PROSPER AWUNI

Senior Cyber Security Engineer | Endpoint Detection and Response (EDR) | Detection Engineering | MITRE ATT&CK | Security Information and Event Management (SIEM)

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience in Endpoint Detection and Response (EDR) engineering, Security Information and Event Management (SIEM) detection rule development, and MITRE ATT&CK-aligned coverage analysis. I have deep expertise in building, tuning, and optimising detection logic across enterprise EDR and SIEM platforms to protect large-scale hybrid cloud environments. At the University of the Arts, London, I have led detection engineering initiatives across cloud platforms including Microsoft Azure, managing security log pipelines, developing automated response playbooks, and conducting proactive threat hunting to identify adversarial activity that evades standard controls. I am experienced in aligning security operations to NIST Cybersecurity Framework (CSF) and CIS Controls, and have contributed to public sector-equivalent compliance frameworks including Cyber Essentials Plus. I bring strong PowerShell and KQL scripting capability, and a structured approach to improving monitoring fidelity through continuous detection improvement cycles.

CORE SKILLS AND TECHNICAL STACK

- **EDR / Detection Engineering:** CrowdStrike Falcon (EDR, NG-SIEM, Prevent, Insight, Discover) - expert; Microsoft Defender for Endpoint (MDE); SIEM and EDR detection rule writing, tuning, and MITRE ATT&CK coverage mapping
- **SIEM / Log Management:** CrowdStrike Falcon NG-SIEM (LogScale), Microsoft Sentinel with Kusto Query Language (KQL), Splunk with Search Processing Language (SPL); security log pipeline design and optimisation
- **Cloud Security:** Microsoft Azure security monitoring, AWS and Google Cloud Platform (GCP) security logging; Conditional Access, Entra ID, and cloud-native security controls
- **Threat Hunting and Intelligence:** Proactive threat hunting using MITRE ATT&CK, behavioural analysis, indicator of compromise (IOC) development, adversary technique identification
- **Security Orchestration and Automation:** Security Orchestration, Automation and Response (SOAR) playbook development; PowerShell scripting for detection automation and response workflows
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus; risk-based vulnerability prioritisation and remediation tracking
- **Identity Security:** Microsoft Entra ID (Azure Active Directory), BeyondTrust Privileged Access Management (PAM), Multi-Factor Authentication (MFA)
- **Frameworks:** MITRE ATT&CK, NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, NIST 800-61 Incident Response

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Lead EDR detection engineering across the organisation using CrowdStrike Falcon, developing, testing, and tuning detection rules mapped to MITRE ATT&CK tactics and techniques to improve coverage across endpoint, identity, and cloud attack surfaces.
- Design and optimise security log pipelines from Azure, Microsoft 365, and on-premises infrastructure into CrowdStrike Falcon NG-SIEM (LogScale) and Microsoft Sentinel, ensuring high-fidelity data ingestion for detection and investigation workflows.
- Conduct proactive threat hunting campaigns aligned to MITRE ATT&CK, identifying undetected malicious activity through behavioural analytics and custom detection queries in KQL and LogScale Query Language.
- Develop and maintain SOAR automation playbooks integrating CrowdStrike Falcon and Microsoft Sentinel, automating alert triage, enrichment, and initial response actions to improve analyst efficiency.
- Lead incident response engagements following NIST 800-61, co-ordinating cross-functional responses to cyber incidents and producing detailed post-incident reports with actionable lessons learned.

- Manage Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft Defender XDR, reviewing and tuning detection policies to reduce noise and improve threat signal quality.
- Conduct Splunk SPL-based analysis for retrospective investigation of security events and correlation of multi-source log data during major incident investigations.
- Administer BeyondTrust Privileged Access Management (PAM), enforcing just-in-time access and session monitoring for privileged accounts across hybrid Azure and on-premises environments.

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity *March 2022 - March 2025*

- Built and tuned SIEM detection rules in Microsoft Sentinel and CrowdStrike Falcon NG-SIEM, using KQL and LogScale Query Language to detect threats across endpoint, identity, and cloud workloads.
- Maintained MITRE ATT&CK coverage matrices, tracking detection gaps and prioritising new detection content development based on threat intelligence and attack scenario testing.
- Performed comprehensive vulnerability assessments using Tenable.io, Nessus, and AppCheck; created and tracked remediation plans for identified vulnerabilities across cloud and on-premises systems.
- Supported the security log pipeline for Azure workloads, onboarding new data sources into Microsoft Sentinel and validating log ingestion quality and coverage.
- Developed PowerShell automation scripts for security operational tasks including threat indicator ingestion, log parsing, and automated response actions.
- Contributed to Cyber Essentials Plus certification and ISO 27001 audit preparation, demonstrating alignment to CIS Controls and NIST Cybersecurity Framework (CSF).
- Managed Intune Mobile Device Management (MDM) and Mobile Application Management (MAM), enforcing endpoint compliance policies across Windows, iOS, and Android device fleets.

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure *February 2021 - March 2022*

- Delivered security engineering for a fast-growing SaaS/FinTech platform, managing endpoint security, network security controls (Check Point Harmony), and cloud security monitoring across Azure and AWS.
- Monitored security event logs and alerts, performing initial triage and escalation, and supporting incident response activities for the organisation's cloud-hosted services.
- Implemented cloud security log monitoring integrations, contributing to the early development of SIEM coverage for the organisation's AWS and Azure cloud environments.
- Supported vulnerability management and security assurance activities, applying CIS Controls and OWASP guidance to identify and remediate security weaknesses in infrastructure and application layers.

KEY ACHIEVEMENTS

- Mapped CrowdStrike Falcon EDR detections to MITRE ATT&CK, achieving over 80% coverage of tactics relevant to the organisation's threat profile and identifying previously undetected attack techniques.
- Designed and deployed security log pipelines from Azure into Microsoft Sentinel, enabling full-fidelity cloud workload monitoring and reducing detection blind spots across the hybrid estate.
- Developed SOAR playbooks that automated initial triage and response for the highest-volume alert categories, cutting analyst mean-time-to-respond (MTTR) and releasing capacity for higher-value threat hunting.
- Led the 8,000-user Microsoft Defender for Endpoint (MDE) deployment, delivering enterprise-wide EDR coverage and integrating detections with Microsoft Sentinel for unified SIEM/XDR visibility.
- Achieved and maintained Cyber Essentials Plus certification, co-ordinating technical remediation across network, endpoint, and identity security domains.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+

- Google IT Support Professional Certificate
