

PROSPER AWUNI

Senior Cyber Security Engineer | Microsoft Azure | Cloud Security | Endpoint Detection and Response | Remote

United Kingdom (Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience securing complex hybrid cloud and on-premises environments. I specialise in implementing and improving security controls across Microsoft Azure and hybrid infrastructure, with expert-level capability in CrowdStrike Falcon Endpoint Detection and Response (EDR), Microsoft Sentinel Security Information and Event Management (SIEM) with Kusto Query Language (KQL), Microsoft Defender for Endpoint (MDE), Microsoft Entra ID (formerly Azure Active Directory), and Microsoft Intune Mobile Device Management (MDM). I have a strong track record of building and improving security posture across large organisations, including designing a hybrid Security Operations Centre (SOC), leading major platform deployments covering 8,000 users, and managing full-lifecycle incident response as senior escalation lead. I am an effective remote worker with excellent communication skills and a disciplined approach to documentation, playbook management, and asynchronous collaboration. I am excited to bring my Microsoft security stack expertise and CISSP-level strategic thinking to a senior engineering role within a well-known UK retail environment.

CORE SKILLS AND TECHNICAL STACK

- **Cloud and Hybrid Security:** Microsoft Azure security architecture; hybrid cloud and on-premises infrastructure protection; security controls design and improvement
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (EDR, Prevent, NG-SIEM, Insight, Discover) - expert deployment and management; Microsoft Defender for Endpoint (MDE)
- **SIEM/SOAR:** Microsoft Sentinel (workspace design, data connectors, KQL analytics rules, automated playbooks, workbooks); CrowdStrike NG-SIEM; Security Orchestration, Automation and Response (SOAR) automation
- **Microsoft Defender Stack:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender; 8,000-user enterprise rollout
- **Identity and Access Management:** Microsoft Entra ID (Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO)
- **MDM/MAM:** Microsoft Intune device compliance and Mobile Application Management (MAM)
- **Privileged Access Management (PAM):** BeyondTrust PAM; least-privilege enforcement and session monitoring
- **Vulnerability Management:** Tenable.io, AppCheck, Pentera Breach and Attack Simulation (BAS), Nessus; remediation tracking
- **Email Security:** Mimecast email security gateway
- **Firewall and Perimeter:** Check Point Harmony next-generation firewall; IDS/IPS; WAF/DDoS controls
- **Incident Response:** Senior escalation lead; NIST 800-61; MITRE ATT&CK framework; playbook authoring
- **Automation and Scripting:** PowerShell scripting; SOAR workflow development
- **Compliance Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials+

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) — Senior Cyber Security Analyst / Engineer *March 2025 – Present*

- Own the design and ongoing improvement of the organisation's security controls across a **Microsoft Azure and hybrid** infrastructure, spanning cloud workloads, on-premises servers, and a distributed 8,000-user endpoint estate.

- Lead **CrowdStrike Falcon** (EDR, Prevent, NG-SIEM, Insight, Discover) operations: policy configuration, detection tuning, threat hunting, and platform optimisation across hybrid cloud and on-premises environments.
- Architect and manage **Microsoft Sentinel** SIEM workspace: design data connectors, build KQL analytics rules, develop automated incident response playbooks, and produce executive-level security workbooks.
- Lead **Microsoft Defender for Endpoint (MDE)**, **Microsoft Defender for Identity (MDI)**, and Microsoft 365 Defender across the full user estate; improve detection coverage and response workflows continuously.
- Manage **Microsoft Entra ID** (Azure Active Directory), Conditional Access policies, MFA, and SSO; govern identity and privileged access across cloud and on-premises systems.
- Administer **Microsoft Intune** MDM/MAM: mobile device enrolment, compliance policies, application management, and Conditional Access integration.
- Own **BeyondTrust PAM** deployment: privileged account governance, credential vaulting, and just-in-time access enforcement.
- Manage the **vulnerability management** programme using Tenable.io, AppCheck, and Pentra BAS; prioritise remediation by risk, track progress, and report to security leadership.
- Serve as senior escalation lead for **security incident response**, leading investigations and coordinating recovery in line with NIST 800-61.
- Develop and maintain **PowerShell** automation scripts and SOAR playbooks to streamline security operations and reduce manual response effort.

University of the Arts, London (UAL) — Cyber Security Analyst, Cyber Security and Identity

March 2022 – March 2025

- Supported security operations across Microsoft Azure and hybrid infrastructure: alert triage, investigation, and escalation using CrowdStrike Falcon and Microsoft Sentinel.
- Managed Microsoft Entra ID, Conditional Access, Group Policy, and MFA across a multi-site organisation.
- Administered Microsoft Intune for device compliance and application policy across the endpoint estate.
- Conducted vulnerability scanning using Nessus and AppCheck; coordinated risk-based remediation with infrastructure and application teams.
- Responded to security incidents across cloud and on-premises environments; authored post-incident reports and improved detection playbooks.
- Developed SIEM detection rules and SOAR automation to improve alert quality and operational efficiency.
- Delivered security awareness training and simulated phishing exercises to staff across the organisation.

HICX Solutions Ltd (SaaS/FinTech) — IT Engineer: Security, Quality and Infrastructure

February 2021 – March 2022

- Implemented and maintained security controls across SaaS/cloud infrastructure in a FinTech environment, improving overall security posture in line with ISO 27001.
- Managed endpoint security, patch management, and vulnerability remediation across the corporate estate.
- Administered identity and access management including MFA, least-privilege access controls, and cloud service security configurations.
- Supported network and infrastructure security operations including monitoring, firewall management, and logging.

KEY ACHIEVEMENTS

- Designed and built a hybrid **Security Operations Centre (SOC)** from the ground up, integrating CrowdStrike Falcon NG-SIEM and Microsoft Sentinel for unified threat visibility across cloud and on-premises environments.
- Led **Microsoft Defender** (MDE, MDI, M365 Defender) deployment across 8,000 users, significantly improving endpoint protection and identity threat detection coverage.
- Architected **Microsoft Sentinel** workspace including custom data connectors, KQL-based detection rules, automated SOAR playbooks, and reporting workbooks, reducing mean time to detect and respond.
- Implemented **BeyondTrust PAM**, eliminating standing privileged access and enforcing just-in-time administration across critical systems.

- Achieved and maintained **Cyber Essentials Plus** certification, demonstrating continuous improvement in technical security controls across the organisation.
- Delivered measurable reduction in critical vulnerability exposure through structured vulnerability management using Tenable.io, AppCheck, and Pentera BAS.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
