

PROSPER AWUNI

Senior Cyber Security Analyst | Threat Hunting | Microsoft Sentinel SIEM | Detection Engineering | Incident Response

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Analyst and Certified Information Systems Security Professional (CISSP) with over five years of proven experience in cyber security operations, threat hunting, detection and response, and vulnerability assessment and remediation. I bring deep hands-on expertise with Microsoft Sentinel Security Information and Event Management (SIEM), including Kusto Query Language (KQL) detection rule engineering and Security Orchestration, Automation and Response (SOAR) playbook development. I have extensive experience across Endpoint Detection and Response (EDR), Extended Detection and Response (XDR), and the Microsoft Defender suite, and I am well versed in ISO 27001, GDPR, and NIST frameworks. I am an effective escalation point for security incidents, comfortable leading threat hunting and detection improvements, and experienced in producing high-quality reporting and documentation for both technical teams and senior stakeholders within complex organisations.

CORE SKILLS AND TECHNICAL STACK

- **Security Information and Event Management (SIEM):** Microsoft Sentinel with Kusto Query Language (KQL) detection engineering - Strong; CrowdStrike NG-SIEM - Expert
- **Security Orchestration, Automation and Response (SOAR):** Microsoft Sentinel SOAR playbook engineering, automated alert response and enrichment workflows
- **Threat Hunting and Detection Engineering:** Proactive threat hunting across SIEM and EDR platforms, MITRE ATT&CK-aligned detection rule development, false positive tuning
- **Endpoint Detection and Response (EDR) / Extended Detection and Response (XDR) / Managed Detection and Response (MDR):** CrowdStrike Falcon (Expert), Microsoft Defender for Endpoint (MDE), Microsoft 365 Defender
- **Vulnerability Assessment and Remediation:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Identity and Access Management (IAM):** Microsoft Entra ID, Azure Active Directory, Conditional Access, MFA, SSO
- **Privileged Access Management (PAM):** BeyondTrust
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune
- **Microsoft Defender for Identity (MDI), Microsoft 365 Defender**
- **Email Security:** Mimecast
- **PowerShell Scripting and Automation**
- **Frameworks and Compliance:** ISO 27001, GDPR, NIST Cybersecurity Framework (CSF), NIST 800-61, MITRE ATT&CK, CIS Controls, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

- University of the Arts, London (UArL) - Senior Cyber Security Analyst / Engineer | March 2025 - Present
- Leading investigations, coordinating containment and remediation, and producing post-incident root cause analyses aligned to NIST 800-61.
 - Engineer Microsoft Sentinel Security Information and Event Management (SIEM) detection rules using Kusto Query Language (KQL) and develop Security Orchestration, Automation and Response (SOAR) playbooks to automate alert triage and response workflows, improving detection fidelity and reducing mean time to respond.
 - Lead proactive threat hunting across CrowdStrike Falcon NG-SIEM and Microsoft Sentinel, mapping threat actor behaviour to MITRE ATT&CK techniques to identify attacker activity not surfaced by automated detections.

- Manage CrowdStrike Falcon Endpoint Detection and Response (EDR) at an expert level, administering the Prevent, Insight, Discover, and NG-SIEM modules across an estate of 8,000 users with continuous tuning and optimisation.
- Conduct vulnerability assessments using Tenable.io, AppCheck, and Pentera Breach and Attack Simulation (BAS), assessing risk severity, prioritising remediation, and tracking remediation to closure in compliance with internal risk management policies.
- Implement and maintain data protection and access controls in compliance with ISO 27001, GDPR, and Cyber Essentials Plus requirements, ensuring security controls are evidenced and audit-ready.
- Administer Microsoft Entra ID and Azure Active Directory security controls, implementing Conditional Access policies, MFA, and SSO to enforce identity security standards across the organisation.
- Manage BeyondTrust Privileged Access Management (PAM) to control and audit privileged account access across critical systems and infrastructure.
- Administer Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender, including policy configuration, alert investigation, and continuous improvement of the Extended Detection and Response (XDR) coverage across the estate.
- Produce risk and security operations reporting for senior leadership and governance committees, communicating threat trends, control effectiveness, and remediation progress.

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity 2 and tier 3 security operations across SIEM, EDR, and identity platforms, performing March 2022 - March 2025
 alert triage, investigation, and escalation with structured documentation for each incident.

- Maintained and improved Microsoft Sentinel SIEM detection rules and SOAR playbooks, reducing false positive rates and improving detection coverage aligned to MITRE ATT&CK.
- Responded to and investigated security incidents, acting as a key escalation point for complex alerts including malware, phishing, credential abuse, and anomalous data access events.
- Conducted vulnerability assessments using Nessus and AppCheck across the device and application estate, reporting risk posture and tracking remediation activities.
- Performed threat hunting exercises across SIEM and EDR telemetry, proactively identifying indicators of compromise and unreported security events.
- Managed Microsoft Entra ID identity governance including Conditional Access, MFA, and SSO policies in compliance with GDPR and internal data protection requirements.
- Supported compliance reporting and evidence gathering for ISO 27001 and Cyber Essentials Plus certification processes.

HGX Solutions Ltd (SaaS/FinTech) - IT Engineer, Security, Quality and Infrastructure monitored security events and performed vulnerability scans across SaaS and cloud security platforms, February 2021 - March 2022
 escalating incidents in line with defined response procedures.

- Supported vulnerability management and remediation activities in a regulated SaaS/FinTech environment, working with development and infrastructure teams to resolve security findings.
- Implemented MFA and SSO controls for SaaS application access, reducing credential-based attack risk and supporting compliance with customer security requirements.
- Maintained documentation of security controls, processes, and incident response procedures in support of audit and compliance activities.

KEY ACHIEVEMENTS

- Engineered a library of custom Microsoft Sentinel Kusto Query Language (KQL) detection rules and Security Orchestration, Automation and Response (SOAR) playbooks, materially reducing mean time to detect and respond to high-severity security incidents.
- Expert deployment and ongoing management of CrowdStrike Falcon EDR across an 8,000-user estate, establishing mature threat hunting and detection capabilities.
- Conducted proactive threat hunting campaigns using MITRE ATT&CK-aligned methodologies, identifying previously undetected threat activity and driving control improvements.
- Deployed Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across the full estate as the lead engineer, significantly expanding Extended Detection and Response (XDR) coverage.
- Achieved and maintained Cyber Essentials Plus and ISO 27001 compliance through robust implementation of technical and process controls.

- Implemented BeyondTrust Privileged Access Management (PAM) to eliminate uncontrolled privileged access, achieving measurable reduction in lateral movement risk.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
