

PROSPER AWUNI

Senior Security Analyst

United Kingdom (Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniproper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) and Senior Security Analyst with over five years of experience in security operations, incident response and threat hunting. I respond to and investigate security events, triage cyber security alerts escalated from managed security service providers (MSSPs) and develop detection logic to improve security monitoring coverage. I bring a deep understanding of the MITRE ATT&CK framework and Cyber Kill Chain, using these to map threat actor techniques to detection gaps and guide hunting activities. My incident response work is grounded in the National Institute of Standards and Technology (NIST) 800-61 lifecycle, and I have hands-on experience with CrowdStrike Falcon, Microsoft Sentinel, Microsoft Defender and Security Orchestration Automation and Response (SOAR) tooling across a large enterprise estate. I am a strong communicator who ensures all security events are investigated and documented to completion, and I am looking for a remote Security Operations Centre (SOC) role where I can contribute to monitoring, response and threat hunting strategy while mentoring junior analysts and helping evolve detection capabilities.

CORE SKILLS AND TECHNICAL STACK

- **Security Operations and Alert Triage:** MSSP escalation management, Security Information and Event Management (SIEM) alert investigation, EDR alert triage, incident containment and remediation coordination
- **SIEM Platforms:** Microsoft Sentinel + Kusto Query Language (KQL), CrowdStrike NG-SIEM / Falcon LogScale, detection rule development and tuning, use-case lifecycle management
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (EDR, Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Incident Response:** NIST 800-61 Incident Response Lifecycle, MITRE ATT&CK framework, Cyber Kill Chain, digital forensics, technical analysis and root cause identification, stakeholder communication
- **Threat Hunting:** Proactive threat hunting, hypothesis-driven hunting aligned to MITRE ATT&CK, IOC and IOA analysis, threat intelligence integration
- **Automation and SOAR:** SOAR playbook development, PowerShell scripting, BeyondTrust PAM automation, alert enrichment and automated containment
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus; risk-based prioritisation and remediation tracking
- **Governance Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) — Senior Cyber Security Analyst / Engineer *March 2025 – Present*

- Respond to and investigate security events within the UAL environment across an estate of approximately 8,000 users; perform proactive threat hunting when not on active monitoring duty, identifying attacker activity not surfaced by automated detection.
- Triage cyber security alerts escalated from the MSSP and other detection sources, investigating incidents and working with infrastructure, identity and endpoint teams to contain and remediate cyber security incidents.
- Develop new detection rules for deployment to Microsoft Sentinel and CrowdStrike NG-SIEM to increase detection coverage and effectiveness; review and improve existing detection logic to reduce false-positive rates.
- Contribute to the security monitoring, response and threat hunting strategy; work with the MSSP to review and maintain efficiency, and perform threat hunting tasks to proactively detect threats within the environment.

- Assist with technical analysis during incident response investigations, providing timely updates to stakeholders and ensuring all security events are investigated and documented to completion aligned to NIST 800-61.
- Develop SOAR automation playbooks using PowerShell scripting to reduce analyst toil and accelerate alert triage and containment for high-volume event categories.
- Lead vulnerability management activities using Tenable.io, AppCheck and Pentera BAS; identify detection gaps through breach and attack simulation and drive remediation with platform teams.

University of the Arts, London (UAL) — Cyber Security Analyst, Cyber Security and Identity

March 2022 – March 2025

- Monitored and responded to security alerts from the SIEM (Microsoft Sentinel) and CrowdStrike Falcon EDR; performed initial triage, escalation and investigation of security incidents across endpoint, identity and cloud surfaces.
- Created and maintained KQL detection rules in Microsoft Sentinel, writing analytic rules aligned to MITRE ATT&CK and the Cyber Kill Chain to improve detection of known attacker techniques.
- Conducted threat hunting exercises using CrowdStrike Falcon Insight and Microsoft Sentinel, building hunting queries and hypotheses from threat intelligence and previous incident findings.
- Investigated and remediated security incidents in line with NIST 800-61 procedures; maintained an accurate incident log and produced post-incident reports with lessons learned and detection improvement recommendations.
- Operated BeyondTrust PAM, Microsoft Entra ID / Azure Active Directory (Azure AD) Conditional Access and MFA controls, enforcing identity security standards aligned to Cyber Essentials Plus.
- Managed CrowdStrike Falcon prevention policies, response actions and platform health; ensured full agent coverage and consistent policy enforcement across the managed endpoint estate.

HICX Solutions Ltd (SaaS/FinTech) — IT Engineer: Security, Quality and Infrastructure

February 2021 – March 2022

- Monitored security alerts and responded to incidents across a SaaS FinTech environment; investigated endpoint and infrastructure security events and escalated to senior engineers as appropriate.
- Supported the development of incident response procedures and security monitoring processes, contributing to detection and response capability improvement.
- Managed Microsoft Azure Active Directory, Intune and Microsoft 365 security settings; contributed to identity and access management governance and policy enforcement.
- Delivered security awareness training and phishing simulations, and contributed to vulnerability management and compliance activities.

KEY ACHIEVEMENTS

- Built a structured detection library in Microsoft Sentinel and CrowdStrike NG-SIEM at UAL, mapped to MITRE ATT&CK, that measurably improved detection coverage across endpoint, identity and cloud attack surfaces.
- Deployed CrowdStrike Falcon EDR and Microsoft Defender for Endpoint across an estate of approximately 8,000 users, achieving full endpoint visibility and reducing mean time to detect security incidents.
- Led multiple incident response investigations aligned to NIST 800-61, serving as technical authority during declared incidents and producing post-incident reports that drove detection and control improvements.
- Developed SOAR automation playbooks that automated triage of high-volume alert categories, improving analyst efficiency and reducing mean time to respond within the Security Operations Centre.
- Conducted Pentera Breach and Attack Simulation exercises to identify detection coverage gaps and validate new detection rules, driving a continuous improvement cycle in detection effectiveness.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+

- Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
