

PROSPER AWUNI

Senior Cyber Security Engineer | SIEM and Monitoring | Incident Management | Cyber Risk and Security Governance

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of experience serving as the senior technical point of contact for cyber security within large, multi-site organisations. I hold the Certified Information Systems Security Professional (CISSP) certification and combine strong hands-on capability in Security Information and Event Management (SIEM) and security monitoring technologies, incident coordination and post-incident review, and third-party Security Operations Centre (SOC) management with a strategic understanding of cyber risk management, security governance, and compliance frameworks. I have a strong track record of producing clear, meaningful reporting for senior stakeholders, embedding continuous improvement into security operations, managing engagement with outsourced SOC partners, and building collaborative security cultures across technical and non-technical teams in large, complex organisations.

CORE SKILLS AND TECHNICAL STACK

- **SIEM and Monitoring Technologies:** Microsoft Sentinel, CrowdStrike Falcon NG-SIEM, alert triage, detection tuning, Kusto Query Language (KQL), SOAR playbooks
- **Incident Response and Management:** Incident coordination, post-incident reviews, continuous improvement, NIST 800-61, MITRE ATT&CK framework
- **Third-Party SOC Engagement:** Managing and directing outsourced SOC providers, setting monitoring requirements, reviewing detection coverage, and driving response SLAs
- **Cyber Risk Management:** Risk identification, assessment, and control reviews, cyber risk registers, control gap analysis
- **Security Governance:** Policy development, security frameworks, stakeholder reporting, board-level risk communication
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus - scanning, risk prioritisation, and remediation tracking
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (Falcon Prevent, Falcon Insight, Falcon Discover) - Expert
- **Identity and Access Management (IAM):** Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, MFA, SSO
- **Privileged Access Management (PAM):** BeyondTrust
- **Endpoint and Mobile Management:** Microsoft Intune (MDM/MAM), Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI)
- **Scripting and Automation:** PowerShell, SOAR automation
- **Frameworks and Standards:** NIST Cybersecurity Framework (NIST CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer

March 2025 - Present

University of the Arts, London (UAL)

- Act as the senior point of contact for cyber security matters across a multi-site organisation of over eight thousand users, providing clear technical guidance to leadership and operational teams
- Ensure effective configuration and use of SIEM and monitoring technologies, including Microsoft Sentinel and CrowdStrike Falcon NG-SIEM, producing meaningful security reporting for senior stakeholders and the executive leadership team
- Oversee incident management end-to-end, including initial coordination, containment, eradication, recovery, and post-incident review processes with documented continuous improvement actions in line with NIST 800-61

- Lead engagement with third-party SOC providers, ensuring effective monitoring, detection coverage, and response aligned to agreed service-level agreements and the MITRE ATT&CK framework
- Identify, assess, and mitigate cyber risks through regular risk assessments and control reviews, maintaining the cyber risk register and reporting risk status to senior leadership
- Ensure SIEM detection logic is kept current and aligned to evolving threat landscapes, tuning analytics rules and SOAR playbooks to reduce false positive rates and improve alert fidelity
- Manage vulnerability management lifecycle using Tenable.io, Pentera BAS, AppCheck, and Nessus, prioritising findings and tracking remediation to closure in collaboration with infrastructure and application owners
- Oversee CrowdStrike Falcon EDR administration across eight thousand-plus endpoints, ensuring endpoint protection policies are current and effective
- Administer BeyondTrust PAM to govern privileged access across IT and third-party accounts, enforcing least-privilege and zero standing privilege principles
- Lead delivery of security awareness training and phishing simulation campaigns to embed a strong security culture across the organisation

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

University of the Arts, London (UAL)

- Onboarded and operationalised Microsoft Sentinel SIEM/SOAR from initial deployment through to production, writing KQL analytics rules and building SOAR playbooks to accelerate incident containment and response
- Supported incident management processes including coordination across technical teams, stakeholder communication, and post-incident reviews with structured lessons-learned outputs
- Managed engagement with the third-party SOC, setting monitoring requirements, reviewing detection coverage, and driving improvements to detection and response processes
- Deployed CrowdStrike Falcon EDR across eight thousand-plus endpoints, establishing enterprise-wide endpoint visibility and detection capability
- Managed cyber risk assessments and contributed to the organisation's ISO 27001 and Cyber Essentials Plus compliance programmes, maintaining risk registers and control evidence packs
- Administered Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, and MFA policies to enforce identity security controls across the estate
- Conducted regular vulnerability scanning and remediation tracking using Tenable.io and Nessus, producing risk-prioritised remediation reports for senior stakeholders
- Developed and maintained cyber security policies, standards, and procedures aligned to NIST CSF, CIS Controls, and ISO 27001 frameworks

IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

HICX Solutions Ltd (SaaS/FinTech)

- Implemented and maintained security controls across a SaaS/FinTech infrastructure environment covering endpoint security, network access controls, and Identity and Access Management (IAM)
- Supported security incident handling and contributed to post-incident review documentation, driving identified improvement actions
- Conducted vulnerability assessments and coordinated remediation of identified security weaknesses across cloud and on-premises systems
- Contributed to ISO 27001 audit readiness activities, maintaining security controls documentation, risk registers, and audit evidence packs
- Supported development and delivery of security awareness training to build a security-first culture across the engineering and operations teams

KEY ACHIEVEMENTS

- Engineered and onboarded Microsoft Sentinel SIEM from initial deployment through to production at UAL, delivering custom KQL detection rules and SOAR automation playbooks that significantly reduced mean time to detect (MTTD) and mean time to respond (MTTR)

- Established and led a structured third-party SOC engagement model at UAL, improving detection coverage alignment to MITRE ATT&CK and driving measurable improvements to response service-level agreements
- Led end-to-end cyber risk management programme including risk register maintenance, control reviews, and board-level risk reporting aligned to NIST CSF and ISO 27001
- Achieved and maintained Cyber Essentials Plus certification across the organisation through structured gap remediation and controls assurance activities
- Deployed CrowdStrike Falcon EDR across eight thousand-plus endpoints, providing full enterprise endpoint visibility and reducing critical alert dwell time
- Managed vulnerability management lifecycle using Tenable.io, Pentera BAS, AppCheck, and Nessus, reducing critical vulnerability exposure through tracked, risk-prioritised remediation

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
