

PROSPER AWUNI

Senior Threat Detection Engineer | SIEM and UEBA | CrowdStrike Falcon NG-SIEM | Microsoft Sentinel | MITRE ATT&CK | Detection Engineering

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Threat Detection Engineer with over five years of experience in the innovation and development of Security Information and Event Management (SIEM) and User and Entity Behaviour Analytics (UEBA) systems within enterprise security operations. I specialise in understanding multiple vendor feeds and security tool log sources, evaluating and improving the capability of analytics tools to detect anomalous, suspicious, and malicious behaviours. I create new content use cases based on threat intelligence, analyst feedback, available log data, and learnings from previous incidents, mapping detections to the MITRE ATT&CK framework to ensure structured, evidence-based coverage. My experience spans CrowdStrike Falcon NG-SIEM, Microsoft Sentinel with Kusto Query Language (KQL), and the full Microsoft Defender suite. I am a strong collaborator who works closely with Security Operations Centre (SOC) analysts and threat intelligence teams to translate intelligence into actionable, high-fidelity detection content. I am seeking a senior hybrid detection engineering role where I can drive measurable improvements in threat visibility and response capability.

CORE SKILLS AND TECHNICAL STACK

- **SIEM and UEBA Development:** Microsoft Sentinel (KQL), CrowdStrike Falcon NG-SIEM, detection rule engineering, use case development, analytics tool optimisation
- **Vendor Feed Analysis and Log Source Management:** Multi-vendor log ingestion, feed quality assessment, log normalisation and enrichment recommendations
- **Threat Detection Engineering:** Use case design based on threat intelligence, analyst feedback, incident learnings, and MITRE ATT&CK framework
- **Anomalous, Suspicious, and Malicious Behaviour Detection:** Behavioural analytics, detection logic tuning, false positive reduction, signal fidelity improvement
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon Prevent, Insight, Discover, Microsoft Defender for Endpoint (MDE)
- **Threat Intelligence Integration:** Threat intelligence-driven detection development, MITRE ATT&CK mapping, threat hunting
- **Incident Response:** NIST 800-61 incident handling, MITRE ATT&CK-aligned investigation, incident learnings for detection improvement
- **Scripting and Automation:** PowerShell, KQL, detection content automation
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus
- **Identity and Access:** Microsoft Entra ID, Azure Active Directory (AD), Conditional Access, BeyondTrust Privileged Access Management (PAM)
- **Frameworks:** MITRE ATT&CK, NIST CSF, NIST 800-61, CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Lead the innovation and development of SIEM detection capabilities using Microsoft Sentinel (KQL) and CrowdStrike Falcon NG-SIEM, continuously improving analytics tools to detect anomalous, suspicious, and malicious behaviours across the estate
- Analyse multiple vendor feeds and security tool log sources, identifying data quality issues and recommending improvements to ensure the SIEM is ingesting high-fidelity, reliable data
- Create new detection use cases based on threat intelligence, SOC analyst feedback, available log data, and learnings from previous incidents, mapped to the MITRE ATT&CK framework for structured coverage
- Understand data feeds from multiple security tools including CrowdStrike Falcon, Microsoft Defender for Endpoint (MDE), Defender for Identity (MDI), and Mimecast, assessing feed capability and quality

- Identify and develop analytics use cases to detect advanced persistent threats, lateral movement, privilege escalation, and data exfiltration based on threat intelligence and adversary tradecraft
- Conduct proactive threat hunting using CrowdStrike Falcon Insight, translating hunting findings into new permanent detection rules and SIEM content
- Manage CrowdStrike Falcon NG-SIEM platform (Prevent, Insight, Discover) across an 8,000-user enterprise, performing alert investigation, escalation, and response
- Perform incident response activities following NIST 800-61 procedures, extracting learnings to inform new detection logic and improve existing use cases
- Automate detection content deployment and alert enrichment workflows using PowerShell and KQL scripting, improving operational efficiency
- Manage vulnerability management programmes using Tenable.io and Pentera Breach and Attack Simulation (BAS), using findings to improve detection coverage for known exploitation paths

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity *March 2022 - March 2025*

- Developed and refined SIEM detection use cases in Microsoft Sentinel using KQL, improving the analytics tool capability to identify anomalous and malicious behaviour patterns
- Ingested and analysed log feeds from multiple vendor security tools, evaluating feed quality and recommending improvements to the data pipeline for better SIEM coverage
- Created new detection content based on threat intelligence, analyst observations, and post-incident learnings, updating use cases to reflect emerging adversary techniques
- Mapped all detection rules to MITRE ATT&CK tactics and techniques, providing structured visibility into detection coverage gaps for senior stakeholders
- Managed CrowdStrike Falcon EDR deployment and policy configuration across the full 8,000-user UAL estate
- Administered the Microsoft Defender suite (MDE, MDI, M365 Defender), correlating endpoint, identity, and email telemetry in Sentinel for multi-signal detection
- Conducted vulnerability assessments using Tenable.io and Nessus, incorporating vulnerability findings into detection engineering to improve coverage of known exploitation paths
- Supported incident response activities under NIST 800-61, capturing lessons learned for systematic integration into future detection logic

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure *February 2021 - March 2022*

- Monitored and analysed security event data from multiple tool feeds, supporting the identification of anomalous and suspicious behaviours within a SaaS/FinTech environment
- Contributed to the evaluation and improvement of security monitoring capabilities, recommending configuration changes to improve detection fidelity
- Supported security incident triage and investigation, documenting findings to inform future detection improvements
- Maintained endpoint security and identity controls, ensuring log sources were correctly feeding into the organisation's monitoring infrastructure

KEY ACHIEVEMENTS

- Developed a structured library of MITRE ATT&CK-mapped SIEM detection use cases at UAL, covering over 80 techniques across multiple log sources and vendor feeds, delivering measurable improvement in threat coverage
- Identified and remediated multiple log feed quality issues impacting SIEM analytics effectiveness at UAL, improving data fidelity and reducing false negative risk for key detection use cases
- Built threat intelligence-driven detection content for 15+ high-priority use cases covering credential theft, lateral movement, and data exfiltration techniques, based on threat intelligence and previous incidents
- Led proactive threat hunting campaigns using CrowdStrike Falcon Insight that uncovered previously undetected threats, with all findings converted into permanent detection rules
- Managed CrowdStrike Falcon NG-SIEM and Microsoft Sentinel in parallel across an 8,000-user estate, maintaining dual SIEM coverage and cross-platform alert correlation

- Delivered Microsoft Defender for Endpoint (MDE) and Defender for Identity (MDI) deployment across 8,000 users, expanding the breadth of vendor feeds available to the SIEM for analytics development

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
