PROSPER AWUNI

Senior Cyber Security Engineer | Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR) | Endpoint Detection and Response (EDR) | London

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of experience designing, deploying, and managing enterprise security operations across large-scale environments. I specialise in Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR) tooling, and proactive threat hunting aligned to the MITRE ATT&CK framework. Currently operating within a team protecting an 8,000-user estate at the University of the Arts, London, I have led detection engineering initiatives, automated alert triage workflows, and driven measurable improvements to security posture across hybrid cloud and on-premises infrastructure. I bring a track record of working in small, high-impact security teams and thrive in fast-paced financial and enterprise environments where precision, accuracy, and commercial awareness are equally valued.

CORE SKILLS AND TECHNICAL STACK

- **SIEM / SOAR:** CrowdStrike Falcon Next-Generation SIEM (NG-SIEM) and LogScale, Microsoft Sentinel with Kusto Query Language (KQL), SOAR playbook development and automation
- **EDR / XDR:** CrowdStrike Falcon (Prevent, Insight, Discover, EDR) - expert-level; Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft Defender XDR
- **Threat Detection and Response:** Detection rule engineering, alert triage and investigation, incident response (NIST 800-61), MITRE ATT&CK mapping and coverage analysis
- **Identity and Access Management:** Microsoft Entra ID (Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), BeyondTrust Privileged Access Management (PAM)
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus
- **Cloud Security:** Microsoft Azure security posture management, Intune Mobile Device Management (MDM) and Mobile Application Management (MAM)
- **Scripting and Automation:** PowerShell, KQL, SOAR automation workflows
- **Security Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK
- **Other Tools:** Check Point Harmony (firewall), Mimecast, Tanium, Splunk (Security Information and Event Management), BeyondTrust

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Lead SIEM and SOAR operations across an 8,000-user estate, engineering detection rules in CrowdStrike Falcon NG-SIEM and Microsoft Sentinel; optimised KQL-based analytics to reduce false positive rates and improve mean-time-to-detect (MTTD).
- Operate as the subject matter expert for CrowdStrike Falcon (Prevent, EDR, Insight, Discover, NG-SIEM), managing the full lifecycle from deployment configuration through to advanced threat hunting using Falcon Query Language.
- Lead incident response engagements following the NIST 800-61 framework, coordinating triage, containment, eradication, and post-incident review; responsible for producing executive-level and technical incident reports.
- Drive proactive threat hunting campaigns using MITRE ATT&CK framework, identifying undetected adversarial activity across endpoint, identity, and cloud attack surfaces.
- Manage Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft Defender XDR to deliver extended detection and response across the Microsoft 365 environment.
- Automate security alert triage, enrichment, and response workflows using SOAR playbooks, integrated with CrowdStrike Falcon and Microsoft Sentinel, reducing analyst workload significantly.

- Administer BeyondTrust Privileged Access Management (PAM), enforcing least-privilege principles and reducing the attack surface for privileged account compromise.
- Collaborate with the wider IT and security teams to implement and review Conditional Access policies in Microsoft Entra ID and enforce Multi-Factor Authentication (MFA) and Single Sign-On (SSO).

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity *March 2022 - March 2025*

- Monitored and investigated security alerts across SIEM (CrowdStrike Falcon NG-SIEM, Microsoft Sentinel), EDR, and email security platforms (Mimecast), performing triage and escalation in line with agreed response playbooks.
- Contributed to the deployment and configuration of Microsoft Defender for Endpoint (MDE) across an 8,000-device estate, including onboarding, policy tuning, and integration with Microsoft Sentinel.
- Performed vulnerability assessments using Tenable.io, AppCheck, and Nessus; tracked remediation progress and produced management reporting on vulnerability trends and risk exposure.
- Managed Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) policies to enforce device compliance across Windows, iOS, and Android endpoints.
- Supported the implementation of BeyondTrust Privileged Access Management (PAM), developing just-in-time access workflows and session monitoring for privileged accounts.
- Developed and maintained PowerShell automation scripts for security operations tasks including account lifecycle management, Defender policy reporting, and log analysis.
- Assisted in the organisation's Cyber Essentials Plus certification and contributed to ISO 27001 audit readiness activities.

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure *February 2021 - March 2022*

- Delivered security engineering and infrastructure support for a fast-growing SaaS and FinTech platform, ensuring security controls met enterprise client requirements and internal compliance standards.
- Managed endpoint security tooling, network security (Check Point Harmony firewall), and identity access controls, responding to security incidents and system alerts as part of a small IT security team.
- Supported vulnerability management activities and assisted with security reviews for new product features and third-party integrations, applying OWASP and CIS Controls guidance.
- Contributed to cloud infrastructure security hardening on Azure and AWS, implementing security monitoring integrations and access control policies.

KEY ACHIEVEMENTS

- Engineered and deployed CrowdStrike Falcon NG-SIEM detection rules covering over 80% of MITRE ATT&CK tactics relevant to the organisation's threat profile, significantly improving detection fidelity.
- Led an 8,000-user Microsoft Defender for Endpoint deployment, delivering full EDR coverage across the estate within agreed project timelines.
- Automated SOAR playbooks for the top five alert types, cutting analyst mean-time-to-respond (MTTR) and freeing capacity for higher-value threat hunting work.
- Achieved and maintained Cyber Essentials Plus certification for the University, coordinating technical remediation and evidence gathering across multiple teams.
- Implemented BeyondTrust Privileged Access Management (PAM) controls that reduced standing privileged access by over 70%, directly reducing risk from insider threats and credential compromise.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
