

PROSPER AWUNI

Senior Cyber Security Engineer | SIEM | EDR | Privileged Access Management | Vulnerability Management

United Kingdom (Hybrid) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) with over five years of experience managing Security Information and Event Management (SIEM), Endpoint Detection and Response (EDR), and Privileged Access Management (PAM) platforms across large enterprise environments. I bring expert hands-on experience with CrowdStrike Falcon EDR, Mimecast email security gateways, Microsoft Entra ID (formerly Azure Active Directory) with Conditional Access, Multi-Factor Authentication (MFA) and Single Sign-On (SSO), Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune, and Tenable.io vulnerability scanning and remediation. I have a proven track record in security alert triage and response, Web Application Firewall (WAF) and Distributed Denial of Service (DDoS) protection, Identity and Access Management (IAM), and firewall administration, and I am experienced in delivering security awareness training programmes and remediating penetration test findings across regulated enterprise environments.

CORE SKILLS AND TECHNICAL STACK

- **SIEM / Security Orchestration, Automation and Response (SOAR):** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel with Kusto Query Language (KQL), alert triage, detection rule configuration, incident management
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon Prevent, Insight, Discover (expert level, 8,000-user deployment)
- **Identity and Access Management (IAM):** Microsoft Entra ID / Azure Active Directory (AD) / Conditional Access / MFA / SSO / Group Policy
- **Privileged Access Management (PAM):** BeyondTrust PAM platform
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune
- **Email and web security gateways:** Mimecast
- **Vulnerability management and remediation:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus
- **Firewall, IDS/IPS, WAF/DDoS:** Check Point Harmony, Intrusion Detection System (IDS) / Intrusion Prevention System (IPS) monitoring
- **Microsoft Defender suite:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Incident Response:** NIST 800-61, MITRE ATT&CK framework, SOAR playbooks
- **Security awareness training:** Phishing simulation, user education campaigns
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK
- **Scripting:** PowerShell automation

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Operate CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover) as the primary Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR) and Endpoint Detection and Response (EDR) platform across an 8,000-user estate, triaging and responding to security alerts and driving remediation aligned to the NIST 800-61 Incident Response framework and MITRE ATT&CK

- Administer Microsoft Entra ID (formerly Azure Active Directory) Conditional Access policies, Multi-Factor Authentication (MFA), and Single Sign-On (SSO) controls for the full 8,000-user population, enforcing least-privilege access and identity governance
- Manage BeyondTrust Privileged Access Management (PAM) platform, controlling and auditing privileged account activity across the enterprise estate
- Configure and maintain Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) policies across mobile and desktop device fleets, ensuring endpoint security baseline adherence
- Lead end-to-end vulnerability management using Tenable.io, Pentera BAS, AppCheck, and Nessus; produce risk-scored vulnerability reports and coordinate remediation with system owners within agreed Service Level Agreements (SLAs)
- Manage Mimecast email security gateway, including inbound/outbound policy configuration, anti-phishing controls, Distributed Denial of Service (DDoS) and Web Application Firewall (WAF) rule review, and phishing incident investigation and response
- Maintain and tune Intrusion Detection System (IDS) / Intrusion Prevention System (IPS) rules and Check Point Harmony firewall policies, reviewing logs for anomalous network behaviour and managing security certificate renewals
- Design and deliver security awareness training campaigns and simulated phishing exercises across the institution, achieving measurable improvements in user reporting rates
- Remediate penetration test findings, working with third-party security suppliers and internal engineering teams to close critical and high-severity vulnerabilities within agreed timescales
- Administer Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender to reinforce endpoint and identity security posture
- Author SOAR playbooks to automate routine alert triage tasks, reducing manual analyst workload and mean time to respond (MTTR)

University of the Arts London (UAL)

March 2022 - March 2025

Cyber Security Analyst, Cyber Security and Identity

- Monitored and investigated security alerts across SIEM, EDR, and email security platforms, triaging events and escalating critical incidents for senior review and response
- Administered MFA, SSO, and Conditional Access policies within Microsoft Entra ID, supporting identity lifecycle management across a large and complex user base
- Conducted scheduled vulnerability scans using Tenable.io and Nessus, generated risk-scored reports, and tracked remediation activities through to closure
- Managed Mimecast email security gateway configurations and investigated phishing and email-borne malware incidents
- Supported Microsoft Intune MDM/MAM policy management for mobile and laptop device compliance
- Contributed to incident response activities including evidence gathering, containment, eradication, and post-incident reporting in line with the NIST 800-61 framework
- Delivered security awareness content and supported phishing simulation campaigns to improve end-user vigilance across the institution

HICX Solutions Ltd (Software as a Service / FinTech)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Deployed and maintained endpoint security tools including EDR agents across cloud and on-premises infrastructure, supporting the transition to a cloud-first security posture
- Managed firewall rule requests, security certificate renewals, and Identity and Access Management (IAM) access reviews across the SaaS platform
- Supported SOC 2 Type II compliance activities and coordinated vendor security assessment processes to meet regulatory and contractual obligations
- Administered MDM policies for employee endpoint devices, ensuring compliance with company security baselines

- Contributed to vulnerability scanning, remediation tracking, and security hardening activities across the infrastructure estate

KEY ACHIEVEMENTS

- Led the enterprise-wide deployment of CrowdStrike Falcon EDR across 8,000 users at UAL, consolidating legacy antivirus tooling and delivering a unified SIEM/SOAR and EDR capability
- Spearheaded the successful attainment of Cyber Essentials Plus certification, leading the technical evidence collation, gap analysis, and remediation programme
- Implemented BeyondTrust Privileged Access Management (PAM) to replace manual privileged account processes, improving audit trail coverage and reducing standing privilege exposure
- Reduced mean time to detect (MTTD) and mean time to respond (MTTR) to security incidents by authoring and deploying SOAR playbooks that automated tier-1 alert triage workflows
- Delivered a structured security awareness training and phishing simulation programme resulting in measurable improvement in user reporting of suspicious emails
- Led vulnerability management programme across UAL, coordinating Tenable.io and Pentera BAS scans and driving down critical and high vulnerability counts through targeted remediation cycles

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
