teams including network engineers, cloud architects and third-party suppliers.

University of the Arts London (UAL) - Cyber Security and Identity *March 2022 - March 2025*

Cyber Security Analyst

- Delivered large-scale Microsoft Defender for Endpoint (MDE) deployment across 8,000 devices, integrating endpoint telemetry into Microsoft Sentinel for centralised detection and response.
- Engineered SIEM detection content using KQL, including analytics rules, hunting queries and scheduled alert logic across identity, endpoint and cloud data sources.
- Operated and tuned CrowdStrike Falcon EDR platform, responding to endpoint alerts, investigating suspicious process activity and managing prevention policy configuration.
- Administered Azure AD / Entra ID, Conditional Access policies, MFA and SSO application integrations, reducing the organisation's identity attack surface.
- Performed vulnerability assessments and penetration testing support using Tenable.io, AppCheck and Pentera BAS, producing risk-rated remediation reports for senior stakeholders.
- Contributed to ISO 27001 and Cyber Essentials Plus audit readiness programmes, producing technical evidence and supporting external assessors.

HICX Solutions Ltd (Software as a Service / FinTech) *February 2021 - March 2022*

IT Engineer: Security, Quality and Infrastructure

- Implemented and managed endpoint security, network controls and access management across SaaS platform and corporate environments.
- Supported SIEM monitoring and log analysis, investigating security events and escalating confirmed incidents to the security leadership team.
- Administered Microsoft Intune MDM and MAM across corporate device fleet, ensuring policy compliance and secure device posture.
- Contributed to Microsoft Azure cloud infrastructure projects including environment hardening and identity configuration work.

KEY ACHIEVEMENTS

- Designed and delivered end-to-end CrowdStrike Falcon deployment for 8,000 users, establishing enterprise-wide EDR coverage and reducing MTTD for endpoint threats.
- Built SOAR automation playbooks in Microsoft Sentinel that automated repetitive triage tasks and meaningfully reduced analyst workload during high-volume alert periods.
- Led Microsoft Defender for Endpoint and Microsoft 365 Defender integration project, unifying endpoint, identity and cloud security telemetry into a single investigation pane.
- Operationalised Pentera Breach and Attack Simulation (BAS) programme, enabling continuous automated validation of security controls and prioritising remediation investment.
- Supported Cyber Essentials Plus and ISO 27001 audit cycles, contributing detailed technical evidence that enabled both certifications to be maintained.

EDUCATION

- Master of Science (M.Sc.) - Environmental and Resource Engineering
- Bachelor of Science (B.Sc.) - Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+

- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
