

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike Falcon | SIEM/SOAR | Endpoint Detection and Response

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a senior cyber security engineer with over five years of hands-on experience managing and optimising enterprise security platforms across endpoint, cloud, and network environments. I specialise in CrowdStrike Falcon endpoint detection and response (EDR), Security Information and Event Management (SIEM) and Security Orchestration Automation and Response (SOAR), and multi-layered security operations including web and email security gateways, Privileged Access Management (PAM), identity and access management, and vulnerability scanning and remediation. At the University of the Arts London (UAL), I have led the deployment and ongoing management of CrowdStrike Falcon across the institution's estate, administered Mimecast email security, managed Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM), and implemented BeyondTrust Privileged Access Management. I am a Certified Information Systems Security Professional (CISSP) and bring a structured, risk-based approach to protecting complex hybrid infrastructure. I am seeking a hybrid role in a close-knit security team where I can apply deep expertise in CrowdStrike EDR, SIEM/SOAR alert response, firewall management, and vulnerability remediation to maintain robust security across a demanding enterprise environment.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (EDR, Prevent, NG-SIEM, Insight, Discover) - Expert
- **SIEM/SOAR:** Microsoft Sentinel with Kusto Query Language (KQL), CrowdStrike NG-SIEM, alert triage, detection rule tuning and response automation
- **Email Security:** Mimecast email security gateway configuration, policy management, and threat response
- **Identity and Access Management (IAM):** Microsoft Azure Active Directory (Azure AD) / Entra ID, Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), Group Policy
- **Mobile Device and Application Management:** Microsoft Intune MDM/MAM, Mobile Application Management policies
- **Privileged Access Management (PAM):** BeyondTrust PAM implementation and administration
- **Vulnerability Management:** Tenable.io, AppCheck, Pentra Breach and Attack Simulation (BAS), Nessus - scanning, remediation tracking and reporting
- **Microsoft Defender Suite:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender - deployed across 8,000 users
- **Firewall and Network Security:** Check Point Harmony firewall, Intrusion Detection System (IDS)/Intrusion Prevention System (IPS), WAF/DDoS mitigation
- **Security Frameworks:** NIST Cybersecurity Framework (CSF), NIST 800-61 Incident Response, MITRE ATT&CK, CIS Controls, ISO 27001, Cyber Essentials Plus
- **Scripting and Automation:** PowerShell scripting, SOAR playbook development
- **Endpoint Management:** Tanium, Microsoft Intune, MDM/MAM policy enforcement

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Manage and optimise the CrowdStrike Falcon platform across the enterprise estate, including EDR policy configuration, threat prevention tuning, real-time response, and NG-SIEM alert management and investigation.
- Administer Mimecast email security gateway, configuring anti-phishing, anti-spoofing, impersonation protection, and URL filtering policies, and triaging email-borne threats escalated from the service desk.

- Lead Security Information and Event Management (SIEM) operations using Microsoft Sentinel with Kusto Query Language (KQL), writing custom detection rules, fine-tuning alert logic, and conducting proactive threat hunting aligned to the MITRE ATT&CK framework.
- Manage Security Orchestration Automation and Response (SOAR) workflows using PowerShell and Logic Apps to automate alert triage, containment actions, and incident ticketing, reducing mean time to respond (MTTR) significantly.
- Administer the BeyondTrust Privileged Access Management (PAM) platform, governing privileged account lifecycle, session recording, and just-in-time access for administrative accounts across the estate.
- Oversee Microsoft Intune MDM and MAM configuration, managing device compliance policies, conditional access enforcement, and application protection across the institutional mobile device fleet.
- Manage enterprise vulnerability scanning using Tenable.io, AppCheck, and Pentera Breach and Attack Simulation (BAS), prioritising and tracking remediation of critical and high findings with infrastructure and application teams.
- Implement and maintain MFA and SSO solutions using Microsoft Entra ID / Azure Active Directory, Conditional Access policies, and identity protection rules for approximately 8,000 staff and students.
- Oversee the Microsoft Defender suite including Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender, managing policies, investigating alerts, and coordinating incident response.
- Lead incident response activities in line with the NIST 800-61 framework, coordinating containment, eradication, recovery, and post-incident reviews for security events including ransomware threats, phishing campaigns, and credential compromise incidents.
- Manage Tanium endpoint management platform for real-time asset visibility, patch assessment, and configuration compliance across the estate.
- Deliver security awareness training sessions and phishing simulation campaigns to reduce end-user susceptibility to social engineering attacks.
- Remediate findings from annual penetration tests and red team exercises, tracking and closing vulnerabilities identified in web applications, network infrastructure, and Active Directory configurations.

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity *March 2022 - March 2025*

- Delivered day-to-day security operations including alert triage from SIEM and EDR platforms, investigating and escalating potential incidents in line with established response procedures.
- Managed vulnerability scanning programmes using Nessus, Tenable.io, and AppCheck, producing management reports and coordinating remediation with technical teams.
- Supported deployment and management of the Microsoft Defender for Endpoint (MDE) platform across the UAL estate, onboarding devices and tuning detection policies to reduce false positives.
- Administered Azure Active Directory / Entra ID, including user lifecycle management, MFA enrolment, Conditional Access policy configuration, and identity protection alerts.
- Assisted in the configuration and management of Check Point Harmony firewall rules, reviewing rulesets for unnecessary exposure and documenting change requests.
- Supported the deployment and management of CrowdStrike Falcon, maintaining sensor health, reviewing threat intelligence findings, and actioning containment of compromised hosts.
- Developed and delivered cyber security awareness content and delivered phishing simulation campaigns to over 8,000 UAL users, significantly reducing click rates over successive campaigns.
- Contributed to achieving and maintaining Cyber Essentials Plus certification, conducting internal assessments against the scheme's technical controls.
- Supported incident response activities, acting as first responder for Tier 2 security alerts and escalating to senior engineers where required.

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Responsible for the security, quality, and infrastructure operations of a SaaS-based supplier management platform, ensuring availability, integrity, and confidentiality of company and customer data.
- Managed endpoint security tooling, network access controls, and identity management for the internal corporate environment.

- Supported internal IT security audits, ensuring alignment with data protection requirements and company security policies.
- Administered MDM solutions for corporate device management, enforcing security baselines across laptop and mobile device fleets.
- Assisted with vulnerability assessments and patch management, coordinating with development and infrastructure teams to address identified risks.

KEY ACHIEVEMENTS

- Led full deployment and optimisation of CrowdStrike Falcon EDR, NG-SIEM, and threat prevention modules across the UAL estate, establishing a mature detection and response capability.
- Deployed the Microsoft Defender suite (MDE, MDI, M365 Defender) across approximately 8,000 users at UAL, reducing endpoint incident dwell time and improving identity threat coverage.
- Implemented BeyondTrust Privileged Access Management (PAM) from evaluation through to production, replacing unmanaged privileged credentials and enabling full session recording for all administrative access.
- Automated key SOAR workflows using PowerShell and Microsoft Sentinel Logic Apps, reducing manual alert triage effort and accelerating mean time to contain (MTTC) by over 40%.
- Drove UAL's Cyber Essentials Plus certification through systematic internal assessment and remediation of technical control gaps across network, endpoint, and identity layers.
- Reduced phishing click rates across UAL by over 60% over two years through targeted simulation campaigns and tailored security awareness training programmes.
- Implemented Pentera Breach and Attack Simulation (BAS) to provide continuous, automated validation of security controls, enabling data-driven prioritisation of vulnerability remediation effort.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
