

PROSPER AWUNI

Senior Cyber Security Engineer (SIEM)

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) and Senior Cyber Security Engineer with over five years of experience implementing and maintaining robust security across enterprise infrastructure, covering Security Information and Event Management (SIEM) / Security Orchestration Automation and Response (SOAR) platform operations, Endpoint Detection and Response (EDR) alert management, identity and access management (IAM), endpoint and vulnerability management, and infrastructure hardening. I have operated the full breadth of the security technology stack, from CrowdStrike Falcon EDR and Microsoft Defender through to email security with Mimecast, Privileged Access Management (PAM) with BeyondTrust, and Intune Mobile Device Management (MDM) / Mobile Application Management (MAM), across an estate of approximately 8,000 users. I bring a governance-grounded approach to security operations, with hands-on experience translating National Institute of Standards and Technology (NIST), CIS Controls and ISO 27001 requirements into technical controls, and I am well-suited to a hybrid senior engineer role where I can contribute directly to a focused security team delivering threat detection, response and resilience for a financial services environment.

CORE SKILLS AND TECHNICAL STACK

- **SIEM and SOAR:** Microsoft Sentinel + Kusto Query Language (KQL), CrowdStrike NG-SIEM / Falcon LogScale, SOAR playbook development, alert triage and incident management workflows
- **Endpoint Detection and Response (EDR / XDR):** CrowdStrike Falcon (EDR, Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender (XDR)
- **Email and Web Security:** Mimecast email security gateway, email threat protection, phishing and malware triage
- **Identity and Access Management (IAM):** Microsoft Entra ID / Azure Active Directory (Azure AD), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), BeyondTrust PAM, Group Policy
- **Endpoint and Mobile Management:** Microsoft Intune MDM / MAM, device compliance policy, endpoint configuration management
- **Vulnerability and Infrastructure Security:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus; infrastructure hardening, patch management, Intrusion Detection System (IDS) / Intrusion Prevention System (IPS)
- **Firewall and Network Security:** Check Point Harmony firewall, DDoS protection, network segmentation, perimeter security
- **Governance and Compliance:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) — Senior Cyber Security Analyst / Engineer *March 2025 – Present*

- Manage and evolve the SIEM platform (Microsoft Sentinel and CrowdStrike NG-SIEM), operating end-to-end alert triage, threat detection and incident response for an estate of approximately 8,000 users.
- Operate CrowdStrike Falcon EDR (Prevent, Insight, Discover) and Microsoft 365 Defender / XDR for EDR and XDR alert response, investigating endpoint and identity-based threats and coordinating remediation with infrastructure teams.
- Administer Mimecast email security, reviewing threat reports, configuring policies and triaging email-borne threats including phishing, business email compromise and malicious attachments.
- Manage IAM controls across Microsoft Entra ID / Azure AD, including Conditional Access policies, MFA enforcement, SSO integrations and BeyondTrust PAM to enforce least-privilege access and reduce

privileged account exposure.

- Maintain Intune MDM / MAM policies, ensuring device compliance and endpoint configuration standards are enforced across managed and bring-your-own-device (BYOD) endpoints.
- Lead vulnerability management using Tenable.io, AppCheck and Pentera BAS; prioritise and coordinate remediation activities, maintaining infrastructure hardening standards and producing governance reports for senior stakeholders.
- Operate firewall and perimeter security controls (Check Point Harmony), including rule review, change management and DDoS protection configuration.
- Develop SOAR automation playbooks using PowerShell scripting to automate alert triage, containment workflows and routine security operations tasks.

University of the Arts, London (UAL) — Cyber Security Analyst, Cyber Security and Identity

March 2022 – March 2025

- Operated Microsoft Sentinel SIEM and CrowdStrike Falcon as primary security monitoring platforms; triaged SIEM and EDR alerts, investigated incidents and escalated in line with incident response procedures aligned to NIST 800-61.
- Configured and maintained CrowdStrike Falcon Prevent prevention policies, detection rules and automated response actions; managed platform health and agent deployment across the full endpoint estate.
- Administered Mimecast, Intune and BeyondTrust PAM on a daily basis; reviewed email security telemetry, enforced MDM / MAM compliance policies and managed privileged account governance.
- Managed Azure Active Directory (Entra ID) Conditional Access policies, MFA configurations and SSO integrations to enforce identity security controls aligned to Cyber Essentials Plus.
- Performed vulnerability scanning and remediation prioritisation using Tenable.io and Nessus; delivered risk-based vulnerability reports to management and tracked remediation to closure.
- Delivered security awareness training and phishing simulations, reducing organisational susceptibility to social engineering attacks.

HICX Solutions Ltd (SaaS/FinTech) — IT Engineer: Security, Quality and Infrastructure

February 2021 – March 2022

- Implemented and maintained security controls across cloud and on-premises infrastructure for a SaaS FinTech organisation, including endpoint protection, patching and identity management.
- Configured and supported Microsoft Azure Active Directory, Intune and Microsoft 365 security settings, ensuring consistent security policy enforcement across development and production environments.
- Supported infrastructure hardening activities, firewall rule reviews and access control governance aligned to ISO 27001.
- Delivered security awareness training, produced vulnerability reports and contributed to audit and compliance activities.

KEY ACHIEVEMENTS

- Deployed and operationalised CrowdStrike Falcon EDR and Microsoft Defender for Endpoint across an estate of approximately 8,000 users, achieving full endpoint visibility and reducing mean time to detect and respond to security incidents.
- Built SIEM detection capabilities in Microsoft Sentinel using KQL and CrowdStrike NG-SIEM, delivering a detection library mapped to MITRE ATT&CK that improved threat visibility across endpoint, identity and cloud surfaces.
- Established BeyondTrust PAM governance across UAL, eliminating standing privileged accounts and enforcing just-in-time access to critical systems.
- Reduced phishing susceptibility rates through targeted security awareness training and Mimecast policy improvements, demonstrating measurable improvement in organisational security posture.
- Developed SOAR playbooks automating high-volume alert triage categories, increasing analyst efficiency and reducing mean time to respond across the Security Operations Centre (SOC).

EDUCATION

- M.Sc. Environmental and Resource Engineering

- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
