

PROSPER AWUNI

Senior Security Engineer | IR Tooling | Endpoint and Identity Security | SIEM Engineering | MITRE ATT&CK

United Kingdom (Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Security Engineer with over 5 years of experience designing, implementing, and continuously improving enterprise security technology portfolios. My work sits at the intersection of Incident Response (IR) tooling, endpoint protection, identity security, and Security Information and Event Management (SIEM) engineering. I have a strong track record of leading post-incident reviews, translating lessons learned into engineering-led remediation that prevents recurrence, and championing best practices across endpoint management, web application protection, and software-defined security controls. I bring deep experience with CrowdStrike Falcon, Microsoft Sentinel, Microsoft Defender for Endpoint (MDE), BeyondTrust Privileged Access Management (PAM), and Microsoft Intune, underpinned by a thorough understanding of the MITRE ATT&CK framework and Cyber Kill Chain. I am a Certified Information Systems Security Professional (CISSP) with a passion for relentlessly improving security tooling maturity, monitoring infrastructure capacity, and designing clear management reporting that communicates risk and operational performance to stakeholders at all levels.

CORE SKILLS AND TECHNICAL STACK

- **Security Engineering:** Design, implementation, and continuous improvement of SIEM, EDR, PAM, email security, and identity protection technologies
- **Incident Response (IR) Tooling:** SOAR platform engineering (Microsoft Sentinel Logic Apps, PowerShell automation); IR runbook development; post-incident review and engineering remediation
- **SIEM Engineering:** Microsoft Sentinel (KQL), CrowdStrike NG-SIEM (LogScale), Splunk/SPL; detection rule authoring, tuning, data connector management
- **Endpoint Management and Protection:** CrowdStrike Falcon (Prevent, EDR, Insight, Discover); Microsoft Defender for Endpoint (MDE); Tanium; Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM)
- **Identity and Privileged Access:** Microsoft Entra ID / Azure Active Directory (AD), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO); BeyondTrust PAM (privileged account governance, session recording)
- **Web Application and Email Security:** Web Application Firewall (WAF) management, Mimecast email security gateway, Distributed Denial of Service (DDoS) protection
- **Network Security:** Check Point Harmony firewall, Intrusion Detection System (IDS)/Intrusion Prevention System (IPS), network segmentation and monitoring
- **Vulnerability and Exposure Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus; remediation planning and tracking
- **Reporting and Capacity Management:** Security operations metrics design, management dashboard development, security tooling infrastructure capacity monitoring and forecasting
- **Security Frameworks:** MITRE ATT&CK, Cyber Kill Chain, NIST 800-61, NIST CSF, CIS Controls, ISO 27001, Cyber Essentials Plus
- **Certifications:** CISSP, CompTIA Security+, MCSA, CompTIA A+, Google IT Support Professional Certificate

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)
Senior Cyber Security Analyst / Engineer

March 2025 - Present

- Design, implement, and continuously improve the enterprise security technology portfolio, covering SIEM, Endpoint Detection and Response (EDR), Privileged Access Management (PAM), email security, and identity protection solutions across an 8,000-user estate.

- Lead Incident Response (IR) engineering, developing and maintaining Security Orchestration, Automation and Response (SOAR) playbooks, IR runbooks, and automated response workflows in Microsoft Sentinel to accelerate containment and reduce manual analyst overhead.
- Work closely with Security Architecture teams to embed security controls into new projects, infrastructure changes, and cloud adoption initiatives, performing security design reviews and recommending engineering controls.
- Champion best practices for endpoint management (CrowdStrike Falcon, Microsoft Intune MDM/MAM), identity protection (Microsoft Entra ID, BeyondTrust PAM), and web application security (Web Application Firewall, Mimecast), driving consistent adoption across the organisation.
- Lead post-incident reviews following confirmed security incidents, identifying root causes, assessing gaps in tooling and detection coverage, and proposing engineering-led remediation to prevent recurrence.
- Design and maintain management reporting frameworks for security operations, including key metrics such as alert volumes, mean time to detect (MTTD), mean time to respond (MTTR), detection coverage, and remediation Service Level Agreement (SLA) compliance.
- Monitor the capacity and performance of security tooling infrastructure, identifying growth trends and planning scaling requirements to maintain operational effectiveness.
- Apply the MITRE ATT&CK framework and Cyber Kill Chain methodology to guide detection engineering priorities, IR programme improvements, and security control gap assessments.
- Manage technical escalations from the SOC to successful resolution, providing engineering leadership in complex incident scenarios.
- Raise awareness of security engineering policies and develop corresponding procedures, ensuring colleagues understand and adhere to security controls.

University of the Arts, London (UAL)

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Supported the deployment, configuration, and tuning of CrowdStrike Falcon EDR, Microsoft Sentinel SIEM, and Microsoft Defender across a complex multi-site university environment.
- Assisted in engineering SOAR automation workflows using PowerShell scripting and Microsoft Sentinel Logic Apps, reducing repetitive manual tasks within the security operations function.
- Contributed to security architecture discussions, providing technical input into new system integrations, cloud migrations, and infrastructure changes to ensure security controls were appropriately embedded.
- Participated in post-incident reviews and helped develop actionable engineering recommendations, translating lessons learned into tooling improvements and updated runbooks.
- Managed SIEM detection rule development and tuning, authoring Kusto Query Language (KQL) analytics rules in Microsoft Sentinel aligned to MITRE ATT&CK Tactics, Techniques, and Procedures (TTPs).
- Maintained and improved security awareness of engineering best practices across IT and infrastructure teams, providing security guidance for projects and change requests.
- Supported the design and management reporting for security operational metrics, contributing to monthly and quarterly security governance reporting.

HICX Solutions Ltd (SaaS/FinTech)

IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Managed security engineering tasks across a cloud-hosted SaaS/FinTech environment, including firewall rule management, endpoint protection deployment and configuration, SIEM log integration, and identity access management.
- Supported Incident Response activities, assisting with the documentation of IR procedures and contributing to the development of response playbooks and escalation runbooks.
- Recommended engineering improvements based on vulnerability assessment findings and implemented approved controls in collaboration with development and infrastructure teams.
- Monitored the health and capacity of security tooling and infrastructure, reporting issues and supporting remediation planning.
- Delivered security guidance to development and infrastructure teams, championing secure configuration practices aligned to CIS Controls and ISO 27001.

KEY ACHIEVEMENTS

- Delivered a comprehensive overhaul of the SOAR automation capability in Microsoft Sentinel, creating 15+ automated playbooks that reduced repetitive manual analyst effort by approximately 40% and improved mean time to respond (MTTR) materially.
- Led post-incident review following a significant ransomware precursor campaign, identifying 3 engineering gaps in detection and endpoint hardening, and implementing remediation within 30 days to close all identified weaknesses.
- Deployed CrowdStrike Falcon (Prevent, EDR, NG-SIEM) across an 8,000-user estate, achieving full endpoint visibility and enabling proactive threat hunting at scale.
- Designed and implemented a security operations management reporting framework, providing leadership with monthly metrics on alert volumes, coverage, MTTD/MTTR, and SLA performance.
- Deployed BeyondTrust Privileged Access Management (PAM) across 300+ privileged accounts, eliminating standing privileged access and enabling comprehensive session recording for audit and forensic purposes.
- Championed and implemented Conditional Access and Multi-Factor Authentication (MFA) across all 8,000 users, reducing account compromise incidents by over 60% year-on-year.
- Enabled successful Cyber Essentials Plus recertification by leading remediation of 85+ high-risk vulnerabilities identified through Pentera Breach and Attack Simulation (BAS) and Tenable.io assessments.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
