

PROSPER AWUNI

Senior Cyber Security Analyst

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniproper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Analyst with more than five years of experience across Security Information and Event Management (SIEM) operations, Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR) tooling, incident response leadership, threat hunting, threat modelling, and vulnerability management in large, complex enterprise environments. At the University of the Arts London (UAL), I have played a central role in developing and enhancing enterprise-wide cyber security operations across an 8,000-user global estate, leading incident response as the senior escalation point, conducting proactive threat hunting campaigns, authoring and improving security playbooks, managing vulnerability remediation programmes, and driving continuous improvement in detection and response capability. I bring a security-by-design mindset to infrastructure and change projects, and I am confident providing clear, practical guidance to senior stakeholders at all levels of an organisation. I hold the Certified Information Systems Security Professional (CISSP) certification and bring a collaborative, professional approach to every engagement.

CORE SKILLS AND TECHNICAL STACK

- **SIEM:** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel (workspace design, KQL, data connectors, analytics rules, automated playbooks, workbooks), Splunk
- **EDR/XDR:** CrowdStrike Falcon (Prevent, Insight, Discover) — expert deployment and management; Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 (M365) Defender
- **Incident Response:** Senior escalation lead, full-lifecycle IR (NIST 800-61), MITRE ATT&CK framework mapping, playbook authoring and continuous improvement
- **Threat Hunting and Threat Modelling:** Proactive hunting via CrowdStrike Falcon Insight and Microsoft Sentinel KQL; adversary technique mapping using MITRE ATT&CK
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentera Breach and Attack Simulation (BAS)
- **Identity and Access:** Microsoft Entra ID / Azure Active Directory (Azure AD), Conditional Access, MFA, SSO; BeyondTrust Privileged Access Management (PAM)
- **Endpoint and Device Management:** Microsoft Intune MDM and MAM, Tanium
- **Email and Web Security:** Mimecast; Check Point Harmony firewall
- **Scripting and Automation:** PowerShell, KQL, SOAR playbook automation
- **Security Tooling:** Able to support, improve, and optimise SIEM, EDR/XDR, and broader security tooling across complex enterprise estates
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK, JISC

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL) — Senior Cyber Security Analyst / Engineer *March 2025 – Present*

- Monitor, investigate, and respond to cyber security alerts and incidents across SIEM, EDR/XDR, and endpoint platforms, applying structured triage processes to prioritise and contain threats efficiently
- Lead and support incident response activities as the senior escalation point, overseeing containment, investigation, eradication, recovery, and post-incident review for security events across an 8,000-user global estate
- Conduct proactive threat hunting campaigns using CrowdStrike Falcon Insight and Microsoft Sentinel KQL, applying MITRE ATT&CK framework techniques to identify stealthy adversary activity before alerts trigger
- Lead threat modelling exercises to identify and prioritise high-risk attack paths across the enterprise and inform detection coverage improvements
- Manage vulnerability remediation and penetration testing oversight using Tenable.io, AppCheck, Nessus, and Pentera BAS, co-ordinating with infrastructure and application teams to drive down risk exposure

- Support and continuously improve SIEM, EDR/XDR, and security tooling across the estate, including tuning Sentinel analytics rules, building KQL detection queries, developing automated playbooks, and maintaining CrowdStrike Falcon module configurations
- Provide security guidance across infrastructure and change projects, embedding security-by-design principles and ensuring security requirements are reflected in project delivery
- Maintain and improve cyber security operational documentation, playbooks, and response procedures to drive consistent and effective incident handling
- Engage senior stakeholders to communicate risk posture, active incident status, and control recommendations clearly and concisely

University of the Arts London (UAL) — Cyber Security Analyst, Cyber Security and Identity

March 2022 – March 2025

- Monitored and triaged alerts from SIEM and EDR platforms, investigating security events and escalating incidents to senior analysts in line with defined playbooks and response procedures
- Supported proactive threat hunting activities, querying SIEM and EDR data to identify indicators of compromise and anomalous behaviour across endpoint, identity, and network telemetry
- Assisted in managing vulnerability scanning programmes using Nessus and Tenable.io, producing remediation reports and tracking issue closure across infrastructure teams
- Contributed to the deployment and ongoing management of CrowdStrike Falcon Prevent and Microsoft Defender for Endpoint across the UAL estate
- Authored incident response playbooks and standard operating procedures, improving team consistency and reducing mean time to respond
- Supported Microsoft Entra ID administration, Conditional Access policy updates, and MFA rollout, strengthening identity security controls across the user population
- Delivered security awareness training and phishing simulation campaigns to improve end-user resilience to social engineering attacks

HICX Solutions Ltd (SaaS/FinTech) — IT Engineer: Security, Quality and Infrastructure

February 2021 – March 2022

- Managed endpoint protection, patch management, and security tooling across the corporate IT estate, maintaining security baseline standards in a SaaS and FinTech environment
- Administered identity and access management processes including Active Directory provisioning, access reviews, and access control policy enforcement
- Monitored security alerts and escalated incidents, supporting initial triage and investigation activities
- Contributed to ISO 27001 compliance activities including evidence collection, control gap analysis, and security policy documentation
- Managed MDM solutions for corporate device management, enforcing security baselines across the mobile and laptop estate

KEY ACHIEVEMENTS

- Built and operationalised UAL's hybrid SOC from the ground up, integrating CrowdStrike Falcon NG-SIEM and Microsoft Sentinel to deliver unified, enterprise-wide threat visibility
- Deployed CrowdStrike Falcon Prevent, Insight, and Discover across an 8,000-user estate, delivering comprehensive EDR coverage and enabling mature threat hunting capability
- Deployed Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across UAL's 8,000-user M365 estate, consolidating endpoint and identity threat detection onto a unified XDR platform
- Designed and implemented BeyondTrust Privileged Access Management (PAM) at UAL, eliminating uncontrolled privileged access and establishing full audit trail for all administrative sessions
- Led UAL's Cyber Essentials Plus certification programme, co-ordinating cross-team remediation of technical controls and achieving certification within the target timescale
- Developed and maintained a library of structured incident response playbooks covering major threat scenarios, reducing analyst response time and improving consistency across the security team

EDUCATION

M.Sc. Environmental and Resource Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
