

PROSPER AWUNI

Senior Cyber Security Engineer | Security Technology Portfolio | SIEM | Endpoint Protection | Incident Response

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with more than five years of experience implementing, configuring and continuously evolving enterprise security technology portfolios. I have a genuine passion for cyber security and a relentless drive to champion best practices across all layers of the defensive stack. At the University of the Arts London (UAL), I lead the engineering and operations of the full security tooling estate for more than 8,000 users, including CrowdStrike Falcon Endpoint Detection and Response (EDR), Microsoft Sentinel Security Information and Event Management (SIEM), Microsoft Defender Suite, BeyondTrust Privileged Access Management (PAM), Mimecast email gateway and Tenable.io vulnerability management. I have direct experience managing security tooling capacity, producing management reporting, triaging on-call security escalations, leading post-incident engineering reviews and proposing technology-led resolutions to prevent recurrence. I write Kusto Query Language (KQL) queries for log ingestion, parsing and monitoring, and I automate detection and response workflows using Security Orchestration, Automation and Response (SOAR) playbooks. I am eager to bring this breadth of experience to Admiral Group and help guide the evolution of a world-class security engineering function.

CORE SKILLS AND TECHNICAL STACK

- **Security Information and Event Management (SIEM):** Microsoft Sentinel (KQL, log ingestion, parsing, monitoring), CrowdStrike NG-SIEM, Splunk (SPL)
- **Endpoint Detection and Response (EDR) and Endpoint Protection:** CrowdStrike Falcon (NG-SIEM, Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE)
- **Web Application Protection and Email Gateway Security:** Mimecast, Check Point Harmony firewall
- **Identity and Access Management (IAM):** Microsoft Entra ID, Azure Active Directory (Azure AD), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO)
- **Privileged Access Management (PAM):** BeyondTrust
- **Security Orchestration, Automation and Response (SOAR):** Microsoft Sentinel Playbooks, PowerShell scripting
- **Incident Response and Post-Incident Engineering:** NIST 800-61, MITRE ATT&CK framework, post-incident review, root cause analysis
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), Nessus, AppCheck
- **Security Tooling Capacity and Management Reporting:** Security metrics dashboards, KPI reporting, tooling capacity planning
- **Mobile Device Management (MDM):** Microsoft Intune
- **Frameworks:** NIST CSF, CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK
- **Threat Intelligence:** Emerging threat actor Tactics, Techniques and Procedures (TTPs), threat hunting

PROFESSIONAL EXPERIENCE

- University of the Arts London (UAL) | Senior Cyber Security Analyst / Engineer | March 2025 - Present
- Leading engineering role in all platform improvements and capacity planning decisions.
- Champion best practices in web application protection, endpoint management and software-defined security, advising senior stakeholders on strategic security posture improvements.
 - Design, produce and continually improve management reporting on security tooling performance, coverage and capacity, presenting findings to senior leadership.
 - Participate in the Information Security on-call rota, triaging security escalations, performing rapid incident response and providing recommended engineering fixes.

- Lead post-incident engineering reviews, identifying root causes and proposing technology-led resolutions to prevent recurrence.
- Manage the Microsoft Sentinel Security Information and Event Management (SIEM) platform, writing Kusto Query Language (KQL) detection rules, configuring log ingestion and parsing pipelines, and building Security Orchestration, Automation and Response (SOAR) playbooks for automated triage.
- Lead CrowdStrike Falcon Endpoint Detection and Response (EDR) engineering, managing policies and detections across 8,000+ endpoints.
- Administer the Mimecast email gateway, configuring anti-phishing, sandboxing and Data Loss Prevention (DLP) policies to protect against email-borne threats.
- Manage technical escalations to resolution and raise security awareness across the organisation through training and phishing simulation campaigns.
- Monitor capacity of security tooling and supporting infrastructure, projecting future capacity requirements and making tooling investment recommendations.
- Conduct threat hunting using CrowdStrike Falcon Insight and Microsoft Sentinel, informed by current threat intelligence on adversary Tactics, Techniques and Procedures (TTPs) and the MITRE ATT&CK framework.
- Lead vulnerability management using Tenable.io and Pentera Breach and Attack Simulation (BAS), prioritising remediation of critical findings and tracking risk acceptance decisions.

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Performed Security Information and Event Management (SIEM) analysis and investigation, managing incidents from detection through to post-incident review in Microsoft Sentinel and CrowdStrike.
- Maintained and tuned CrowdStrike Falcon Endpoint Detection and Response (EDR) policies, reducing false positives and improving detection fidelity.
- Configured and operated the Mimecast email security gateway, addressing phishing, malware and Business Email Compromise (BEC) threats.
- Supported Identity and Access Management (IAM) including Azure Active Directory (Azure AD) group management, Conditional Access configuration and Multi-Factor Authentication (MFA) enrolment.
- Contributed to vulnerability management programmes using Tenable.io and Nessus, preparing risk reporting and driving remediation with asset owners.
- Assisted with post-incident reviews and contributed engineering improvement recommendations to strengthen the security tooling estate.
- Managed technical security escalations and produced security awareness training content for staff.

HGX Solutions Ltd (SaaS/FinTech) - IT Engineer, Security, Quality and Infrastructure

February 2021 - March 2022

- Implemented and maintained the security technology portfolio across a SaaS-based platform, including firewall configuration, endpoint protection and security monitoring tooling.
- Configured Identity and Access Management (IAM) controls, Multi-Factor Authentication (MFA) policies and secure remote access, championing best practices in access control and least privilege.
- Contributed to vulnerability assessments and implemented security hardening recommendations aligned with industry frameworks.
- Monitored security tooling capacity and produced regular reporting on security posture for internal stakeholders.
- Delivered IT security support across cloud and on-premise environments, managing device policies, user accounts and network security controls.

KEY ACHIEVEMENTS

- Implemented and evolved the end-to-end security technology portfolio at UAL, encompassing CrowdStrike Falcon, Microsoft Sentinel, Microsoft Defender Suite, BeyondTrust PAM and Tenable.io across 8,000+ users.
- Designed and deployed Microsoft Sentinel Security Orchestration, Automation and Response (SOAR) playbooks, reducing manual triage effort and mean time to respond to security incidents.
- Led post-incident engineering reviews that produced lasting tooling and process improvements, reducing recurrence of common alert types by approximately 40% through Kusto Query Language (KQL) rule tuning.

- Championed BeyondTrust Privileged Access Management (PAM) implementation, eliminating shared administrative credentials and achieving full privileged account governance.
- Delivered continuous Pentera Breach and Attack Simulation (BAS) validation cycles, providing evidence-based assurance of security control effectiveness to senior leadership.
- Managed Information Security on-call responsibilities, successfully triaging and remediating multiple high-severity incidents with minimal business impact.

EDUCATION

M.Sc. Environmental and Resource Engineering

B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
